Prospectus dated January 31, 2019 of the
BlueStar Israel Technology ETF (ITEQ)
Etho Climate Leadership U.S. ETF (ETHO)
AI Powered Equity ETF (AIEQ)
ETFMG Alternative Harvest ETF (MJ)

The following information supplements each of the above-listed Prospectuses:

Litigation

PENDING - The Trust, the trustees of the Trust, the Advisor and certain officers of the Advisor are defendants in an action filed May 2, 2017 in the Superior Court of New Jersey captioned PureShares, LLC d/b/a PureFunds et al. v. ETF Managers Group, LLC et al., Docket No. C-63-17. The PureShares action alleges claims based on disputes arising out of contractual relationships with the Advisor. The action seeks damages in unspecified amounts and injunctive relief based on breach of contract, wrongful termination, and several other theories. At the outset of the litigation, and again a few weeks later, plaintiffs sought temporary injunctive relief. Both motions were denied, and the matter is now proceeding through pretrial discovery. The defendants believe the lawsuit is without merit and intend to vigorously defend themselves against the allegations.

PENDING - The Advisor, its parent, Exchange Traded Managers Group, LLC and its chief executive officer are defendants in a case filed on October 26, 2017 in the United States District Court for the Southern District of New York by NASDAQ, Inc. captioned Nasdaq, Inc. v. Exchange Traded Managers Group, LLC et al., Case 1:17-cv-08252. This action arises out of related facts and circumstances in the New Jersey litigation and asserts claims for breach of contract, wrongful termination and certain other theories with respect to the same exchange traded funds discussed above. The defendants in the Southern District actions believe the lawsuit is without merit and intend to vigorously defend themselves against the allegations and have asserted counterclaims against NASDAQ for breaches of its duties under the related index license agreement and various other agreements.

BlueStar Israel Technology ETF (ITEQ)

Listed on NYSE Arca, Inc.

PROSPECTUS

January 31, 2019

Fund shares are not individually redeemable by the Fund but trade on the NYSE Arca, Inc. in individual share lots.

Beginning on January 1, 2021, as permitted by regulations adopted by the SEC, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the Fund's reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to elect to receive shareholder reports and other Fund communications electronically.

You may elect to receive all future Fund reports in paper free of charge. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of Fund shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

THE SEC HAS NOT APPROVED OR DISAPPROVED THESE SECURITIES OR PASSED UPON THE ADEQUACY OR ACCURACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

BlueStar Israel Technology ETF—Fund Summary

Investment Objective

The BlueStar Israel Technology ETF (the “Fund”) seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the BlueStar Israel Global Technology Index™ (“BIGITech™” or the “Index”).

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average daily net assets. This table and the Example below do not include the brokerage commissions that investors may pay on their purchases and sales of Fund shares.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.75%
Distribution and Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	<u>0.75%</u>

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This Example does not include the brokerage commissions that investors may pay on their purchases and sales of Fund shares. Although your actual costs may be higher or lower, based on these assumptions your cost would be:

1 Year	3 Years	5 Years	10 Years
\$77	\$240	\$417	\$930

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. For the fiscal year ended September 30, 2018, the Fund’s portfolio turnover rate was 11% of the average value of its portfolio.

Principal Investment Strategies

The Fund uses a “passive” or indexing approach to try to achieve the Fund’s investment objective. Unlike many investment companies, the Fund does not try to “beat” the Index and does not seek temporary defensive positions when markets decline or appear overvalued.

BIGITech™ was created in 2013 by BlueStar Global Investors LLC d/b/a BlueStar Indexes® (“BlueStar”) (the “Index Provider”) and tracks the performance of exchange-listed Israeli technology operating companies. Such companies may be engaged in a wide spectrum of technology related sectors, including information technology, biotechnology, sustainable agriculture technology and defense technology.

The universe of companies deemed “Israeli technology companies” is determined by the Index Providers based on a range of quantitative and qualitative factors including a company’s domicile; country of formation or founding; primary management, operational, or research and development location; tax status; source of revenue; and location of employees. To be included in the Index, Israeli technology companies must have their equity securities or depositary receipts, such as American Depositary Receipts (“ADRs”) or Global Depositary Receipts (“GDRs”) representing such equity securities, listed on a securities exchange.

Companies meeting the above criteria are screened for investibility (e.g., their equity securities must not be listed on an exchange in a country which employs restrictions on foreign capital investment deemed to be significant), a minimum market capitalization and liquidity (i.e., average trading volume). The Index is reconstituted semi-annually at the close of business on the third Friday of June and December. At the time of each reconstitution, the companies in the Index are weighted based on their market capitalization, subject to certain additional limitations designed to prevent inordinately heavy weightings of any one company. For example, each company is limited to a 10% weighting in the Index and all components with an individual weight of at least 5% are limited in the aggregate to 50%

of the weight of the Index. Additionally, if any individual Index component exceeds 24% of the Index weight at any time, the Index will be rebalanced to reduce such component to a weighting of 20%.

The Index is calculated and maintained by S&P Dow Jones Indices LLC (“SPDJI” or the “Index Calculation Agent”), a Division of The McGraw-Hill Companies, Inc. SPDJI is independent of BlueStar, the Fund, its adviser, and distributor.

The Index is not limited to a minimum or maximum number of constituents; rather, it includes all companies meeting the eligibility criteria for inclusion in the Index. The Index may include companies of any market capitalization, including small capitalization companies.

As of January 20, 2019, the Index included the securities of 57 companies. As of January 20, 2019, the three largest positions in the Index were Amdocs Ltd (7.47%), Check Point Software (7.24%), and Nice Ltd (6.96%).

The Fund uses a replication strategy. A replication strategy is an indexing strategy that involves investing in the securities of the Index in approximately the same proportions as in the Index. However, the Fund may utilize a representative sampling strategy with respect to the Index when a replication strategy might be detrimental to shareholders, such as when there are practical difficulties or substantial costs involved in compiling a portfolio of equity securities to follow the Index, in instances in which a security in the Index becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations (such as tax diversification requirements) that apply to the Fund but not the Index.

The Fund will invest at least 80% of its total assets in the component securities of the Index and in depositary receipts representing such securities. As a result, under normal circumstances, the Fund will invest at least 80% of its total assets in Israeli technology companies (the “80% Policy”).

Correlation: Correlation is the extent to which the values of different types of investments move in tandem with one another in response to changing economic and market conditions. An index is a theoretical financial calculation, while the Fund is an actual investment portfolio. The performance of the Fund and the Index may vary somewhat due to transaction costs, asset valuations, foreign currency valuations, market impact, corporate actions (such as mergers and spin-offs), legal restrictions or limitations, illiquid or unavailable securities and timing variances.

The Fund’s investment adviser expects that, over time, the correlation between the Fund’s performance and that of the Index, before fees and expenses, will exceed 95%. A correlation percentage of 100% would indicate perfect correlation. If the Fund uses a replication strategy, it can be expected to have greater correlation to the Index than if it uses a representative sampling strategy.

Industry Concentration Policy: The Fund will concentrate its investments (*i.e.*, hold 25% or more of its net assets) in a particular industry or group of related industries to approximately the same extent that the Index is concentrated. As of January 20, 2019, the Index was concentrated in the group of software and computer companies.

Principal Risks

As with all funds, a shareholder is subject to the risk that his or her investment could lose money. The principal risks affecting shareholders’ investments in the Fund are set forth below. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.

Equity Market Risk: The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests such as political, market and economic developments, as well as events that impact specific issuers.

Foreign Investments Risk: Returns on investments in foreign stocks could be more volatile than, or trail the returns on, investments in U.S. stocks.

Currency Risk: Indirect and direct exposure to foreign currencies subjects the Fund to the risk that currencies will decline in value relative to the U.S. dollar. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates and the imposition of currency controls or other political developments in the U.S. or abroad.

Depositary Receipts Risk. The Fund may invest in depositary receipts. Investment in ADRs and GDRs may be less liquid than the underlying shares in their primary trading market and GDRs, many of which are issued by companies in emerging markets, may be more volatile and less liquid than depositary receipts issued by companies in more developed markets.

Foreign Market and Trading Risk. The trading markets for many foreign securities are not as active as U.S. markets and may have less governmental regulation and oversight. Foreign markets also may have clearance and settlement procedures that make it difficult for the Fund to buy and sell securities. These factors could result in a loss to the Fund by causing the Fund to be unable to dispose of an investment or to miss an attractive investment opportunity, or by causing Fund assets to be uninvested for some period of time.

Foreign Securities Risk: The Fund invests substantially all its assets directly in securities of issuers based outside of the U.S., or in depositary receipts that represent such securities. Investments in securities of non-U.S. issuers involve certain risks that may not be present with investments in securities of U.S. issuers, such as risk of loss due to foreign currency fluctuations or to political or economic instability, as well as varying regulatory requirements applicable to investments in non-U.S. issuers. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may also be subject to different regulatory, accounting, auditing, financial reporting and investor protection standards than U.S. issuers.

Political and Economic Risk. The Fund is subject to foreign political and economic risk not associated with U.S. investments, meaning that political events, social and economic events and natural disasters occurring in a country where the Fund invests could cause the Fund's investments in that country to experience gains or losses. The Fund also could be unable to enforce its ownership rights or pursue legal remedies in countries where it invests.

Reliance on Trading Partners Risk: The Fund invests in some economies that are heavily dependent upon trading with key partners. Any reduction in this trading may cause an adverse impact on the economy in which the Fund invests.

Market Trading Risk: An investment in the Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation/redemption process of the Fund. Any of these factors, among others, may lead to the Fund's shares trading at a premium or discount to NAV.

Trading Issues. Although Fund shares are listed for trading on the NYSE Arca, Inc. (the "Exchange"), there can be no assurance that an active trading market for such shares will be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of any Fund will continue to be met or will remain unchanged or that the shares will trade with any volume, or at all. Further, secondary markets may be subject to erratic trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and Authorized Participants may step away from making a market in Fund shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Fluctuation of NAV. The NAV of Fund shares will generally fluctuate with changes in the market value of the Fund's securities holdings. The market prices of shares will generally fluctuate in accordance with changes in the Fund's NAV and supply and demand of shares on the Exchange. It cannot be predicted whether Fund shares will trade below, at or above their NAV. During periods of unusual volatility or market disruptions, market prices of Fund shares may deviate significantly from the market value of the Fund's securities holdings or the NAV of Fund shares. As a result, investors in the Fund may pay significantly more or receive significantly less for Fund shares than the value of the Fund's underlying securities or the NAV of Fund shares.

Costs of Buying or Selling Shares. Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of shares.

Non-Diversification Risk: Because the Fund is "non-diversified," it may invest a greater percentage of its assets in the securities of a single issuer or a small number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a small number of issuers could cause the Fund's overall value to decline to a greater degree than if the Fund held a more diversified portfolio. This may increase the Fund's volatility and have a greater impact on the Fund's performance.

Passive Investment Risk: The Fund is not actively managed and therefore would not sell an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index.

Risks of Investing in Israeli Companies: Investment in securities of Israeli companies involves risks that may negatively affect the value of your investment in the Fund. Among other things, Israel's economy depends on imports of certain key items, such as crude oil, coal, grains, raw materials and military equipment. Israel's relations with the Palestinian Authority and certain neighboring countries such as Lebanon, Syria and Iran, among others, have at times been strained due to territorial disputes, historical animosities or security concerns, which may cause uncertainty in the Israeli markets and adversely affect the overall economy. In addition, U.S.-designated terrorist groups such as Hezbollah and Hamas operate in close proximity to Israel's borders, and frequently threaten Israel with attack. Furthermore, Israel's economy is heavily dependent on trade relationships with key counterparties around the world, specifically the United States and European Union countries. Any reduction in these trade flows may have an adverse impact on the Fund's investments.

Israel has experienced a history of hostile relations with several countries in the Middle East region. Israel and its citizens have also been the target of periodic acts of terrorism that have the potential to disrupt economic activity in the country, and certain terrorist groups are committed to violence against Israel. Current hostilities and the potential for future hostilities may diminish the value of companies whose principal operations or headquarters are located in Israel. Actual hostilities or the threat of future hostilities may cause significant volatility in the share prices of companies based in or having significant operations in Israel.

Smaller Companies Risk: The Fund's Index may be composed primarily of, or have significant exposure to, securities of smaller companies. Smaller companies may be more vulnerable to adverse business or economic events than larger, more established companies, and may underperform other segments of the market or the equity market as a whole. The securities of smaller companies also tend to be bought and sold less frequently and at significantly lower trading volumes than the securities of larger companies. As a result, it may be more difficult for the Fund to buy or sell a significant amount of the securities of a smaller company without an adverse impact on the price of the company's securities, or the Fund may have to sell such securities in smaller quantities over a longer period of time, which may increase the Fund's tracking error.

Tax Risk: To qualify for the favorable tax treatment generally available to regulated investment companies, the Fund must satisfy certain diversification requirements under the Internal Revenue Code of 1986, as amended (the "Code"). In particular, the Fund generally may not acquire a security if, as a result of the acquisition, more than 50% of the value of the Fund's assets would be invested in (a) issuers in which the Fund has, in each case, invested more than 5% of the Fund's assets and (b) issuers more than 10% of whose outstanding voting securities are owned by the Fund. When the Index is concentrated in a relatively small number of securities, it may not be possible for the Fund to fully implement a replication strategy or a representative sampling strategy while satisfying these diversification requirements. The Fund's efforts to satisfy the diversification requirements may cause the Fund's return to deviate from that of the Index, and the Fund's efforts to replicate the Index may cause it inadvertently to fail to satisfy the diversification requirements. If the Fund were to fail to qualify as a regulated investment company, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income.

Technology Companies Risk. Companies in the technology field, including companies in the computers, telecommunications and electronics industries, face intense competition, which may have an adverse effect on profit margins. Technology companies may have limited product lines, markets, financial resources or personnel. The products of technology companies may face obsolescence due to rapid technological developments and frequent new product introduction, and such companies may face unpredictable changes in growth rates, competition for the services of qualified personnel and competition from foreign competitors with lower production costs. Companies in the technology sector are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights may adversely affect the profitability of these companies.

Tracking Error Risk: The Fund's return may not match or achieve a high degree of correlation with the return of the Index. To the extent the Fund utilizes a sampling approach, it may experience tracking error to a greater extent than if the Fund sought to replicate the Index. In addition, in order to minimize the market impact of an Index rebalance, the Fund may begin trading to effect the rebalance in advance of the effective date of the rebalance and continue trading after the effective date of the rebalance, which may contribute to tracking error.

Valuation Risk: The sales price that the Fund could receive for a security may differ from the Fund's valuation of the security and may differ from the value used by the Index, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. In addition, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.

Performance Information

The following information provides some indication of the risks of investing in the Fund. The bar chart shows the annual return for the Fund. The table shows how the Fund's average annual returns for one year and since inception compare with those of the Index and a broad measure of market performance. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.iteqetf.com or by calling 844-ETFMGRS (383-6477).

Calendar Year Total Return as of December 31

During the period of time shown in the bar chart, the Fund's highest return for a calendar quarter was 14.14% (quarter ended March 31, 2017) and the Fund's lowest return for a calendar quarter was -12.41% (quarter ended December 31, 2018).

Average Annual Total Returns (for the period ended December 31, 2018)

	<u>1 Year</u>	<u>Since Inception</u> <u>11/2/15</u>
BlueStar Israel Technology ETF		
Return Before Taxes	-0.18%	7.95%
Return After Taxes on Distributions	-0.21%	7.86%
Return After Taxes on Distributions and Sale of Fund Shares	-0.02%	6.18%
BlueStar Israel Global Technology Index™	0.60%	8.79%
(reflects no deduction for fees, expenses or taxes)		
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	-4.38%	7.92%

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Investment Adviser

ETF Managers Group LLC (the "Adviser") serves as the investment adviser to the Fund.

Portfolio Managers

Samuel R. Masucci, III, Chief Executive Officer of the Adviser, has been the Fund's portfolio manager since January 2018. James B. Francis, CFA, Chief Investment Officer and Senior Portfolio Manager of the Adviser, and Devin Ryder, Portfolio Manager of the Adviser, have been the Fund's portfolio managers since May 2018.

Purchase and Sale of Fund Shares

Individual shares may only be purchased and sold on a national securities exchange through a broker-dealer. You can purchase and sell individual shares of the Fund throughout the trading day like any publicly traded security. The Fund's shares are listed on the Exchange. The price of the Fund's shares is based on market price, and because exchange-traded fund shares trade at market prices rather than net asset value ("NAV"), shares may trade at a price greater than NAV (premium) or less than NAV (discount). The Fund issues and redeems shares on a continuous basis, at NAV, only in blocks of 50,000 shares ("Creation Units"), principally in-kind for securities included in the Index, and only Authorized Participants (typically, broker-dealers) may purchase or redeem Creation Units. **Except when aggregated in Creation Units, the Fund's shares are not redeemable securities.**

Tax Information

The distributions made by the Fund are taxable, and will be taxed as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to federal income tax. You should consult your tax advisor about your specific tax situation.

Financial Intermediary Compensation

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

Additional Information about the Fund’s Investment Objective and Strategies

The Fund, using an “indexing” investment approach, seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the Index. A number of factors may affect the Fund’s ability to achieve a high correlation with the Index, including the degree to which the Fund utilizes a sampling methodology. There can be no guarantee that the Fund will achieve a high degree of correlation. The Adviser may sell securities that are represented in the Fund’s Index or purchase securities not yet represented in the Index, in anticipation of their removal from or addition to the Index. There may also be instances in which the Adviser may choose to overweight securities in the Fund’s Index, thus causing the Fund to purchase or sell securities not in the Index that the Adviser believes are appropriate to substitute for certain securities in the Index. The Fund will not take defensive positions.

The Fund will invest at least 80% of its total assets in the component securities of the Index and in depositary receipts representing such securities. The Fund may invest up to 20% of its total assets in securities that are not in the Index to the extent that the Adviser believes such investments should help the Fund’s overall portfolio track the Index.

The Index is part of the Bluestar Israel Global Indexes, a family of index products owned by BlueStar and that focuses on Israeli companies.

The Index includes technology companies with significant ties to Israel, although the specific ties qualifying an individual company for inclusion in the Index will depend on factors such as the company’s specific industry or business lines, the company’s size, and its sources of capital. For example, the Index may include multinational companies that were founded in Israel and maintain a significant portion of their personnel, operations, or assets in Israel, but which have a majority of their personnel, operations, or assets spread across other countries. In other words, the success of an Israeli company at raising capital, attracting customers, and generating profits outside Israel will not automatically exclude the company from being included in the Index. Even after meeting the Index criteria, candidates for inclusion in the Index are screened by BlueStar’s Index Advisory Committee to ensure that a company’s satisfaction of the Index criteria is not outweighed by other aspects of the company that the Index Advisory Committee believes should disqualify the company from being considered an “Israeli technology company” and included in the Index.

The Index’s component securities are selected using the following criteria. An issuer qualifies as an “Israeli company” when it meets one criteria from Group A and one criteria from Group B; or meets one criteria from Group A and two criteria from Group C, as follows:

Group A

- At least 20% of the company’s employees are located in Israel
- At least 20% of the company’s long-lived assets are located in Israel
- The company has a major research and development (“R&D”) center in Israel

Group B

- The company’s securities are listed on the Tel Aviv Stock Exchange
- The company’s tax status is in Israel
- The company is incorporated in Israel
- The company maintains a headquarters in Israel or has a dual-headquarters in Israel

Group C

- The company has a majority of its Board of Directors or at least two Executive Officers domiciled in Israel
- The company’s business results would be materially altered without its Israeli assets. These assets may include but are not limited to: intellectual and human capital, or licenses to Israeli technology that materially affect revenue or R&D
- The company is a subsidiary or non-Israel operating branch of a company that would otherwise be considered Israeli

An issuer qualifies as a “technology company” when it meets one of the following criteria:

- The company is defined as an “Information Technology” company by Standard & Poor’s Global Industry Classification Standard (“GICS”)
- The company operates in one of the following Industries or Sub-Industries as defined by GICS:
 - Health Care Equipment and Supplies
 - Biotechnology
 - Life Sciences Tools & Services
 - Aerospace & Defense
 - Clean Energy and Clean Water Technology
 - Agriculture Technology
- The company is a holding company of companies that operate predominantly as technology companies

The Fund’s investment objective has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon 60 days’ written notice to shareholders. Additionally, in accordance with rules under the Investment Company Act of 1940, as amended (the “1940 Act”), the 80% Policy has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon 60 days’ written notice to shareholders.

Additional Risk Information

The following section provides additional information regarding the principal risks identified under “Principal Risks” in the Fund’s summary.

Equity Market Risk: An investment in the Fund involves risks of investing in equity securities, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in securities prices. The values of equity securities could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of out-performance and under-performance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Holders of common stocks incur more risk than holders of preferred stocks and debt obligations because common stockholders, as owners of the issuer, have generally inferior rights to receive payments from the issuer in comparison with the rights of creditors of, or holders of debt obligations or preferred stocks issued by, the issuer.

Foreign Investment Risk: Returns on investments in foreign stocks could be more volatile than, or trail the returns on, investments in U.S. stocks.

Currency Risk. Indirect and direct exposure to foreign currencies subjects the Fund to the risk that currencies will decline in value relative to the U.S. dollar. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates and the imposition of currency controls or other political developments in the U.S. or abroad. The Fund’s NAV is determined on the basis of U.S. dollars and, therefore, the Fund may lose value if the local currency of a foreign market depreciates against the U.S. dollar, even if the local currency value of the Fund’s holdings goes up.

Depository Receipts Risk. The Fund may invest in depository receipts. Depository receipts include ADRs and GDRs. ADRs are U.S. dollar-denominated receipts representing shares of foreign-based corporations. ADRs are issued by U.S. banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. GDRs are depository receipts which are similar to ADRs, but are shares of foreign-based corporations generally issued by international banks in one or more markets around the world. Investment in ADRs and GDRs may be less liquid than the underlying shares in their primary trading market and GDRs, many of which are issued by companies in emerging markets, may be more volatile and less liquid than depository receipts issued by companies in more developed markets.

Depository receipts may be sponsored or unsponsored. Sponsored depository receipts are established jointly by a depository and the underlying issuer, whereas unsponsored depository receipts may be established by a depository without participation by the underlying issuer. Holders of an unsponsored depository receipt generally bear all the costs associated with establishing the unsponsored depository receipt. In addition, the issuers of the securities underlying unsponsored depository receipts are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the depository receipts.

Depository receipts may be unregistered and unlisted. The Fund’s investments also may include ADRs and GDRs that are not purchased in the public markets and are restricted securities that can be offered and sold only to “qualified institutional buyers” under Rule 144A of the Securities Act of 1933, as amended. The Adviser will determine the liquidity of such investments

pursuant to guidelines established by the Fund's Board of Trustees (the "Board"). If a particular investment in such ADRs or GDRs is deemed illiquid, that investment will be included within the Fund's limitation on investment in illiquid securities. Moreover, if adverse market conditions were to develop during the period between the Fund's decision to sell these types of ADRs or GDRs and the point at which the Fund is permitted or able to sell such security, the Fund might obtain a price less favorable than the price that prevailed when it decided to sell.

Foreign Market and Trading Risk. The trading markets for many foreign securities are not as active as U.S. markets and may have less governmental regulation and oversight. Foreign markets also may have clearance and settlement procedures that make it difficult for the Fund to buy and sell securities. These factors could result in a loss to the Fund by causing the Fund to be unable to dispose of an investment or to miss an attractive investment opportunity, or by causing Fund assets to be uninvested for some period of time. Where all or a part of the Fund's underlying securities trade in a market that is closed when the Exchange is open, there may be changes between the last quotation from its closed foreign market and the value of such securities during the Fund's domestic trading day. This could lead to differences between the market price of the Fund shares and the value of the Fund's underlying securities.

Foreign Securities Risk. The Fund invests in foreign securities, including non-U.S. dollar-denominated securities traded outside of the United States and U.S. dollar-denominated securities of foreign issuers traded in the United States. Investment in foreign securities may involve higher costs than investment in U.S. securities, including higher transaction and custody costs as well as the imposition of additional taxes by foreign governments. Foreign investments may also involve risks associated with the level of currency exchange rates, less complete financial information about the issuers, less market liquidity, more market volatility and political instability, as well as varying regulatory requirements applicable to investments in non-U.S. issuers. Future political and economic developments, the possible imposition of withholding taxes on dividend income, the possible seizure or nationalization of foreign holdings, the possible establishment of exchange controls or freezes on the convertibility of currency, or the adoption of other governmental restrictions might adversely affect an investment in foreign securities. Additionally, foreign issuers may be subject to less stringent regulation, and to different accounting, auditing and recordkeeping requirements.

Political and Economic Risk. The Fund is subject to foreign political and economic risk not associated with U.S. investments, meaning that political events (civil unrest, national elections, changes in political conditions and foreign relations, imposition of exchange controls and repatriation restrictions), social and economic events (labor strikes, rising inflation) and natural disasters occurring in a country where the Fund invests could cause the Fund's investments in that country to experience gains or losses. The Fund also could be unable to enforce its ownership rights or pursue legal remedies in countries where it invests.

Reliance on Trading Partners Risk: The Fund invests in countries whose economies are heavily dependent upon trading with key partners. Any reduction in this trading may have an adverse impact on the Fund's investments. The Fund is specifically exposed to U.S. economic risk.

Market Trading Risk: An investment in the Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation/redemption process of the Fund. Any of these factors, among others, may lead to the Fund's shares trading at a premium or discount to NAV.

Trading Issues. Although Fund shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in shares is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13% and 20%). Additional rules applicable to the Exchange may halt trading in Fund shares when extraordinary volatility causes sudden, significant swings in the market price of Fund shares. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged or that the shares will trade with any volume, or at all. In stressed market conditions, the liquidity of the Fund's shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than the Fund's shares, potentially causing the market price of the Fund's shares to deviate from their NAV.

Further, secondary markets may be subject to erratic trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and Authorized Participants may step away from making a market in Fund shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV. Decisions by market makers or Authorized Participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Fund shares trading at a price which differs materially from NAV and also in greater than normal intraday bid/ask spreads for Fund shares. During a "flash crash," the market prices of the Fund's shares may decline suddenly and significantly.

Such a decline may not reflect the performance of the portfolio securities held by the Fund. Flash crashes may cause Authorized Participants and other market makers to limit or cease trading in the Fund's shares for temporary or longer periods. Shareholders could suffer significant losses to the extent that they sell shares at these temporarily low market prices.

Fluctuation of NAV. The NAV of Fund shares will generally fluctuate with changes in the market value of the Fund's securities holdings. The market prices of shares will generally fluctuate in accordance with changes in the Fund's NAV and supply and demand of shares on the Exchange. It cannot be predicted whether Fund shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the Index trading individually or in the aggregate at any point in time. The market prices of Fund shares may deviate significantly from the NAV of the shares during periods of market volatility. While the creation/redemption feature is designed to make it likely that Fund shares normally will trade close to the Fund's NAV, disruptions to creations and redemptions may result in trading prices that differ significantly from the Fund's NAV. As a result, investors in the Fund may pay significantly more or receive significantly less for Fund shares than the value of the Fund's underlying securities or the NAV of Fund shares. If an investor purchases Fund shares at a time when the market price is at a premium to the NAV of the shares or sells at a time when the market price is at a discount to the NAV of the shares, then the investor may sustain losses.

Costs of Buying or Selling Shares. Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for shares (the "bid" price) and the price at which an investor is willing to sell shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for shares based on trading volume and market liquidity, and is generally lower if the Fund's shares have more trading volume and market liquidity and higher if the Fund's shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling shares, including bid/ask spreads, frequent trading of shares may significantly reduce investment results and an investment in shares may not be advisable for investors who anticipate regularly making small investments.

Non-Diversification Risk: Because the Fund is "non-diversified," the Fund may invest a greater percentage of its assets in the securities of a single issuer or a small number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a small number of issuers could cause the Fund's overall value to decline to a greater degree than if the Fund held a more diversified portfolio. This may increase the Fund's volatility and have a greater impact on the Fund's performance.

Passive Investment Risk: The Fund is not actively managed. Therefore, unless a specific security is removed from the Fund's Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. If a specific security is removed from the Fund's Index, the Fund may be forced to sell such security at an inopportune time or for a price other than the security's current market value. An investment in the Fund involves risks similar to those of investing in any equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. It is anticipated that the value of Fund shares will decline, more or less, in correspondence with any decline in value of the Fund's Index. The Index may not contain the appropriate mix of securities for any particular economic cycle, and the timing of movements from one type of security to another in seeking to replicate the Index could have a negative effect on the Fund. Unlike with an actively managed fund, the Adviser does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, the Fund's performance could be lower than other types of funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline.

Risks of Investing in Israeli Companies: Investment in securities of Israeli companies involves risks that may negatively affect the value of your investment in the Fund, including risks that are specific to Israel, such as regulatory, legal, political, security and economic risks. Among other things, Israel's economy depends on imports of certain key items, such as crude oil, coal, grains, raw materials and military equipment. Reduction in spending on Israeli products and services or changes in any of these other economies may adversely impact the Fund. The government of Israel may change the way in which Israeli companies are taxed, or may impose taxes on foreign investment. Such actions could have a negative impact on the overall market for Israeli securities and on the Fund. Furthermore, Israel's economy is heavily dependent on trade relationships with key counterparties around the world, including the United States, China, Japan, Canada and European Union countries. Any reduction in these trade flows may have an adverse impact on the Fund's investments.

Israel has experienced a history of hostile relations with several countries in the Middle East region. Israel's relations with the Palestinian Authority and certain neighboring countries such as Lebanon, Syria and Iran, among others, have at times been strained due to territorial disputes, historical animosities or security concerns, which may cause uncertainty in the Israeli markets and adversely affect the overall economy. Israel and its citizens have also been the target of periodic acts of terrorism and state-sponsored aggression that have the

potential to disrupt economic activity in the country, and certain terrorist groups and nation-states are committed to violence against Israel. Current hostilities and the potential for future hostilities may diminish the value of companies whose principal operations or headquarters are located in Israel. Actual hostilities or the threat of future hostilities may cause significant volatility in the share prices of companies based in or having significant operations in Israel.

Due to political or civil unrest in Israel, the Israeli securities market may be closed for extended periods of time or trading on the Israeli securities market may be suspended altogether. In addition, the Israeli government may restrict or control to varying degrees the ability of foreign investors to invest in securities of issuers located or operating in Israel. These restrictions and/or controls may at times limit or prevent foreign investment in securities of issuers located or operating in Israel and may inhibit the Fund's ability to track the Israel Index.

Smaller Companies Risk: The Fund's Index may be composed primarily of, or have significant exposure to, securities of smaller companies. As a result, the Fund may be subject to the risk that securities of smaller companies represented in the Index may underperform securities of larger companies or the equity market as a whole. In addition, in comparison to securities of companies with larger capitalizations, securities of smaller-capitalization companies may experience more price volatility, greater spreads between their bid and ask prices, less frequent trading, significantly lower trading volumes, and cyclical or static growth prospects. As a result of the differences between the securities of smaller companies and those of companies with larger capitalizations, it may be more difficult for a Fund to buy or sell a significant amount of the securities of a smaller company without an adverse impact on the price of the company's securities, or a Fund may have to sell such securities in smaller quantities over a longer period of time, which may increase the Fund's tracking error. Smaller-capitalization companies often have limited product lines, markets or financial resources, and may therefore be more vulnerable to adverse developments than larger capitalization companies. These securities may or may not pay dividends.

Tax Risk: To qualify for the favorable tax treatment generally available to regulated investment companies, the Fund must satisfy certain diversification requirements under the Code. In particular, the Fund generally may not acquire a security if, as a result of the acquisition, more than 50% of the value of the Fund's assets would be invested in (a) issuers in which the Fund has, in each case, invested more than 5% of the Fund's assets and (b) issuers more than 10% of whose outstanding voting securities are owned by the Fund. When the Index is concentrated in a relatively small number of securities, it may not be possible for the Fund to fully implement a replication strategy or a representative sampling strategy while satisfying these diversification requirements. The Fund's efforts to satisfy the diversification requirements may cause the Fund's return to deviate from that of its Index, and the Fund's efforts to replicate the Index may cause it inadvertently to fail to satisfy the diversification requirements.

If the Fund were to fail to qualify as a regulated investment company, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. Distributions to the Fund's shareholders would generally be taxed as ordinary dividends. Under certain circumstances, the Fund may be able to cure a failure to qualify as a regulated investment company, but in order to do so the Fund may incur significant Fund-level taxes and may be forced to dispose of certain assets. Relief is provided for certain *de minimis* failures of the diversification requirements where the Fund corrects the failure within a specified period. If the Fund were to fail to qualify as a regulated investment company in any taxable year, the Fund would be required to pay out its earnings and profits accumulated in that year in order to qualify for treatment as a regulated investment company in a subsequent year. If the Fund failed to qualify as a regulated investment company for a period greater than two taxable years, the Fund would generally be required to pay a Fund-level tax on any net built-in gains with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a regulated investment company in a subsequent year.

Technology Companies Risk. Companies in the technology field, including companies in the computers, telecommunications and electronics industries, face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Technology companies may have limited product lines, markets, financial resources or personnel. The products of technology companies may face obsolescence due to rapid technological developments and frequent new product introduction, and such companies may face unpredictable changes in growth rates, competition for the services of qualified personnel and competition from foreign competitors with lower production costs. Companies in the technology sector are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights may adversely affect the profitability of these companies.

Tracking Error Risk: Tracking error refers to the risk that the Adviser may not be able to cause the Fund's performance to match or correlate to that of the Fund's Index, either on a daily or aggregate basis. There are a number of factors that may contribute to the Fund's tracking error, such as Fund expenses, imperfect correlation between the Fund's investments and those of its Index, rounding of share prices, changes to the composition of the Index, regulatory policies, and high portfolio turnover rate. In addition, mathematical compounding may prevent the Fund from correlating with the monthly, quarterly, annual or other period performance of its Index. In addition, in order to minimize the market impact of an Index rebalance, the Fund may begin trading to effect the rebalance in advance of the effective date of the rebalance and continue trading after the effective date of the rebalance. This may contribute to tracking error if the weights of the Fund's portfolio securities diverge from the weights of the securities in the Index during the rebalancing. Tracking error in such circumstances may be greater if the Fund is trading in securities that are less liquid or lightly traded. Tracking error may cause the Fund's performance to be less than expected.

Valuation Risk: The sales price that the Fund could receive for a security may differ from the Fund's valuation of the security and may differ from the value used by the Index, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. In addition, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.

Non-Principal Risks

Absence of an Active Market: Although the Fund's shares are approved for listing on the Exchange, there can be no assurance that an active trading market will develop and be maintained for Fund shares. There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Fund may experience greater tracking error to its Index than it otherwise would at higher asset levels or the Fund may ultimately liquidate.

Authorized Participants, Market Makers and Liquidity Providers Concentration Risk: The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"), none of which are obligated to engage in creation and/or redemption transactions. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, there may be a significantly diminished trading market for Fund shares and shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. The risks associated with limited APs may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

Limitations of Indicative Optimized Portfolio Value ("IOPV") Risk: The Exchange (or market data vendors or other information providers) will disseminate, every fifteen seconds during the regular trading day, an intraday value of the Fund's shares, also known as the IOPV. The IOPV calculations are estimates of the value of the Fund's NAV per share and are based on the Fund's portfolio holdings and cash, less accrued expenses, divided by the number of shares of the Fund outstanding as of the time of the prior day's NAV calculation. Premiums and discounts between the IOPV and the market price of the Fund's shares may occur. The IOPV does not necessarily reflect the precise composition of the current portfolio of securities held by the Fund at a particular point in time or the best possible valuation of the current portfolio. Therefore, it should not be viewed as a "real-time" update of the NAV per share of the Fund, which is calculated only once a day. The quotations of certain Fund holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States. Additionally, the calculation of the NAV may reflect the fair values of certain Fund holdings, which may result in different prices than those used in the calculations of the IOPV. This may result in market prices for Fund shares deviating from the value of the Fund's underlying securities. Neither the Fund nor the Adviser, nor any of their affiliates are involved in, or responsible for, the calculation or dissemination of the IOPV and make no warranty as to its accuracy.

Portfolio Holdings

Information about the Fund's daily portfolio holdings will be available at www.iteqetf.com. In addition, the Fund discloses its complete portfolio holdings as of the end of its fiscal year and its second fiscal quarter in its reports to shareholders. The Fund files its complete portfolio holdings as of the end of its first and third fiscal quarters with the SEC on Form N-Q no later than 60 days after the relevant fiscal period. You can find the SEC filings on the SEC's website, www.sec.gov. A summarized description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information ("SAI").

Fund Management

Adviser. ETF Managers Group LLC, the investment adviser to the Fund, is a Delaware limited liability company located at 30 Maple Street, 2nd Floor, Summit, New Jersey 07901. The Adviser provides investment advisory services to exchange-traded funds. The Adviser serves as investment adviser to the Fund with overall responsibility for the day-to-day portfolio management of the Fund, subject to the supervision of the Board. For its services, the Adviser receives, and did receive for the Fund's most recent fiscal year, a fee that is equal to 0.75% per annum of the average daily net assets of the Fund, calculated daily and paid monthly.

Under the Investment Advisory Agreement, the Adviser has overall responsibility for the general management and administration of the Fund and arranges for transfer agency, custody, fund administration, securities lending, and all other non-distribution related services necessary for the Fund to operate. Additionally, under the Investment Advisory Agreement, the Adviser has agreed to pay all expenses of the Fund, except for: the fee paid to the Adviser pursuant to the Investment Advisory Agreement, interest charges on any borrowings, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses (such as, among other things and subject to Board approval, certain proxy solicitation costs and non-standard Board-related expenses and litigation against the Board, Trustees, Funds, Adviser, and officers of the Adviser), and distribution (12b-1) fees and expenses (collectively, "Excluded Expenses").

A discussion regarding the basis for the Board's approval of the Investment Advisory Agreement is available in the Fund's Semi-Annual Report for the reporting period ended March 31, 2018.

Manager of Managers Structure. The Adviser and the Trust have received an exemptive order (the “Order”) from the SEC that permits the Adviser to enter into investment sub-advisory agreements with sub-advisers without obtaining shareholder approval. The Adviser, subject to the review and approval of the Board, may select one or more sub-advisers for the Fund and supervise, monitor and evaluate the performance of each sub-adviser.

The Order also permits the Adviser, subject to the approval of the Board, to replace sub-advisers and amend investment sub-advisory agreements, including fees, without shareholder approval whenever the Adviser and the Board believe such action will benefit the Fund and its shareholders. The Adviser thus has the ultimate responsibility (subject to the ultimate oversight of the Board) to recommend the hiring and replacement of sub-advisers as well as the discretion to terminate any sub-adviser and reallocate the Fund’s assets for management among any other sub-adviser(s) and itself. This means that the Adviser may be able to reduce the sub-advisory fees and retain a larger portion of the management fee, or increase the sub-advisory fees and retain a smaller portion of the management fee. The Adviser will compensate each sub-adviser out of its management fee. The Fund is required to provide shareholders with certain information regarding any new sub-adviser within 90 days of the hiring of any new sub-adviser. Such information generally includes the information that would have been provided to shareholders in the form of a proxy statement in the absence of the Order.

The Adviser’s reliance on such Order with respect to the Fund is contingent on the holders of a majority of the Fund’s outstanding voting securities approving the Fund’s use of a manager of managers structure and the Adviser’s reliance on such Order. Prior to the date of this Prospectus, shareholders of the Fund approved the use by the Fund of a manager of managers structure and the Adviser’s reliance on such Order.

The Index Provider

The BlueStar Israel Global Technology Index™ was developed by BlueStar Indexes®. BlueStar Indexes® is a leading company in the indexing business for institutional clients, and its indexes are focused on the Israeli capital markets. Neither BlueStar nor any of its affiliates are affiliated with the Fund, the Adviser, the Fund’s distributor, the Index Calculation Agent or any of their respective affiliates.

BlueStar has licensed the use of BIGITech™ to the Adviser, which has sub-licensed it to the Fund. Additionally, an affiliate of BlueStar has assumed the obligation of the Adviser to pay all expenses of the Fund, except Excluded Expenses, although the Adviser retains the ultimate obligation to the Fund to pay such expenses. BlueStar and its affiliates will also provide marketing support for the Fund, including distributing marketing materials related to the Fund. BlueStar nor its affiliates make investment decisions, provide investment advice, or otherwise act in the capacity of an investment adviser to the Fund, nor are they involved in the calculation of the Index.

Portfolio Managers

The Fund’s portfolio managers are primarily responsible for the day-to-day management of the Fund. The portfolio managers are responsible for various functions related to portfolio management, including, but not limited to, investing cash inflows, implementing investment strategy, researching and reviewing investment strategy.

The Fund is managed by Samuel R. Masucci, III, Chief Executive Officer of the Adviser, James B. Francis, CFA, Chief Investment Officer and Senior Portfolio Manager of the Adviser, and Devin Ryder, Portfolio Manager of the Adviser.

Samuel R. Masucci, III has more than 25 years’ experience in investment banking, structured product development, sales and trading. In the last 5 years, he founded ETF Managers Group (ETFMG) which has led to the launch of 14 funds and \$2 Billion in assets. Prior to ETFMG he has held senior positions at Bear Stearns, UBS, SBC Warburg, and Merrill Lynch and has experience in creating, building and managing businesses for the issuance, sales and trading of: ETFs, index products, commodity products, hedge funds, ABS, and OTC structured products in the U.S. and Europe.

James B. Francis, CFA, has more than 30 years of experience in portfolio management and related fields. Prior to joining the Adviser in 2018, Mr. Francis held senior portfolio management positions with Geode Capital Management (from 2011 to 2014), where he managed an equity portfolio management team that was responsible for managing approximately \$200 billion in assets, as well as with Deutsche Asset Management, Northern Trust Global Investments, and State Street Global Advisors. More recently, Mr. Francis was an independent consultant to a start-up investment firm, advising on product development and marketing strategies for ETFs from 2014 to 2016, and he was a senior account representative from 2016 to 2018 at Axioma, Incorporated, a risk management and portfolio construction software development firm. Mr. Francis is a Chartered Financial Analyst and he holds a B.S. in Applied Mathematics from University of Massachusetts.

Devin Ryder began her career with the Adviser during the summer of 2017 and re-joined the Adviser on a permanent basis in 2018 to be a part of the Adviser’s portfolio management team. Prior to joining the Adviser, Ms. Ryder was pursuing studies in the quantitative aspects of risk management and finance, for which she received a B.S. in Mathematics of Finance and Risk Management from the University of Michigan in 2017.

The SAI provides additional information about the Portfolio Managers' compensation, other accounts managed, and ownership of Fund shares.

Buying and Selling the Fund

Fund shares are listed for secondary trading on the Exchange. When you buy or sell the Fund's shares on the secondary market, you will pay or receive the market price. You may incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The shares will trade on the Exchange at prices that may differ to varying degrees from the daily NAV of the shares. The Exchange is generally open Monday through Friday and is closed weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

NAV per share for the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by its total number of shares outstanding. Expenses and fees, including management and distribution fees, if any, are accrued daily and taken into account for purposes of determining NAV. NAV is determined each business day, normally as of the close of regular trading of the New York Stock Exchange (ordinarily 4:00 p.m., Eastern time).

When determining NAV, the value of the Fund's portfolio securities is based on market prices of the securities, which generally means a valuation obtained from an exchange or other market (or based on a price quotation or other equivalent indication of the value supplied by an exchange or other market) or a valuation obtained from an independent pricing service. If a security's market price is not readily available or does not otherwise accurately reflect the fair value of the security, the security will be valued by another method that the Board believes will better reflect fair value in accordance with the Trust's valuation policies and procedures. Fair value pricing may be used in a variety of circumstances, including, but not limited to, situations when the value of a security in the Fund's portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded but prior to the close of the Exchange (such as in the case of a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. Accordingly, the Fund's NAV may reflect certain portfolio securities' fair values rather than their market prices.

Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security will materially differ from the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund's NAV and the prices used by the Fund's Index. This may result in a difference between the Fund's performance and the performance of the Fund's Index.

The Fund invests in non-U.S. securities. Non-U.S. securities held by the Fund may trade on weekends or other days when the Fund does not price its shares. As a result, the Fund's NAV may change on days when Authorized Participants will not be able to purchase or redeem Fund shares.

Frequent Purchases and Redemptions of Fund Shares

Unlike frequent trading of shares of a traditional open-end mutual fund's (*i.e.*, not exchange-traded) shares, frequent trading of shares of the Fund on the secondary market does not disrupt portfolio management, increase the Fund's trading costs, lead to realization of capitalization gains, or otherwise harm the Fund's shareholders because these trades do not involve the Fund directly. Certain institutional investors are authorized to purchase and redeem the Fund's shares directly with the Fund. Because these trades are effected in-kind (*i.e.*, for securities, and not for cash), they do not cause any of the harmful effects noted above that may result from frequent cash trades. Moreover, the Fund imposes transaction fees on in-kind purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting in-kind trades. These fees increase if an investor substitutes cash in part or in whole for Creation Units, reflecting the fact that the Fund's trading costs increase in those circumstances. For these reasons, the Board has determined that it is not necessary to adopt policies and procedures to detect and deter frequent trading and market-timing in shares of the Fund.

Dividends, Distributions, and Taxes

Fund Distributions

The Fund intends to pay out dividends, if any, quarterly and distribute any net realized capital gains to its shareholders at least annually.

Dividend Reinvestment Service

Brokers may make available to their customers who own the Fund's shares the DTC book-entry dividend reinvestment service. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole shares of the Fund. Without this service, investors would receive their distributions in cash. In order to achieve the maximum total return on their investments, investors are encouraged to use the dividend reinvestment service. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require the Fund's shareholders to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund purchased in the secondary market.

Tax Information

The following is a summary of some important tax issues that affect the Fund and its shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a detailed explanation of the tax treatment of the Fund, or the tax consequences of an investment in the Fund. The summary is very general, and does not address investors subject to special rules, such as investors who hold shares through an IRA, 401(k) or other tax-deferred account. More information about taxes is located in the SAI. You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.

Tax Status of the Fund

The Fund is treated as a separate entity for federal tax purposes, and intends to qualify for the special tax treatment afforded to regulated investment companies under the Code. As long as the Fund qualifies as a regulated investment company, it pays no federal income tax on the earnings it distributes to shareholders.

Tax Status of Distributions

- The Fund will, for each year, distribute substantially all of its net investment income and net capital gains.
- The Fund's distributions from income will generally be taxed to you as ordinary income or qualified dividend income. For non-corporate shareholders, dividends reported by the Fund as qualified dividend income are generally eligible for reduced tax rates.
- Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. The Fund's strategies may limit its ability to distribute dividends eligible for the dividends-received deduction for corporate shareholders.
- Any distributions of net capital gain (the excess of the Fund's net long-term capital gains over its net short-term capital losses) that you receive from the Fund are taxable as long-term capital gains regardless of how long you have owned your shares. Long-term capital gains are currently taxed to non-corporate shareholders at reduced maximum rates.
- Dividends and distributions are generally taxable to you whether you receive them in cash or in additional shares through a broker's dividend reinvestment service. If you receive dividends or distributions in the form of additional shares through a broker's dividend reinvestment service, you will be required to pay applicable federal, state or local taxes on the reinvested dividends but you will not receive a corresponding cash distribution with which to pay any applicable tax.
- The Fund may be able to pass through to you foreign tax credits for certain taxes paid by the Fund, provided the Fund meets certain requirements.
- Distributions paid in January but declared by the Fund in October, November or December of the previous year may be taxable to you in the previous year.
- The Fund will inform you of the amount of your ordinary income dividends, qualified dividend income, foreign tax credits and net capital gain distributions received from the Fund shortly after the close of each calendar year.

Taxes on Exchange-Listed Share Sales. Any capital gain or loss realized upon a sale of shares will generally be treated as long-term capital gain or loss if the shares have been held for more than one year and as short-term capital gain or loss if the shares have been held for one year or less, except that any capital loss on the sale of shares held for six months or less will be treated as long-term capital loss to the extent of amounts treated as distributions of long-term capital gains to the shareholder with respect to such shares.

Investment in Foreign Securities. The Fund may be subject to foreign withholding taxes on income it may earn from investing in foreign securities, which may reduce the return on such investments. In addition, the Fund's investments in foreign securities or foreign currencies may increase or accelerate the Fund's recognition of ordinary income and may affect the timing or amount of its distributions. The Fund may be eligible to file an election that would permit shareholders who are U.S. citizens, resident aliens or U.S. corporations to claim a foreign tax credit or deduction (but not both) on their U.S. income tax returns for their pro rata portions of qualified taxes paid by the Fund to foreign countries in respect of foreign securities held for at least the minimum period specified in the Code. For the purposes of the foreign tax credit, each such shareholder would include in gross income from foreign sources its pro rata share of such taxes. Certain limitations imposed by the Code may prevent shareholders from receiving a full foreign tax credit or deduction for their allocable amount of such taxes.

Medicare Tax. U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% Medicare contribution tax on their "net investment income," including interest, dividends, and capital gains (including capital gains realized on the sale or exchange of shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Non-U.S. Investors. If you are not a citizen or permanent resident of the United States, the Fund's ordinary income dividends will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or business. This 30% withholding tax generally will not apply to distributions of net capital gain.

Distributions paid after June 30, 2014 and sale proceeds and certain capital gain dividends paid after December 31, 2016 to a shareholder that is a "foreign financial institution" as defined in Section 1471 of the Code and that does not meet the requirements imposed on foreign financial institutions by Section 1471 will generally be subject to withholding tax at a 30% rate. Distributions paid after June 30, 2014 and sale proceeds and certain capital gain dividends paid after December 31, 2018 to a non-U.S. shareholder that is not a foreign financial institution will generally be subject to such withholding tax if the shareholder fails to make certain required certifications. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement.

Backup Withholding. The Fund or your broker will be required in certain cases to withhold (as "backup withholding") on amounts payable to any shareholder who (1) has provided either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the Internal Revenue Service for failure to properly report payments of interest or dividends, (3) has failed to certify that such shareholder is not subject to backup withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien). The backup withholding rate is currently 24%. Backup withholding will not, however, be applied to payments that have been subject to the 30% withholding tax applicable to shareholders who are neither citizens nor residents of the United States.

Distribution

The Distributor, ETFMG Financial LLC, is a broker-dealer registered with the U.S. Securities and Exchange Commission and an affiliate of the Adviser. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Fund shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor's principal address is 30 Maple Street, 2nd Floor, Summit, New Jersey 07901.

The Board has adopted a Distribution and Service Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of the Fund's assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

Fund Service Providers

Sullivan & Worcester LLP, 1666 K Street NW, Washington, D.C. 20006, serves as legal counsel to the Fund.

WithumSmith + Brown, PC, with offices located at 1411 Broadway, 9th Floor, New York, New York, 10018, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

Index/Trademark Licenses/Disclaimers

WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL BLUESTAR OR ITS AFFILIATES HAVE ANY LIABILITY FOR ANY LOST PROFITS OR INDIRECT, PUNITIVE, SPECIAL OR CONSEQUENTIAL DAMAGES OR LOSSES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Premium/Discount Information

Information regarding the number of days the Fund's market price was a price above (i.e., at a premium) or below (i.e., at a discount) its NAV for the most recently completed calendar year and the most recently completed calendar quarters since that year, are provided, free of charge, on the Fund's website at www.iteqtf.com.

Financial Highlights

The financial highlights table is intended to help you understand the Fund's financial performance for the period of the Fund's operations. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have gained (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the financial statements audited by WithumSmith+Brown, PC, an independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's Annual Report dated September 30, 2018, which is available upon request.

For a capital share outstanding throughout the year/period

	<u>Year Ended September 30, 2018</u>	<u>Year Ended September 30, 2017</u>	<u>Period Ended September 30, 2016¹</u>
Net Asset Value, Beginning of Year/Period	\$ <u>31.38</u>	\$ <u>25.58</u>	\$ <u>25.00</u>
Income from Investment Operations:			
Net investment income ²	0.04	0.02	0.05
Net realized and unrealized gain on investments	<u>4.78</u>	<u>5.87</u>	<u>0.53</u>
Total from investment operations	<u>4.82</u>	<u>5.89</u>	<u>0.58</u>
Less Distributions:			
Distributions from net investment income	(0.17)	<u>(0.09)</u>	<u>—</u>
Net asset value, end of year/period	\$ <u>36.03</u>	\$ <u>31.38</u>	\$ <u>25.58</u>
Total Return	15.41 %	23.16 %	2.31 % ³
Ratios/Supplemental Data:			
Net assets at end of year/period (000's)	\$ 61,243	\$ 23,538	\$ 5,116
Expenses to Average Net Assets	0.75 %	0.75 %	0.75 % ⁴
Net Investment Income to Average Net Assets	0.12 %	0.07 %	0.23 % ⁴
Portfolio Turnover Rate	11 %	19 %	14 % ³

¹ Commencement of operations on November 2, 2015.

² Calculated based on average shares outstanding during the year/period.

³ Not annualized.

⁴ Annualized.
