## BlueStar Israel Technology ETF

as of 9/30/22

ITEQ<sup>®</sup> tracks the BlueStar Israel Global Technology Index™ (“BIGITech<sup>®</sup>”), a flagship benchmark for Israeli technology stocks, which encompasses Israeli companies listed on exchanges throughout the world.

The first ETF to comprehensively target innovative companies in the Israeli tech industry.

Israel is, as Warren Buffett says, “the leading, largest and most promising investment hub outside the United States.”<sup>6</sup>

ITEQ<sup>®</sup> provides exposure to the technology themes of tomorrow (including cyber security, autonomous driving, artificial intelligence, CleanTech, DefenseTech and 3D printing).

A diversified way to add Israeli companies to a global technology allocation.

## About the Fund

The BlueStar Israel Technology ETF (ITEQ<sup>®</sup>) is the first exchange-traded fund (ETF) created to provide investors with diversified exposure to the dynamic Israeli technology sector. Although only a handful of Israeli technology companies are household names, collectively the Israeli technology sector is a major innovator, developer and supplier within the global technology ecosystem. These companies are at the forefront of most technologically disruptive industries, including cyber security, big data hardware and analytics, autonomous driver assistance and safety, clean energy, biotechnology and medical devices. ITEQ<sup>®</sup> allows investors to tap into the Israeli technology investment opportunity, which includes Israeli companies listed worldwide and active in a broad range of well-established, emerging and disruptive technology sectors.

ITEQ<sup>®</sup> seeks to provide investment results that, before fees and expenses, correspond generally to the price and yield performance of the BlueStar Israel Global Technology Index™ (BIGITech<sup>®</sup>), an index of Israeli technology companies listed on the Tel Aviv, Nasdaq, NYSE, Hong Kong, London, Australian and Singapore Exchanges.

## About the Index

The BlueStar Israel Global Technology Index (BIGITech<sup>®</sup>) (the "Index") is the broadest benchmark of the Israeli Global Technology sector. The Index considers all Israeli companies regardless of listing venue and allows for the inclusion of companies operating in a range of industries from information technology to biotechnology to clean and sustainable agriculture and energy technology.

BIGITech<sup>®</sup> was developed by BlueStar Indexes<sup>®</sup>, and is now administered and maintained by MarketVector Indexes GmbH ("MarketVector").<sup>4</sup> The Index is calculated by Standard and Poor's. The Index is rebalanced twice a year in June and December. An investment cannot be made directly in an Index.

Investing involves risk, including the possible loss of principal. Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Narrowly focused investments typically exhibit higher volatility. Investment in securities of Israeli companies involves risks that may negatively affect the value of your investment in the Fund. Among other things, Israel's economy depends on imports of certain key items, such as crude oil, coal, grains, raw materials and military equipment. Foreign investing involves special risks such as currency fluctuations and political uncertainty. Funds that invest in smaller companies may experience greater volatility. Funds that emphasize investments in technology generally will experience greater price volatility. The Fund's return may not match or achieve a high degree of correlation with the return of the BIGITech<sup>®</sup> Index. To the extent the Fund utilizes a sampling approach, it may experience tracking error to a greater extent than if the Fund had sought to replicate the Index. Diversification does not guarantee a profit, nor does it protect against a loss in a declining market.

ETF Managers Group LLC is the investment adviser to the Fund.
