About the Fund

The Etho Climate Leadership US ETF (ETHO®) is the first diversified index ETF that avoids fossil fuel companies while selecting equities based primarily on full-Scope 1-3 carbon footprint and overall ESG alignment. The ETHO® ETF seeks to provide investment results that, before fees and expenses, correspond generally to the price and yield performance of the Etho Climate Leadership Index®, a broad-based index of publicly traded U.S. companies that are more climate efficient and with better ESG performance than their peers.

Investment Strategy

To build ETHO®, Etho Capital's team uses a positive selection methodology to review more than 10,000 commonly traded public companies to identify the most climate-efficient leaders across industries. Using proprietary climate performance data that includes both supply chain and direct impacts, Etho Capital ranks each public company by climate emissions per dollar invested selecting the equities that are substantially more climate-efficient than their industry average for inclusion into the ETHO® Index. All fossil fuel, tobacco, weapons, and gambling companies are eliminated from the index. Additionally, the Etho Capital team conducts qualitative research to understand the material environmental, social, and governance (ESG) performance of each company to reduce additional ESG risks. Finally, Etho Capital consults with experts from industry, academia and NGO partners on relevant corporate ESG issues as a final check against ESG risks. Investing involves risk, including the possible loss of principal. Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Narrowly focused investments typically exhibit higher volatility. The Fund's return may not match or achieve a high degree of correlation with the return of the Etho Climate Leadership Index – US®. To the extent the Fund utilizes a sampling approach, it may experience tracking error to a greater extent than if the Fund had sought to replicate the Index.
