## About the Fund

The Breakwave Dry Bulk Shipping ETF (BDRY™) is an exchange-traded product designed to reflect the daily price movements of the near-dated dry bulk freight futures. BDRY offers investors unlevered exposure to dry bulk freight without the need for a futures account. BDRY provides transparency to investors by listing all its holdings daily. BDRY is a commodity pool that issues shares which may be purchased and sold on NYSE Arca.

## Breakwave Advisors

Breakwave Advisors LLC is a registered Commodity Trading Advisor founded in 2017 and based in New York City. The advisor specializes in Shipping and Freight investments and is the CTA for the Breakwave Dry Bulk Shipping ETF.

## Investment Strategy

The Fund will hold freight futures with a weighted average of approximately three months to expiration, using a mix of one-to-six-month freight futures, based on the prevailing calendar schedule. The Fund intends to progressively increase its position to the next calendar quarter three-month strip while existing positions are maintained and settle in cash. The initial freight futures allocation will be 50% Capesize contracts, 40% Panamax contracts and 10% Supramax contracts, rebalancing annually, as needed, during the first two weeks of the month of December.

**Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This material must be accompanied or preceded by a prospectus. Please read the prospectus carefully before investing. Investing in freight futures can be volatile and is not suitable for all investors.**

**The Fund is not a mutual fund or any other type of investment company within the meaning of the Investment Company Act of 1940, as amended, and is not subject to regulation thereunder.**

<sup>3</sup> Breakwave has agreed to waive its fee and the Sponsor has agreed to assume the Fund's Other Expenses (which term excludes brokerage fees, interest expenses, and extraordinary expenses) so that the Fund's total annual expenses do not exceed 3.50% per annum through February 28, 2021.

An investment in the Fund involves significant risks. You could lose all or part of your investment in the Fund, and the Fund's performance could trail that of other investments. The value of the Shares of the Fund relates directly to the value of, and realized profit or loss from, the Freight Futures and other assets held by the Fund, and fluctuations in price could materially affect the Fund's shares. Investments in freight futures typically fluctuate in value with changes in spot charter rates. Charter rates for dry bulk vessels are volatile and have declined significantly since their historic highs and may remain at low levels or decrease further in the future. The Fund will not take defensive positions to protect against declining freight rates, which could cause a decline to the value of the Fund's shares.

Although the Fund's shares are listed and traded on the NYSE Arca, there can be no guarantee that an active trading market for the shares will be maintained. If an investor needs to sell shares at a time when no active trading market for them exists, the price the investor receives upon sale of the shares, assuming they were able to be sold, likely would be lower than if an active market existed.
