

**Supplement to the
Prospectus**
dated June 24, 2019, as previously supplemented, of the
ETFMG Sit Ultra Short ETF
(VALT)
January 22, 2020

Effective immediately, the first paragraph under "**Dividends, Distributions and Taxes**" is revised to read as follows:

Fund Distributions

The Fund intends to pay out dividends, if any, monthly and distribute any net realized capital gains to its shareholders annually.

Please retain this Supplement with your Prospectus.

ETFMG Sit Ultra Short ETF

(VALT)

Listed on NYSE Arca, Inc.

The Fund is a series of ETF Managers Trust

PROSPECTUS

June 24, 2019

Fund shares are not individually redeemable by the Fund but trade on the NYSE Arca, Inc. in individual share lots.

Beginning on January 1, 2021, as permitted by regulations adopted by the SEC, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the Fund's reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to elect to receive shareholder reports and other Fund communications electronically.

You may elect to receive all future Fund reports in paper free of charge. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of Fund shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

THE SEC HAS NOT APPROVED OR DISAPPROVED THESE SECURITIES OR PASSED UPON THE ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

The Fund offered through this Prospectus is not a money market fund and does not seek to maintain a fixed or stable NAV of \$1.00 per share.

About This Prospectus

This prospectus has been arranged into different sections so that you can easily review this important information. For detailed information about the Fund, please see:

ETFMG Sit Ultra Short ETF - Fund Summary

Investment Objective

The ETFMG Sit Ultra Short ETF (the “Fund”) seeks maximum current income to the extent consistent with preserving capital and maintaining liquidity.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average daily net assets. This table and the Example below do not include the brokerage commissions that investors may pay on their purchases and sales of Fund shares.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

| | |
|---------------------------------------|--------------|
| Management Fee | 0.30% |
| Distribution and Service (12b-1) Fees | None |
| Other Expenses* | 0.00% |
| Acquired Fund Fees and Expenses* | 0.00% |
| Total Annual Fund Operating Expenses | <u>0.30%</u> |

* Based on estimated amounts for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This Example does not include the brokerage commissions that investors may pay on their purchases and sales of Fund shares. Although your actual costs may be higher or lower, based on these assumptions your cost would be:

| | |
|---------------|----------------|
| 1 Year | 3 Years |
| \$31 | \$97 |

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies

The Fund is an actively managed exchange-traded fund (“ETF”) that seeks to achieve its investment objective by investing in a diversified portfolio of high-quality short-term U.S. dollar denominated domestic and foreign debt securities and other instruments.

The Fund will, under normal circumstances, invest primarily in fixed-income securities. These include:

- Commercial paper of domestic and foreign banks and corporations;
- Obligations of domestic and foreign banks and corporations, including both fixed rate and floating rate securities;
- Obligations of the U.S. government or its agencies, instrumentalities or sponsored enterprises;
- Mortgage and other asset-backed securities including automobile and credit card receivables, utilities, equipment trust certificates, railway authorities, single-family rentals, manufactured home loans, home improvement loans, and home equity loans; and
- Repurchase agreements relating to the above instruments.

The Fund invests in investment grade domestic debt obligations (i.e., obligations rated within the top four rating categories by a Nationally Recognized Statistical Rating Organization (“NRSRO”) or of comparable quality as determined by the Fund’s Sub-Adviser (as defined below)).

The Fund is not a money market fund, does not seek to maintain a fixed or stable net asset value of \$1, is not subject to the rules that govern the quality, maturity, liquidity, and other features of securities that money market funds may purchase, and does not have the tax advantages of a money market fund.

Sit Fixed Income Advisors II, LLC (“Sit Investment” or the “Sub-Adviser”) may invest in debt obligations of maturities with a dollar weighted average maturity of no more than 3 years and may invest in debt obligations with a maximum maturity of 4 years. During normal market circumstances the average portfolio effective duration for the Fund is expected to be more than 2 months, but less than 1 year. The Sub-Adviser attempts to diversify the Fund’s portfolio by holding debt obligations of many different issuers and choosing issuers in a variety of sectors. The Fund is a “diversified” fund, which means that it may not, with respect to 75% of its total assets, invest more than 5% of its total assets in the securities of a single issuer (other than cash and cash items, U.S. government securities or securities of other investment companies) or purchase more than 10% of the outstanding voting securities of an issuer.

In determining which debt obligations to buy for the Fund, the Sub-Adviser attempts to achieve the Fund’s investment objective primarily in three ways:

- *Yield curve positioning:* The Sub-Adviser selects debt obligations with maturities and yields that it believes have the greatest potential for achieving the Fund’s objectives.
- *Sector allocation:* The Sub-Adviser invests in debt obligations in those sectors which it believes represent the greatest potential for achieving the Fund’s objectives.
- *Security selection:* The Sub-Adviser determines which issuers it believes offer the best relative value within each sector and then decides which available debt obligations of that issuer to purchase.

The Fund may also invest in shares of stable value money market funds and ETFs that principally invest in the same types of securities in which the Fund may invest directly.

The Fund is actively-managed and does not seek to track the performance of any particular index.

Principal Risks

As with all funds, a shareholder is subject to the risk that his or her investment could lose money. The principal risks affecting shareholders’ investments in the Fund are set forth below. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.

Absence of a Prior Active Market: Although the Fund’s shares are approved for listing on the Exchange, there can be

no assurance that an active trading market will be maintained for Fund shares. There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Fund may experience greater tracking error to its Index than it otherwise would at higher asset levels or the Fund may ultimately liquidate.

Authorized Participants, Market Makers and Liquidity Providers Concentration Risk: The Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”), none of which are obligated to engage in creation and/or redemption transactions. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, there may be a significantly diminished trading market for Fund shares and shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. The risks associated with limited APs may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

Cash Redemption Risk. The Fund’s investment strategy may require it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

Call Risk. Many bonds may be redeemed (“called”) at the option of the issuer before their stated maturity date. In general, an issuer will call its bonds if they can be refinanced by issuing new bonds which bear a lower interest rate. The Fund would then be forced to invest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund’s income.

Collateralized Mortgage Obligation Risk. The Fund may invest in collateralized mortgage obligations (“CMOs”), which are a type of mortgage-backed security. CMOs are created by dividing the principal and interest payments collected on a pool of mortgages into several revenue streams (tranches) with different priority rights to portions of the underlying mortgage payments.

Credit Risk. Debt issuers and other counterparties may not honor their obligations or may have their debt downgraded by ratings agencies.

ETF Risks.

Authorized Participants (“APs”), Market Makers, and Liquidity Providers Concentration Risk. The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to net asset value (“NAV”) and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

Costs of Buying or Selling Shares. Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price at which an investor is willing to buy Shares (the “bid” price) and the price at which an investor is willing to sell Shares (the “ask” price). This difference in bid and ask prices is often referred to as the “spread” or “bid/ask spread.” The bid/ask spread varies over time for Shares based on trading volume and market liquidity and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Shares, including bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

Fluctuation of NAV. The NAV of Fund shares will generally fluctuate with changes in the market value of the Fund's securities holdings. The market prices of shares will generally fluctuate in accordance with changes in the Fund's NAV and supply and demand of shares on the Exchange. It cannot be predicted whether Fund shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the Fund trading individually or in the aggregate at any point in time. The market prices of Fund shares may deviate significantly from the NAV of the shares during periods of market volatility. However, given that shares can be created and redeemed in Creation Units (unlike shares of many closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAV), the Sub-Adviser believes that large discounts or premiums to the NAV of shares should not be sustained. While the creation/redemption feature is designed to make it likely that Fund shares normally will trade close to the Fund's NAV, disruptions to creations and redemptions may result in trading prices that differ significantly from the Fund's NAV. If an investor purchases Fund shares at a time when the market price is at a premium to the NAV of the shares or sells at a time when the market price is at a discount to the NAV of the shares, then the investor may sustain losses.

Trading. Although Shares are listed for trading on the NYSE Arca, Inc. (the "Exchange") and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares. Further, secondary markets may be subject to erratic trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and Authorized Participants may step away from making a market in Fund shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV. Decisions by market makers or Authorized Participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Fund shares trading at a price which differs materially from NAV and also in greater than normal intraday bid/ask spreads for Fund shares. During a "flash crash," the market prices of the Fund's shares may decline suddenly and significantly. Such a decline may not reflect the performance of the portfolio securities held by the Fund. Flash crashes may cause Authorized Participants and other market makers to limit or cease trading in the Fund's shares for temporary or longer periods. Shareholders could suffer significant losses to the extent that they sell shares at these temporarily low market prices.

Extension Risk. When interest rates rise, certain obligations may be paid off by the obligor more slowly than anticipated, causing the value of these securities to fall.

Fixed-Income Instruments Risks: The market price of the Fund's fixed-income instruments may change, sometimes rapidly or unpredictably, in response to changes in interest rates, factors affecting securities markets generally, and other factors. Generally, when interest rates rise, the values of fixed-income instruments fall, and vice versa. The obligor of a fixed-income instrument may not be able or willing to pay interest or to repay principal when due in accordance with the terms of the associated agreement. Fixed-income instruments may also be subject to call risk, which is the risk that an issuer may exercise its right to redeem a fixed-income security earlier than expected (a call).

Issuers may call outstanding securities prior to their maturity for a number of reasons (e.g., declining interest rates, changes in credit spreads, and improvements in the issuer's credit quality). If an issuer calls a security that the Fund has invested in, the Fund may not recoup the full amount of its initial investment and may be forced to reinvest in lower-yielding securities, securities with greater credit risks, or securities with other, less favorable features.

Floating or Variable Rate Securities Risk: Floating or variable rate securities pay interest at rates that adjust in response to changes in a specified interest rate or reset at predetermined dates (such as the end of a calendar quarter). Securities with floating or variable interest rates are generally less sensitive to interest rate changes than securities with fixed interest rates but may decline in value if their interest rates do not rise as much, or as quickly, as comparable market interest rates. Although floating or variable rate securities are generally less sensitive to interest rate risk than fixed rate securities, they are subject to credit, liquidity and default risk and may be subject to legal or contractual restrictions on resale, which could impair their value.

Foreign Securities Risk: The Fund may invest in U.S. dollar-denominated debt obligations of foreign issuers. Foreign debt obligations are generally determined based on the ultimate parent country of risk which consists of the following four factors: management location, country of primary listing, country of revenue and reporting currency of the issuer. Debt obligations issued by a foreign entity that are subject to a guarantee of a U.S. corporate parent or other U.S. entity are generally not regarded as foreign securities.

Illiquid Securities Risks: The Fund may invest up to 15% of its net assets in illiquid securities. Illiquid securities may be difficult to dispose of at a fair price at the times when the Fund believes it is desirable to do so. Investment of the Fund's assets in illiquid securities may restrict the Fund's ability to take advantage of market opportunities. Additionally, the Fund may have to forego all or a portion of the interest earned on a security. Liquidity risk may impact the Fund's ability to meet shareholder redemptions and as a result, the Fund may be forced to sell securities at inopportune prices.

Large Shareholder Transactions Risk: Shares of the Fund are offered to certain other investment companies, large retirement plans and other large investors. As a result, the Fund is subject to the risk that those shareholders may purchase or redeem a large amount of shares of the Fund. To satisfy such large shareholder redemptions, the Fund may have to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. In addition, large purchases of Fund shares could adversely affect the Fund's performance to the extent that the Fund does not immediately invest cash it receives and therefore holds more cash than it ordinarily would. Large shareholder activity could also generate increased transaction costs and cause adverse tax consequences.

Limitations of Indicative Optimized Portfolio Value ("IOPV") Risk: The Exchange (or market data vendors or other information providers) will disseminate, every fifteen seconds during the regular trading day, an intraday value of the Fund's shares, also known as the IOPV. The IOPV calculations are estimates of the value of the Fund's NAV per share and are based on the Fund's portfolio holdings and cash, less accrued expenses, divided by the number of shares of the Fund outstanding as of the time of the prior day's NAV calculation. Premiums and discounts between the IOPV and the market price of the Fund's shares may occur. The IOPV does not necessarily reflect the precise composition of the current portfolio of securities held by the Fund at a particular point in time or the best possible valuation of the current portfolio. Therefore, it should not be viewed as a "real-time" update of the NAV per share of the Fund, which is calculated only once a day. The quotations of certain Fund holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States. Additionally, the calculation of the NAV may reflect the fair values of certain Fund holdings, which may result in different prices than those used in the calculations of the IOPV. This may result in market prices for Fund shares deviating from the value of the Fund's underlying securities. Neither the Fund, the Adviser, the Sub-Adviser, nor any of their affiliates are involved in, or responsible for, the calculation or dissemination of the IOPV and make no warranty as to its accuracy.

Management Risk: The Fund may not meet its investment objective based on the success or failure of the Fund's investment adviser ("ETF Managers Group LLC" or the "Adviser") or Sub-Adviser to implement investment strategies for the Fund.

Mortgage- and Asset-Backed Securities Risk. The Fund may invest in U.S. government agency mortgage- and asset-backed securities. Mortgage- and asset-backed securities are subject to interest rate risk. Modest movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain types of these

securities. When interest rates fall, mortgage- and asset-backed securities may be subject to prepayment risk. When interest rates rise, certain types of mortgage- and asset-backed securities are subject to extension risk. Mortgage- and asset-backed

securities can also be subject to the risk of default on the underlying residential or commercial mortgage(s) or other assets.

Municipal Securities Risk: From time to time the Fund may invest a substantial amount of its assets in taxable or tax-exempt municipal securities whose interest is paid solely from revenues of similar projects. If the Fund concentrates its investments in this manner, it assumes the economic risks relating to such projects and this may have a significant impact on the Fund's investment performance. Municipal securities risks include the ability of the issuer to repay the obligation, the relative lack of information about certain issuers of municipal securities, and the possibility of future legislative changes which could affect the market for and value of municipal securities. Certain municipal securities, including private activity bonds, are not backed by the full faith, credit and taxing power of the issuer. Additionally, if events occur after the security is acquired that impact the security's tax-exempt status, the Fund and its shareholders could be subject to substantial tax liabilities.

New Fund Risk. The Fund is a recently organized, diversified management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Other Investment Companies Risk: The Fund will incur higher and duplicative expenses when it invests in other investment companies. There is also the risk that the Fund may suffer losses due to the investment practices of the underlying funds. When the Fund invests in other investment companies, the Fund will be subject to substantially the same risks as those associated with the direct ownership of securities held by such investment companies.

Portfolio Turnover Risk: The Fund may buy and sell investments frequently. Such a strategy often involves higher expenses, including brokerage commissions, and may increase the amount of capital gains (in particular, short-term capital gains taxable to shareholders at ordinary income rates) realized by the Fund.

Prepayment Risk. When interest rates decline, fixed income securities with stated interest rates may have the principal paid earlier than expected, requiring the Fund to invest the proceeds at generally lower interest rates.

Rating Agencies Risks: Rating agencies may fail to make timely changes in credit ratings and an issuer's current financial condition may be better or worse than a rating indicates. In addition, rating agencies are subject to an inherent conflict of interest because they are often compensated by the same issuers whose securities they grade.

Reinvestment Risk. Income from the Fund's debt securities portfolios will decline if and when the Fund invest the proceeds from matured, traded or called securities in securities with market interest rates that are below the current earnings rate of the Fund's portfolio.

Repurchase Agreement Risks: Repurchase agreements typically involve the acquisition by the Fund of fixed-income securities from a selling financial institution such as a bank or broker-dealer. The Fund may incur a loss if the other party to a repurchase agreement is unwilling or unable to fulfill its contractual obligations to repurchase the underlying security.

Reverse Repurchase Agreement Risks: A reverse repurchase agreement is the sale by the Fund of a debt obligation to a party for a specified price, with the simultaneous agreement by the Fund to repurchase that debt obligation from that party on a future date at a higher price. Similar to borrowing, reverse repurchase agreements provide the Fund with cash for investment purposes, which creates leverage and subjects the Fund to the risks of leverage. Reverse repurchase agreements also involve the risk that the other party may fail to return the securities in a timely manner or at all. The Fund could lose money if it is unable to recover the securities and/or if the value of collateral held by the Fund, including the value of the investments made with cash collateral, is less than the value of securities.

Rule 144A Securities Risk. Rule 144A securities are restricted securities that can be purchased only by "qualified institutional buyers," as defined under the Securities Act. The market for Rule 144A securities typically is less active

than the market for publicly-traded securities. As such, investing in Rule 144A securities may reduce the liquidity of the Fund's investments, and the Fund may be unable to sell the security at the desired time or price, if at all. The

purchase price and subsequent valuation of Rule 144A securities normally reflect a discount, which may be significant, from the market price of comparable unrestricted securities for which a liquid trading market exists. A restricted security that was liquid at the time of purchase may subsequently become illiquid and its value may decline as a result. In addition, transaction costs may be higher for restricted securities than for more liquid securities. The Fund may also have to bear the expense of registering the securities for resale and the risk of substantial delays in effecting the registration.

Temporary Investment Risk. The Fund may hold cash and/or invest all or a portion of its assets in short-term obligations in response to adverse market, economic or other conditions when the investment management team believes that it is in the best interest of the Fund to pursue such a defensive strategy. The investment management team may, however, choose not to make such temporary investments even in very volatile or adverse conditions. The Fund may not achieve its investment objective when it holds cash or invests its assets in short-term obligations. The Fund also may miss investment opportunities and have a lower total return during these periods.

To-be-announced transactions (“TBAs”) Securities and Rolls Risk. TBA transactions are subject to increased credit risk and increased overall investment exposure. TBA rolls involve the risk that the Fund’s counterparty will be unable to deliver the mortgage-backed securities underlying the TBA roll at the fixed time. If the buyer files for bankruptcy or becomes insolvent, the buyer or its representative may ask for and receive an extension of time to decide whether to enforce the Fund’s repurchase obligation. In addition, the Fund earns interest by investing the transaction proceeds during the roll period. TBA roll transactions may have the effect of creating leverage in the Fund’s portfolio.

U.S. Government Securities Risk: U.S. government securities are not guaranteed against price movement and may decrease in value. Some obligations issued or guaranteed by U.S. government agencies and instrumentalities are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies are supported by the right of the issuer to borrow from the U.S. Treasury. While the U.S. government provides financial support to such U.S. government agencies, no assurance can be given that the U.S. government will always do so because the U.S. government is not so obligated by law.

Valuation Risk. The Fund may hold securities for which prices from pricing services may be unavailable or are deemed unreliable, in which case the Fund’s procedures for valuing investments provide that the sub-adviser shall use the fair value of such securities for valuing investments. There is a risk that the fair value determined by the sub-adviser or the price determined by the pricing service may be different than the actual sale prices of such securities.

Performance Information

The Fund is new and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's returns and comparing the Fund's performance to a broad measure of market performance.

Investment Adviser and Sub-Adviser

ETF Managers Group LLC serves as the investment adviser to the Fund.
Sit Fixed Income Advisors II, LLC serves as the sub-adviser to the Fund.

The Adviser has retained the Sub-Adviser to be responsible for the day-to-day management of the Fund, subject to the supervision of the Adviser and the Board.

Portfolio Managers

Bryce A. Doty, Mark H. Book, CFA, CMA, and Christopher M. Rasmussen, CFA have been the Fund's portfolio managers since its inception in 2019.

Purchase and Sale of Fund Shares

Individual shares may only be purchased and sold on a national securities exchange through a broker-dealer. You can purchase and sell individual shares of the Fund throughout the trading day like any publicly traded security. The Fund's shares are listed on the Exchange. The price of the Fund's shares is based on market price, and because exchange-traded fund shares trade at market prices rather than net NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). The Fund issues and redeems shares on a continuous basis, at NAV, only in blocks of 25,000 shares ("Creation Units"), principally in-kind for securities included in the Fund's portfolio and/or a designated amount of cash, and only Authorized Participants (typically, broker-dealers) may purchase or redeem Creation Units. **Except when aggregated in Creation Units, the Fund's shares are not redeemable securities.**

Tax Information

The distributions made by the Fund are taxable, and will be taxed as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to federal income tax. You should consult your tax adviser about your specific tax situation.

Financial Intermediary Compensation

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Adviser, Sub-Adviser, or their affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

Additional Information about the Fund's Investment Objective

The Fund's investment objective has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon 60 days' written notice to shareholders.

Additional Information about the Fund's Principal Investment Strategies

To achieve the Fund's investment objective, the Sub-Adviser may invest in debt obligations of maturities with a dollar weighted average maturity of no more than 3 years and may invest in debt obligations with a maximum maturity of 4 years. During normal market circumstances the average portfolio effective duration for the Fund is expected to be more than 2 months, but less than 1 year. The Sub-Adviser considers effective duration to be a more accurate assessment of interest rate risk.

The stated maturity of a bond is the date when the issuer must repay the bond's entire principal value to an investor. Some types of bonds may also have an "effective maturity" that is shorter than the stated maturity due to prepayment or call provisions. Debt obligations without prepayment or call provisions generally have an effective maturity equal to their expected maturity. Dollar-weighted effective maturity is calculated by averaging the effective maturity of bonds held by the Fund with each effective maturity "weighted" according to the percentage of net assets that it represents.

The Sub-Adviser seeks to control credit quality risk by purchasing primarily investment grade, U.S. dollar-denominated debt obligations. The Fund may invest in debt obligations of all maturities.

The Fund invests primarily in investment grade domestic debt obligations (i.e., obligations rated within the top four rating categories by a Nationally Recognized Statistical Rating Organization ("NRSRO") or of comparable quality as determined by the Sub-Adviser).

While the Fund may invest in debt obligations of maturities with a dollar weighted average maturity of no more than 3 years and debt obligations with a maximum maturity of 4 years, during normal market circumstances the average portfolio effective duration for the Fund is expected to be more than 2 months, but less than 1 year. Effective duration takes into account several variables, including the possibility that a bond may have prepayments or may be called by the issuer before its stated maturity date.

Duration is a measure of total price sensitivity relative to changes in interest rates. Portfolios with shorter durations are typically less sensitive to changes in interest rates. Duration measures how much the value of a security is expected to change with a given change in interest rates. Effective duration is one means used to measure interest rate risk. The longer a security's effective duration, the more sensitive its price is to changes in interest rates. For example, if interest rates rise by 1%, the market value of a security with an effective duration of 3 years would decrease by 3%, with all other factors being constant. The Sub-Adviser uses several methods to compute duration estimates appropriate for particular securities held in the Fund's portfolio. Duration estimates are based on assumptions by the Sub-Adviser and subject to a number of limitations. Duration is most useful when interest rate changes are small and occur equally in short-term and long-term securities. In addition, it is difficult to calculate precisely for bonds with prepayment options, such as mortgage-related securities, because the calculation requires assumptions about prepayment rates.

The Sub-Adviser generally will sell a security when, on a relative basis and in the Sub-Adviser's opinion, it will no longer help the Fund attain its objective(s). This could include, but is not limited to, changes in credit characteristics or outlook, as well as changes in portfolio strategy or cash flow needs. A security may also be sold based on relative value considerations and could be replaced with a security that presents a better value or risk/reward profile.

The Fund's investments are based on, although do not replicate, the securities composition of the Fund's benchmark index. Consequently, the Fund's portfolio composition and risks will differ from those of the benchmark index.

In determining which debt obligations to buy for the Fund the Sub-Adviser attempts to achieve the Fund's investment objective primarily in three ways:

Yield curve positioning: The Sub-Adviser selects debt obligations with maturities and yields that it believes have the greatest potential for achieving the Fund's objectives. The yield curve is a graphic representation of the actual or projected yields of debt obligations in relation to their maturities and durations. The Sub-Adviser selects debt obligations with maturities and yields that it believes have the greatest potential for achieving the Fund's objective. The debt obligations in the Fund, though, will not be identical to the debt obligations in the benchmark. Because the yield curve is constantly changing, the Sub-Adviser regularly adjusts the Fund's portfolio to purchase debt obligations that it believes will best assist the Fund in achieving its objective.

Sector allocation: The Sub-Adviser next evaluates the return potential of each sector (including: asset-backed debt obligations, mortgage-backed debt obligations, government and other public-sector bonds, and corporate bonds). The Sub-Adviser invests in debt obligations in those sectors which it believes represent the greatest potential for achieving the Fund's objectives. The Sub-Adviser regularly adjusts the portfolio in order to address changes in yields and underlying risks in various sectors.

Security selection: The Sub-Adviser then focuses on selecting individual debt obligations. The Sub-Adviser determines which issuers it believes offer the best relative value within each sector and then decides which available debt obligations of that issuer to purchase.

The Fund is an actively managed ETF that seeks to achieve its investment objective by primarily investing in a diversified portfolio of high-quality short-term U.S. dollar denominated domestic and foreign debt securities and other instruments.

The Fund will, under normal circumstances, invest primarily in fixed-income securities. These include:

- Commercial paper of domestic and foreign banks and corporations;
- Obligations of domestic and foreign banks and corporations, including both fixed rate and floating rate securities;
- Obligations of the U.S. government or its agencies, instrumentalities or sponsored enterprises;
- Mortgage and other asset-backed securities; and
- Repurchase agreements relating to the above instruments.

The Fund primarily invests in debt obligations with fixed rates of interest but may also invest in floating or variable rate debt obligations. Other public-sector entities include, but are not limited to, U.S., state and local (municipal) governments and their agencies and authorities, foreign government entities, and non-governmental organizations. The types of municipal obligations in which the Fund may invest include, but are not limited to, taxable and, to some extent, tax-exempt general obligation and revenue bonds, as well as advance refunded and escrowed-to-maturity bonds. Asset-backed obligations in which the Fund may invest are backed with underlying assets such as credit card receivables, auto receivables, student loans, utilities, equipment trust certificates, railway authorities, reimbursement/rate increase allowances and certain residential home loans. Money market instruments in which the Fund may invest include, among other things, U.S. government obligations, repurchase agreements, cash, bank obligations, commercial paper, variable amount master demand notes and corporate bonds with remaining maturities of 13 months or less. The Fund may invest in Rule 144A securities, which are not registered under the federal securities laws and cannot be sold to the U.S. public because of SEC regulations (known as "restricted securities"). The Funds generally consider Rule 144A securities to be liquid unless the Sub-Adviser determines otherwise. The Fund may also invest in other investment companies that principally invest in the types of instruments allowed by the investment strategies of the Fund.

Additional Risk Information

The following section provides additional information regarding the principal risks identified under “Principal Risks” in the Fund’s summary.

Absence of a Prior Active Market: Although the Fund's shares are approved for listing on the Exchange, there can be no assurance that an active trading market will be maintained for Fund shares. There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Fund may experience greater tracking error to its Index than it otherwise would at higher asset levels or the Fund may ultimately liquidate.

Authorized Participants, Market Makers and Liquidity Providers Concentration Risk: The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"), none of which are obligated to engage in creation and/or redemption transactions. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, there may be a significantly diminished trading market for Fund shares and shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. The risks associated with limited APs may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

Cash Redemption Risk. When the Fund's investment strategy requires it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds, it may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind (i.e., distribute securities as payment of redemption proceeds). As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

Call Risk. Many bonds may be redeemed ("called") at the option of the issuer before their stated maturity date. In general, an issuer will call its bonds if they can be refinanced by issuing new bonds which bear a lower interest rate. The Fund would then be forced to invest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund's income.

Collateralized Mortgage Obligation Risk. The Fund may invest in collateralized mortgage obligations ("CMOs"), which are a type of mortgage-backed security. CMOs are created by dividing the principal and interest payments collected on a pool of mortgages into several revenue streams (tranches) with different priority rights to portions of the underlying mortgage payments.

Credit Risk. Credit risk is the risk that an issuer or guarantor of debt instruments or the counterparty to a derivatives contract, repurchase agreement or loan of portfolio securities will be unable or unwilling to make its timely interest and/or principal payments or to otherwise honor its obligations. Debt instruments are subject to varying degrees of credit risk, which may be reflected in their credit ratings. There is the chance that the Fund's portfolio holdings will have their credit ratings downgraded or will default (i.e., fail to make scheduled interest or principal payments), potentially reducing the Fund's income level or share price.

ETF Risks.

Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk. The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

Costs of Buying or Selling Shares. Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage

commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference

between the price at which an investor is willing to buy Shares (the “bid” price) and the price at which an investor is willing to sell Shares (the “ask” price). This difference in bid and ask prices is often referred to as the “spread” or “bid/ask spread.” The bid/ask spread varies over time for Shares based on trading volume and market liquidity and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Shares, including bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

Fluctuation of NAV. The NAV of Fund shares will generally fluctuate with changes in the market value of the Fund’s securities holdings. The market prices of shares will generally fluctuate in accordance with changes in the Fund’s NAV and supply and demand of shares on the Exchange. It cannot be predicted whether Fund shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the Fund trading individually or in the aggregate at any point in time. The market prices of Fund shares may deviate significantly from the NAV of the shares during periods of market volatility. However, given that shares can be created and redeemed in Creation Units (unlike shares of many closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAV), the Sub-Adviser believes that large discounts or premiums to the NAV of shares should not be sustained. While the creation/redemption feature is designed to make it likely that Fund shares normally will trade close to the Fund’s NAV, disruptions to creations and redemptions may result in trading prices that differ significantly from the Fund’s NAV. If an investor purchases Fund shares at a time when the market price is at a premium to the NAV of the shares or sells at a time when the market price is at a discount to the NAV of the shares, then the investor may sustain losses.

Trading. Although Shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange “circuit breaker” rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares. Further, secondary markets may be subject to erratic trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and Authorized Participants may step away from making a market in Fund shares and in executing creation and redemption orders, which could cause a material deviation in the Fund’s market price from its NAV. Decisions by market makers or Authorized Participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund’s portfolio securities and the Fund’s market price. This reduced effectiveness could result in Fund shares trading at a price which differs materially from NAV and also in greater than normal intraday bid/ask spreads for Fund shares. During a “flash crash,” the market prices of the Fund’s shares may decline suddenly and significantly. Such a decline may not reflect the performance of the portfolio securities held by the Fund. Flash crashes may cause Authorized Participants and other market makers to limit or cease trading in the Fund’s shares for temporary or longer periods. Shareholders could suffer significant losses to the extent that they sell shares at these temporarily low market prices.

Extension Risk. When interest rates rise, certain obligations may be paid off by the obligor more slowly than anticipated, causing the value of these securities to fall.

Fixed-Income Instruments Risks: Changes in interest rates generally will cause the value of fixed-income instruments held by the Fund to vary inversely to such changes. Prices of longer-term fixed-income instruments generally fluctuate more than the prices of shorter-term fixed income instruments as interest rates change. Fixed-income instruments that are fixed-rate are generally more susceptible than floating rate loans to price volatility related to changes in prevailing interest rates. The prices of floating rate fixed-income instruments tend to have less fluctuation in response to changes in interest rates, but will have some fluctuation, particularly when the next interest rate adjustment on such security is further away in time or adjustments are limited in amount over time. The Fund may invest in short-term securities that, when interest rates decline, affect the Fund's yield as these securities mature or are sold and the Fund purchases new short-term securities with lower yields. An obligor's willingness and ability to pay interest or to repay principal due in a timely manner may be affected by, among other factors, its cash flow.

Floating or Variable Rate Securities Risk: Floating or variable rate securities pay interest at rates that adjust in response to changes in a specified interest rate or reset at predetermined dates (such as the end of a calendar quarter). Securities with floating or variable interest rates are generally less sensitive to interest rate changes than securities with fixed interest rates but may decline in value if their interest rates do not rise as much, or as quickly, as comparable market interest rates. Conversely, floating or variable rate securities will not generally increase in value if interest rates decline. The impact of interest rate changes on floating or variable rate securities is typically mitigated by the periodic interest rate reset of the investments. Floating or variable rate securities are often subject to restrictions on resale, which can result in reduced liquidity.

Foreign Securities Risk: The Fund may invest in U.S. dollar-denominated debt obligations of foreign issuers. Foreign debt obligations are generally determined based on the ultimate parent country of risk which consists of the following four factors: management location, country of primary listing, country of revenue and reporting currency of the issuer. Debt obligations issued by a foreign entity that are subject to a guarantee of a U.S. corporate parent or other U.S. entity are generally not regarded as foreign securities.

Illiquid Securities Risks: The Fund may invest up to 15% of its net assets in illiquid securities, such as repurchase agreements with a term greater than seven days. Illiquid securities may be difficult to dispose of at a fair price at the times when the Fund believes it is desirable to do so. Investment of the Fund's assets in illiquid securities may restrict the Fund's ability to take advantage of market opportunities. Additionally, the Fund may have to forego all or a portion of the interest earned on a repurchase agreement or pay a penalty to terminate such agreement prior to its contractual end date. Liquidity risk may impact the Fund's ability to meet shareholder redemptions and as a result, the Fund may be forced to sell securities at inopportune prices.

Large Shareholder Transactions Risk: Shares of the Fund are offered to certain other investment companies, large retirement plans and other large investors. As a result, the Fund is subject to the risk that those shareholders may purchase or redeem a large amount of shares of the Fund. To satisfy such large shareholder redemptions, the Fund may have to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. In addition, large purchases of Fund shares could adversely affect the Fund's performance to the extent that the Fund does not immediately invest cash it receives and therefore holds more cash than it ordinarily would. Large shareholder activity could also generate increased transaction costs and cause adverse tax consequences.

Limitations of Indicative Optimized Portfolio Value ("IOPV") Risk: The Exchange (or market data vendors or other information providers) will disseminate, every fifteen seconds during the regular trading day, an intraday value of the Fund's shares, also known as the IOPV. The IOPV calculations are estimates of the value of the Fund's NAV per share and are based on the Fund's portfolio holdings and cash, less accrued expenses, divided by the number of shares of the Fund outstanding as of the time of the prior day's NAV calculation. Premiums and discounts between the IOPV and the market price of the Fund's shares may occur. The IOPV does not necessarily reflect the precise

composition of the current portfolio of securities held by the Fund at a particular point in time or the best possible valuation of the current portfolio. Therefore, it should not be viewed as a “real-time” update of the NAV per share of the Fund, which is calculated only once a day. The quotations of certain Fund holdings may not be updated during U.S. trading hours

if such holdings do not trade in the United States. Additionally, the calculation of the NAV may reflect the fair values of certain Fund holdings, which may result in different prices than those used in the calculations of the IOPV. This may result in market prices for Fund shares deviating from the value of the Fund's underlying securities. Neither the Fund, the Adviser, the Sub-Adviser, nor any of their affiliates are involved in, or responsible for, the calculation or dissemination of the IOPV and make no warranty as to its accuracy.

Management Risk: The Fund is actively managed, and its performance may reflect the Sub-Adviser's ability to make decisions which are suited to achieving the Fund's investment objective. Due to its active management, the Fund could under perform other funds with similar investment objectives.

Market Trading Risk: An investment in the Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation/redemption process of the Fund. Any of these factors, among others, may lead to the Fund's shares trading at a premium or discount to NAV.

Trading Issues. Although the Fund's shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will be maintained. Trading in the Fund's shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in shares is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13% and 20%). Additional rules applicable to the Exchange may halt trading in Fund shares when extraordinary volatility causes sudden, significant swings in the market price of Fund shares. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged or that the shares will trade with any volume, or at all. In stressed market conditions, the liquidity of the Fund's shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than the Fund's shares, potentially causing the market price of the Fund's shares to deviate from their NAV. Further, secondary markets may be subject to erratic trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and Authorized Participants may step away from making a market in Fund shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV. Decisions by market makers or Authorized Participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Fund shares trading at a price which differs materially from NAV and also in greater than normal intraday bid/ask spreads for Fund shares. During a "flash crash," the market prices of the Fund's shares may decline suddenly and significantly. Such a decline may not reflect the performance of the portfolio securities held by the Fund. Flash crashes may cause Authorized Participants and other market makers to limit or cease trading in the Fund's shares for temporary or longer periods. Shareholders could suffer significant losses to the extent that they sell shares at these temporarily low market prices.

Fluctuation of NAV. The NAV of Fund shares will generally fluctuate with changes in the market value of the Fund's securities holdings. The market prices of shares will generally fluctuate in accordance with changes in the Fund's NAV and supply and demand of shares on the Exchange. It cannot be predicted whether Fund shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the Fund trading individually or in the aggregate at any point in time. The market prices of Fund shares may deviate significantly from the NAV of the shares during periods of market volatility. However, given that shares can be created and redeemed in Creation Units (unlike shares of many closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAV), the Sub-Adviser believes that large discounts or premiums

to the NAV of shares should not be sustained. While the creation/redemption feature is designed to make it likely that Fund shares normally will trade close to the Fund's NAV, disruptions to creations and redemptions may result in trading prices that differ significantly from the Fund's NAV. If an investor purchases Fund shares at a time when the

market price is at a premium to the NAV of the shares or sells at a time when the market price is at a discount to the NAV of the shares, then the investor may sustain losses.

Costs of Buying or Selling Shares. Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for shares (the “bid” price) and the price at which an investor is willing to sell shares (the “ask” price). This difference in bid and ask prices is often referred to as the “spread” or “bid/ask spread.” The bid/ask spread varies over time for shares based on trading volume and market liquidity and is generally lower if the Fund’s shares have more trading volume and market liquidity and higher if the Fund’s shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling shares, including bid/ask spreads, frequent trading of shares may significantly reduce investment results and an investment in shares may not be advisable for investors who anticipate regularly making small investments.

Mortgage- and Asset-Backed Securities Risk. Mortgage- and asset-backed securities are more sensitive to interest rate risk than other types of fixed income securities. Modest movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain types of these securities. When interest rates fall, mortgage- and asset-backed securities may be subject to prepayment risk. Prepayment risk is the risk that the borrower will prepay some or the entire principal owed to the investor. If that happens, the Fund may have to replace the security by investing the proceeds in a security with a lower yield. This could reduce the share price and income distributions of the Fund. When interest rates rise, certain types of mortgage- and asset-backed securities are subject to extension risk. Mortgage- and asset-backed securities can also be subject to the risk of default on the underlying residential or commercial mortgage(s) or other assets. Weakening real estate markets may cause default rates to rise, which would result in a decline in the value of mortgage-backed securities.

Certain mortgage-backed securities may be secured by pools of mortgages on single-family, multi-family properties, as well as commercial properties. Similarly, asset-backed securities may be secured by pools of loans, such as corporate loans, student loans, automobile loans and credit card receivables. The credit risk on such securities is affected by homeowners or borrowers defaulting on their loans. The values of assets underlying mortgage-backed and asset-backed securities may decline and therefore may not be adequate to cover underlying investors. Some mortgage-backed and asset-backed securities have experienced extraordinary weakness and volatility in recent years.

Municipal Securities Risk: Municipal securities risks include the ability of the issuer to repay the obligation, the relative lack of information about certain issuers of municipal securities, and the possibility of future legislative changes which could affect the market for and value of municipal securities. These risks include:

General Obligation Bonds Risks. The full faith, credit and taxing power of the municipality that issues a general obligation bond secures payment of interest and repayment of principal. Timely payments depend on the issuer’s credit quality, ability to raise tax revenues and ability to maintain an adequate tax base.

Revenue Bonds Risks. Payments of interest and principal on revenue bonds are made only from the revenues generated by a particular facility, class of facilities or the proceeds of a special tax or other revenue source. These payments depend on the money earned by the particular facility or class of facilities, or the amount of revenues derived from another source.

Private Activity Bonds Risks. Municipalities and other public authorities issue private activity bonds to finance development of industrial facilities for use by a private enterprise. The private enterprise pays the principal and interest on the bond, and the issuer does not pledge its full faith, credit and taxing power for repayment. If the private enterprise defaults on its payments, the Fund may not receive any income or get its

money back from the investment.

Moral Obligation Bonds Risks. Moral obligation bonds are generally issued by special purpose public authorities of a state or municipality. If the issuer is unable to meet its obligations, repayment of these bonds becomes a moral commitment, but not a legal obligation, of the state or municipality.

Municipal Notes Risks. Municipal notes are shorter term municipal debt obligations. They may provide interim financing in anticipation of, and are secured by, tax collection, bond sales or revenue receipts. If there is a shortfall in the anticipated proceeds, the notes may not be fully repaid, and the Fund may lose money.

Municipal Lease Obligations Risks. In a municipal lease obligation, the issuer agrees to make payments when due on the lease obligation. The issuer will generally appropriate municipal funds for that purpose but is not obligated to do so. Although the issuer does not pledge its unlimited taxing power for payment of the lease obligation, the lease obligation is secured by the leased property. However, if the issuer does not fulfill its payment obligation it may be difficult to sell the property and the proceeds of a sale may not cover the Fund's loss.

Tax Risk. Investments in tax-exempt municipal securities rely on the opinion of the issuer's bond counsel that the interest paid on those securities will not be subject to federal income tax. Tax opinions are generally provided at the time the municipal security is initially issued. However, after the Fund buys a security, the Internal Revenue Service may determine that a bond issued as tax-exempt should in fact be taxable, and the Fund's dividends with respect to that bond might be subject to federal income tax. Changes in tax laws or adverse determinations by the Internal Revenue Service may make the income from some municipal obligations taxable. Municipal obligations that are backed by the issuer's taxing authority, known as general obligation bonds, may partially depend for payment on legislative appropriation and/or aid from other governments. These municipal obligations may be vulnerable to legal limits on a government's power to raise revenue or increase taxes. Other municipal obligations, known as special revenue obligations, are payable from revenues earned by a particular project or other revenue source. These obligations are subject to greater risk of default than general obligation bonds because investors can look only to the revenue generated by the project or private company, rather than to the credit of the state or local government issuer of the obligations.

New Fund Risk. The Fund is a recently organized, diversified management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Other Investment Companies Risk: The Fund may invest in shares of investment companies. The risks of investment in these securities typically reflect the risks of the types of instruments in which the investment company invests. When the Fund invests in investment company securities, shareholders of the Fund bear indirectly their proportionate share of their fees and expenses, as well as their share of the Fund's fees and expenses. As a result, an investment by the Fund in an investment company could cause the Fund's operating expenses (taking into account indirect expenses such as the fees and expenses of the investment company) to be higher and, in turn, performance to be lower than if it were to invest directly in the instruments underlying the investment company.

Portfolio Turnover Risk: The Fund may buy and sell investments frequently. Such a strategy often involves higher expenses, including brokerage commissions, and may increase the amount of capital gains (in particular, short-term capital gains taxable to shareholders at ordinary income rates) realized by the Fund.

Prepayment Risk. When interest rates decline, fixed income securities with stated interest rates may have the principal paid earlier than expected, requiring the Fund to invest the proceeds at generally lower interest rates.

Rating Agencies Risks: Ratings are not an absolute standard of quality, but rather general indicators that reflect only the view of the originating rating agencies from which an explanation of the significance of such ratings may be

obtained. There is no assurance that a particular rating will continue for any given period of time or that any such rating will not be revised downward or withdrawn entirely. Such changes may negatively affect the liquidity or market price of the securities in which the Fund invests. The ratings of securitized assets may not adequately reflect the credit risk of those assets due to their structure.

Reinvestment Risk. Income from the Funds' debt securities portfolios will decline if and when the Fund invest the proceeds from matured, traded or called securities in securities with market interest rates that are below the current earnings rate of the Fund's portfolio.

Repurchase Agreement Risks: Repurchase agreements typically involve the acquisition by the Fund of fixed-income securities from a selling financial institution such as a bank or broker-dealer. The agreement provides that the Fund will sell the securities back to the institution at a fixed time in the future. Repurchase agreements involve the risk that a seller will become subject to bankruptcy or other insolvency proceedings or fail to repurchase a security from the Fund. In such situations, the Fund may incur losses including as a result of (i) a possible decline in the value of the underlying security during the period while the Fund seeks to enforce its rights thereto, (ii) a possible lack of access to income on the underlying security during this period, and (iii) expenses of enforcing its rights.

Reverse Repurchase Agreement Risks: A reverse repurchase agreement is the sale by the Fund of a debt obligation to a party for a specified price, with the simultaneous agreement by the Fund to repurchase that debt obligation from that party on a future date at a higher price. Similar to borrowing, reverse repurchase agreements provide the Fund with cash for investment purposes, which creates leverage and subjects the Fund to the risks of leverage. Reverse repurchase agreements also involve the risk that the other party may fail to return the securities in a timely manner or at all. The Fund could lose money if it is unable to recover the securities and the value of collateral held by the Fund, including the value of the investments made with cash collateral, is less than the value of securities. Reverse repurchase agreements also create Fund expenses and require that the Fund have sufficient cash available to purchase the debt obligations when required. Reverse repurchase agreements also involve the risk that the market value of the debt obligation that is the subject of the reverse repurchase agreement could decline significantly below the price at which the Fund is obligated to repurchase the security.

Rule 144A Securities Risk. Rule 144A securities are restricted securities that can be purchased only by "qualified institutional buyers," as defined under the Securities Act. The market for Rule 144A securities typically is less active than the market for publicly-traded securities. As such, investing in Rule 144A securities may reduce the liquidity of the Fund's investments, and the Fund may be unable to sell the security at the desired time or price, if at all. The purchase price and subsequent valuation of Rule 144A securities normally reflect a discount, which may be significant, from the market price of comparable unrestricted securities for which a liquid trading market exists. A restricted security that was liquid at the time of purchase may subsequently become illiquid and its value may decline as a result. In addition, transaction costs may be higher for restricted securities than for more liquid securities. The Fund may also have to bear the expense of registering the securities for resale and the risk of substantial delays in effecting the registration.

Temporary Investment Risk. The Fund may hold cash and/or invest all or a portion of its assets in short-term obligations in response to adverse market, economic or other conditions when the investment management team believes that it is in the best interest of the Fund to pursue such a defensive strategy. The investment management team may, however, choose not to make such temporary investments even in very volatile or adverse conditions. The Fund may not achieve its investment objective when it holds cash or invests its assets in short-term obligations. The Fund also may miss investment opportunities and have a lower total return during these periods.

TBA Securities and Rolls Risk. The Fund may invest in TBA securities. In a TBA transaction, a seller agrees to deliver a security at a future date but does not specify the particular security to be delivered. Instead, the seller agrees to accept any security that meets specified terms. The principal risks of TBA transactions are increased credit risk and increased overall investment exposure.

The Fund may enter into TBA roll transactions, in which the Fund sells mortgage-backed securities for delivery in the current month and simultaneously contracts to purchase substantially similar securities on a specified future date from the same party. The investor may assume some risk because the characteristics of the MBS delivered to the investor may be less favorable than the MBS the investor delivered to the dealer. Because the dealer is not obligated

to return the identical MBS collateral that the investor has delivered, both parties usually transact the dollar roll with generic MBS pools that have the same or less value than the average TBA-eligible security.

U.S. Government Securities Risk: U.S. government securities are not guaranteed against price movement and may decrease in value. Some obligations issued or guaranteed by U.S. government agencies and instrumentalities are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies are supported by the right of the issuer to borrow from the U.S. Treasury. While the U.S. government provides financial support to such U.S. government agencies, no assurance can be given that the U.S. government will always do so because the U.S. government is not so obligated by law. For instance, securities issued by the Government National Mortgage Association (“Ginnie Mae”) are supported by the full faith and credit of the United States. Securities issued by Fannie Mae and Freddie Mac have historically been supported only by the discretionary authority of the U.S. government. While the U.S. government provides financial support to various U.S. government-sponsored agencies and instrumentalities, such as those listed above, no assurance can be given that it will always do so. In September 2008, at the direction of the U.S. Department of the Treasury, Fannie Mae and Freddie Mac were placed into conservatorship under the Federal Housing Finance Agency (“FHFA”), an independent regulator, and they remain in such status as of the date of this Prospectus. The U.S. government also took steps to provide additional financial support to Fannie Mae and Freddie Mac.

The total public debt of the United States as a percentage of gross domestic product has grown rapidly since the beginning of the 2008-2009 financial downturn. Although high debt levels do not necessarily indicate or cause economic problems, they may create certain systemic risks if sound debt management practices are not implemented. A high national debt can raise concerns that the U.S. government will not be able to make principal or interest payments when they are due. This increase has also necessitated the need for the U.S. Congress to negotiate adjustments to the statutory debt limit to increase the cap on the amount the U.S. government is permitted to borrow to meet its existing obligations and finance current budget deficits. Any controversy or ongoing uncertainty regarding the statutory debt limit negotiations may impact the U.S. long-term sovereign credit rating and may cause market uncertainty. As a result, market prices and yields of securities supported by the full faith and credit of the U.S. government may be adversely affected.

Valuation Risk. The Fund may hold securities for which prices from pricing services may be unavailable or are deemed unreliable, in which case the Fund’s procedures for valuing investments provide that the sub-adviser shall use the fair value of such securities for valuing investments. There is a risk that the fair value determined by the sub-adviser or the price determined by the pricing service may be different than the actual sale prices of such securities.

Portfolio Holdings

Information about the Fund’s daily portfolio holdings will be available at www.valtetf.com. In addition, the Fund discloses its complete portfolio holdings as of the end of its fiscal year and its second fiscal quarter in its reports to shareholders. The Fund files its complete portfolio holdings as of the end of its first and third fiscal quarters with the SEC on Form N-Q no later than 60 days after the relevant fiscal period. You can find the SEC filings on the SEC’s website, www.sec.gov. A summarized description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio holdings is available in the Fund’s Statement of Additional Information (“SAI”).

Fund Management

Adviser. ETF Managers Group LLC, the investment adviser to the Fund, is a Delaware limited liability company located at 30 Maple Street, 2nd Floor, Summit, New Jersey 07901. The Adviser provides investment advisory services to exchange-traded funds. The Adviser serves as investment adviser to the Fund with overall responsibility for the portfolio management of the Fund, subject to the supervision of the Board. For its services, the Adviser receives a fee that is equal to 0.30% per annum of the average daily net assets of the Fund, calculated daily and paid monthly.

Under the Investment Advisory Agreement, the Adviser has overall responsibility for the general management and

administration of the Fund and arranges for sub-advisory, transfer agency, custody, fund administration, securities lending, and all other non-distribution related services necessary for the Fund to operate. Additionally, under the Investment Advisory Agreement, the Adviser has agreed to pay all expenses of the Fund, except for: the fee paid to

the Adviser pursuant to the Investment Advisory Agreement, interest charges on any borrowings, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses (such as, among other things and subject to Board approval, non-standard Board-related expenses and litigation against the Board, Trustees, Funds, Adviser, and officers of the Adviser), and distribution (12b-1) fees and expenses (collectively, “Excluded Expenses”).

Sub-Adviser. Sit Fixed Income Advisors II, LLC, the sub-adviser to the Fund, is a Delaware Limited Liability Company located at 3300 IDS Center, 80 South 8th Street, Minneapolis, MN 55402. The Sub-Adviser provides investment advisory services primarily to public and private institutional investors, pension funds, corporations, insurance companies, registered investment companies, and high net worth individuals. The Sub-Adviser is responsible for the day-to-day management of the Fund, subject to the supervision of the Adviser and the Board. For its services, the Sub-Adviser receives an annual fee of 0.10% of the average daily net assets of the Fund, calculated daily and paid monthly. The Fund does not directly pay the Sub-Adviser. The Adviser is responsible for paying the entire amount of the Sub-Adviser’s fee for the Fund.

A discussion regarding the basis for the Board’s approval of the Investment Advisory Agreement and Sub-Advisory Agreement will be available in the Fund’s first Annual or Semi-Annual Report.

Manager of Managers Structure. The Adviser and the Trust have received an exemptive order (the “Order”) from the SEC that permits the Adviser to enter into investment sub-advisory agreements with sub-advisers without obtaining shareholder approval. The Adviser, subject to the review and approval of the Board, may select one or more sub-advisers for the Fund and supervise, monitor and evaluate the performance of each sub-adviser.

The Order also permits the Adviser, subject to the approval of the Board, to replace sub-advisers and amend investment sub-advisory agreements, including fees, without shareholder approval whenever the Adviser and the Board believe such action will benefit the Fund and its shareholders. The Adviser thus has the ultimate responsibility (subject to the ultimate oversight of the Board) to recommend the hiring and replacement of sub-advisers as well as the discretion to terminate any sub-adviser and reallocate the Fund’s assets for management among any other sub-adviser(s) and itself. This means that the Adviser may be able to reduce the sub-advisory fees and retain a larger portion of the management fee or increase the sub-advisory fees and retain a smaller portion of the management fee. The Adviser will compensate each sub-adviser out of its management fee. The Fund is required to provide shareholders with certain information regarding any new sub-adviser within 90 days of the hiring of any new sub-adviser. Such information generally includes the information that would have been provided to shareholders in the form of a proxy statement in the absence of the Order.

The Adviser’s reliance on such Order with respect to the Fund is contingent on the holders of a majority of the Fund’s outstanding voting securities approving the Fund’s use of a manager of managers structure and the Adviser’s reliance on such Order.

Portfolio Managers

The Fund’s portfolio managers are primarily responsible for the day-to-day management of the Fund. The portfolio managers are responsible for various functions related to portfolio management, including, but not limited to, investing cash inflows, implementing investment strategy, researching and reviewing investment strategy, and overseeing members of his portfolio management team with more limited responsibilities.

Bryce A. Doty. Bryce Doty is a Senior Vice President and Senior Portfolio Manager of the Sub-Adviser. Mr. Doty joined Sit Investment in November 1995. He has been responsible for the taxable bond portfolio management group since joining Sit Investment.

Mark H. Book, CFA, CMA. Mark Book is a Vice President and Portfolio Manager of the Sub-Adviser. Mr. Book joined Sit Investment in August 2000 as a Portfolio Manager and Fixed Income Analyst. He is responsible for

Christopher M. Rasmussen, CFA. Christopher M. Rasmussen is a Vice President and Portfolio Manager of the Sub-Adviser. Mr. Rasmussen joined Sit Investment in February 1999. He is responsible for taxable bond portfolio management and credit research. Mr. Rasmussen has worked in the Sit Investment mutual fund group as well as the client administration area and moved to fixed income in August 2002.

The SAI provides additional information about the Portfolio Managers' compensation, other accounts managed, and ownership of Fund shares.

Buying and Selling the Fund

Fund shares are listed for secondary trading on the Exchange. When you buy or sell the Fund's shares on the secondary market, you will pay or receive the market price. You may incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The shares will trade on the Exchange at prices that may differ to varying degrees from the daily NAV of the shares. The Exchange is generally open Monday through Friday and is closed weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

NAV per share for the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by its total number of shares outstanding. Expenses and fees, including management and distribution fees, if any, are accrued daily and taken into account for purposes of determining NAV. NAV is determined each business day, normally as of the close of regular trading of the Exchange (ordinarily 4:00 p.m., Eastern time).

When determining NAV, the value of the Fund's portfolio securities is based on market prices of the securities, which generally means a valuation obtained from an exchange or other market (or based on a price quotation or other equivalent indication of the value supplied by an exchange or other market) or a valuation obtained from an independent pricing service. If a security's market price is not readily available or does not otherwise accurately reflect the fair value of the security, the security will be valued by another method that the Board believes will better reflect fair value in accordance with the Trust's valuation policies and procedures. Fair value pricing may be used in a variety of circumstances, including, but not limited to, situations when the value of a security in the Fund's portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded but prior to the close of the Exchange (such as in the case of a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. Accordingly, the Fund's NAV may reflect certain portfolio securities' fair values rather than their market prices.

Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security will materially differ from the value that could be realized upon the sale of the security.

Frequent Purchases and Redemptions of Fund Shares

Unlike frequent trading of shares of a traditional open-end mutual fund's (*i.e.*, not exchange-traded) shares, frequent trading of shares of the Fund on the secondary market does not disrupt portfolio management, increase the Fund's trading costs, lead to realization of capitalization gains, or otherwise harm the Fund's shareholders because these trades do not involve the Fund directly. Certain institutional investors are authorized to purchase and redeem the Fund's shares directly with the Fund. Because these trades are effected in-kind (*i.e.*, for securities, and not for cash), they do not cause any of the harmful effects noted above that may result from frequent cash trades. Moreover, the Fund imposes transaction fees on in-kind purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting in-kind trades. These fees increase if an investor substitutes cash in part or in whole for Creation Units, reflecting the fact that the Fund's trading costs increase in those circumstances. For these reasons, the Board has determined that it is not necessary to adopt policies and procedures to detect and deter frequent trading and market-timing in shares of the Fund.

Dividends, Distributions and Taxes

Fund Distributions

The Fund intends to calculate dividends, if any, daily and distribute any net realized capital gains to its shareholders monthly.

Dividend Reinvestment Service

Brokers may make available to their customers who own the Fund's shares the DTC book-entry dividend reinvestment service. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole shares of the Fund. Without this service, investors would receive their distributions in cash. In order to achieve the maximum total return on their investments, investors are encouraged to use the dividend reinvestment service. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require the Fund's shareholders to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund purchased in the secondary market.

Tax Information

The following is a summary of some important tax issues that affect the Fund and its shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a detailed explanation of the tax treatment of the Fund, or the tax consequences of an investment in the Fund. The summary is very general, and does not address investors subject to special rules, such as investors who hold shares through an IRA, 401(k) or other tax-deferred account. More information about taxes is located in the SAI. You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.

Tax Status of the Fund

The Fund is treated as a separate entity for federal tax purposes and intends to qualify for the special tax treatment afforded to regulated investment companies under the Internal Revenue Code of 1986, as amended (the "Code"). As long as the Fund qualifies as a regulated investment company, it pays no federal income tax on the earnings it distributes to shareholders.

Tax Status of Distributions

- The Fund will, for each year, distribute substantially all of its net investment income and net capital gains.
- The Fund's distributions from income will generally be taxed to you as ordinary income or qualified dividend income. For non-corporate shareholders, dividends reported by the Fund as qualified dividend income are generally eligible for reduced tax rates.
- Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. The Fund's strategies may limit its ability to distribute dividends eligible for the dividends-received deduction for corporate shareholders.
- Any distributions of net capital gain (the excess of the Fund's net long-term capital gains over its net short-term capital losses) that you receive from the Fund are taxable as long-term capital gains regardless of how long you have owned your shares. Long-term capital gains are currently taxed to non-corporate shareholders at reduced maximum rates.
- Dividends and distributions are generally taxable to you whether you receive them in cash or in additional shares through a broker's dividend reinvestment service. If you receive dividends or distributions in the form of additional shares through a broker's dividend reinvestment service, you will be required to pay applicable federal, state or local taxes on the reinvested dividends but you will not receive a corresponding

cash distribution with which to pay any applicable tax.

- The Fund may be able to pass through to you foreign tax credits for certain taxes paid by the Fund, provided the Fund meets certain requirements.
- Distributions paid in January but declared by the Fund in October, November or December of the previous year may be taxable to you in the previous year.
- The Fund will inform you of the amount of your ordinary income dividends, qualified dividend income, foreign tax credits and net capital gain distributions received from the Fund shortly after the close of each calendar year.

Taxes on Exchange-Listed Share Sales. Any capital gain or loss realized upon a sale of shares will generally be treated as long-term capital gain or loss if the shares have been held for more than one year and as short-term capital gain or loss if the shares have been held for one year or less, except that any capital loss on the sale of shares held for six months or less will be treated as long-term capital loss to the extent of amounts treated as distributions of long-term capital gains to the shareholder with respect to such shares.

Medicare Tax. U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% Medicare contribution tax on their “net investment income,” including interest, dividends, and capital gains (including capital gains realized on the sale or exchange of shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Non-U.S. Investors. If you are not a citizen or permanent resident of the United States, the Fund’s ordinary income dividends will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or business. This 30% withholding tax generally will not apply to distributions of net capital gain.

Distributions paid after June 30, 2014 and sale proceeds and certain capital gain dividends paid after December 31, 2016 to a shareholder that is a “foreign financial institution” as defined in Section 1471 of the Code and that does not meet the requirements imposed on foreign financial institutions by Section 1471 will generally be subject to withholding tax at a 30% rate. Distributions paid after June 30, 2014 and sale proceeds and certain capital gain dividends paid after December 31, 2016 to a non-U.S. shareholder that is not a foreign financial institution will generally be subject to such withholding tax if the shareholder fails to make certain required certifications. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement.

Backup Withholding. The Fund or your broker will be required in certain cases to withhold (as “backup withholding”) on amounts payable to any shareholder who (1) has provided either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the Internal Revenue Service for failure to properly report payments of interest or dividends, (3) has failed to certify that such shareholder is not subject to backup withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien). The backup withholding rate is currently 24%. Backup withholding will not, however, be applied to payments that have been subject to the 30% withholding tax applicable to shareholders who are neither citizens nor residents of the United States.

Distribution

The Distributor, ETFMG Financial LLC, an affiliate of the Adviser, is a broker-dealer registered with the U.S. Securities and Exchange Commission. The Distributor distributes Creation Units for the Funds on an agency basis and does not maintain a secondary market in the Funds’ shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The principal business address of the Distributor is 30 Maple Street, 2nd Floor, Summit, New Jersey 07901.

The Board has adopted a Distribution and Service Plan (the “Plan”) pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of the Fund's assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

Fund Service Providers

Sullivan & Worcester LLP, 1666 K Street NW, Washington, DC 20006, serves as legal counsel to the Fund.

WithumSmith + Brown, PC, 1411 Broadway, 9th Floor, New York, New York 10018, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

Premium/Discount Information

The Fund is new and therefore does not have any information regarding how often shares of the Fund traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund.

Litigation

PENDING - The Trust, the trustees of the Trust, the Adviser and certain officers of the Adviser are defendants in an action filed May 2, 2017 in the Superior Court of New Jersey captioned PureShares, LLC d/b/a PureFunds et al. v. ETF Managers Group, LLC et al., Docket No. C-63-17. The PureShares action alleges claims based on disputes arising out of contractual relationships with the Adviser. The action seeks damages in unspecified amounts and injunctive relief based on breach of contract, wrongful termination, and several other theories. The matter is scheduled for trial in January 2020.

PENDING - The Adviser, its parent, Exchange Traded Managers Group, LLC and its chief executive officer are defendants in a case filed on October 26, 2017 in the United States District Court for the Southern District of New York by NASDAQ, Inc. captioned Nasdaq, Inc. v. Exchange Traded Managers Group, LLC et al., Case 1:17-cv-08252. This action arises out of related facts and circumstances in the New Jersey litigation and asserts claims for breach of contract, wrongful termination and certain other theories with respect to the same exchange traded funds discussed above. The matter was the subject of a bench trial in the Southern District of New York in May 2019, with closing arguments held on July 10, 2019. The parties are now awaiting the decision of the court. While the Adviser cannot predict the outcome of this lawsuit, the Adviser believes that any judgement against it will not affect its ability to continue to act as investment adviser to the Funds.

Financial Highlights

Financial information for the Fund will be available after the Fund has completed a fiscal year of operations.

ETF Managers Trust

GENERAL INFORMATION ABOUT THE TRUST

The Trust is an open-end management investment company currently consisting of multiple investment series, one of which is the ETFMG Sit Ultra Short ETF (the “Fund”). The Trust was organized as a Delaware statutory trust on July 1, 2009. The Trust is registered with the Securities and Exchange Commission (the “SEC”) under the Investment Company Act of 1940, as amended, (the “1940 Act”) as an open-end management investment company and the offering of the Fund’s shares (“Shares”) is registered under the Securities Act of 1933, as amended (the “Securities Act”). ETF Managers Group LLC (the “Adviser”) serves as investment adviser to the Fund. Sit Fixed Income Advisors II, LLC (“Sit Investment” or the “Sub-Adviser”) serves as the sub-adviser to the Fund. The investment objective of the Fund is to seek maximum current income to the extent consistent with preserving capital and maintain liquidity.

The Fund offers and issues Shares at their net asset value only in aggregations of a specified number of Shares (each, a “Creation Unit”). The Fund generally offers and issues Shares in exchange for a basket of securities included in its portfolio (“Deposit Securities”) together with the deposit of a specified cash payment (“Cash Component”). The Trust reserves the right to permit or require the substitution of a “cash in lieu” amount (“Deposit Cash”) to be added to the Cash Component to replace any Deposit Security. The Shares are listed on the NYSE Arca, Inc. (the “Exchange”) and trade on the Exchange at market prices. These prices may differ from the Shares’ net asset values. The Shares are also redeemable only in Creation Unit aggregations, and generally in exchange for portfolio securities and a specified cash payment. A Creation Unit of the Fund consists of at least 25,000 Shares.

Shares may be issued in advance of receipt of Deposit Securities subject to various conditions including a requirement to maintain on deposit with the Trust an amount in cash at least equal to a specified percentage of the market value of the missing Deposit Securities as set forth in the Participant Agreement (as defined below). The Trust may impose a transaction fee for each creation or redemption. In all cases, such fees will be limited in accordance with the requirements of the SEC applicable to management investment companies offering redeemable securities.

CONTINUOUS OFFERING

The method by which Creation Unit Aggregations of shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Unit Aggregations of shares are issued and sold by the Fund on an ongoing basis, at any point a “distribution,” as such term is used in the Securities Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Unit Aggregations after placing an order with the Distributor, breaks them down into constituent shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter. Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in shares, whether or not participating in the distribution of shares, generally are required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. Firms that incur a prospectus delivery obligation with respect to shares of the Fund are reminded that, pursuant to Rule 153 under the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that the prospectus is available at the Exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

PORTFOLIO HOLDINGS

Policy on Disclosure of Portfolio Holdings

The Board of Trustees of the Trust (the “Board”) has adopted a policy on disclosure of portfolio holdings, which it believes is in the best interest of the Fund’s shareholders. The policy requires that the Fund’s portfolio holdings be disclosed in a manner that: (i) is

consistent with applicable legal requirements and is in the best interests of the Fund's shareholders; (ii) does not put the interests of the Adviser or the Distributor, or any affiliated person of the Adviser or the Distributor, above those of the Fund's shareholders; (iii) does not advantage any current or prospective Fund shareholder over any other current or prospective Fund shareholder, except to the extent that certain entities (as described below) may receive portfolio holdings information not available

to other current or prospective Fund shareholders in connection with the dissemination of information necessary for transactions in Creation Units; and (iv) does not provide selective access to portfolio holdings information except pursuant to the procedures outlined below and to the extent appropriate confidentiality arrangements limiting the use of such information are in effect.

The “entities” referred to in sub-section (iii) above are generally limited to National Securities Clearing Corporation (“NSCC”) members and subscribers to various fee-based subscription services, including Authorized Participants (defined below), and other institutional market participants and entities that provide information services.

Each business day portfolio holdings information will be provided to the Fund’s transfer agent or other agent for dissemination through the facilities of the NSCC and/or other fee based subscription services to NSCC members and/or subscribers to those other fee based subscription services, including Authorized Participants (defined below), and to entities that publish and/or analyze such information in connection with the process of purchasing or redeeming Creation Units or trading shares of the Fund in the secondary market. Information with respect to the Fund’s portfolio holdings is also disseminated daily on the Fund’s website.

The transfer agent may also make available portfolio holdings information to other institutional market participants and entities that provide information services. This information typically reflects the Fund’s anticipated holdings on the following business day. “Authorized Participants” are generally broker-dealer firms that have entered into Authorized Participant Agreements with the Distributor in order to purchase and redeem large blocks of shares (known as Creation Units) pursuant to legal requirements, including the exemptive order granted by the SEC, through which the Fund offers and redeems shares. Other than portfolio holdings information made available in connection with the creation/redemption process, as discussed above, portfolio holdings information that is not filed with the SEC or posted on the publicly available website may be provided to third parties only in limited circumstances, as described above.

Disclosure to providers of auditing, custody, proxy voting, liquidity risk management and other similar services for the Fund, broker-dealers that are involved in executing portfolio transactions on behalf of the Fund, as well as rating and ranking organizations, will generally be permitted; however, information may be disclosed to other third parties (including, without limitation, individuals, institutional investors, and Authorized Participants that sell shares of the Fund) only upon approval by the CCO. The recipients who may receive non-public portfolio holdings information are as follows: the Adviser and its affiliates, the Fund’s independent registered public accounting firm, the Fund’s distributor, administrator and custodian, the Fund’s legal counsel, the Fund’s financial printer and the Fund’s proxy voting service. These entities are obligated to keep such information confidential. Third-party providers of custodial or accounting services to the Fund may release non-public portfolio holdings information of the Fund only with the permission of the CCO.

Portfolio holdings will be disclosed through required filings with the SEC. The Fund files its portfolio holdings with the SEC for each fiscal quarter on Form N-CSR (with respect to each annual period and semiannual period) and Form N-Q (with respect to the first and third quarters of the Fund’s fiscal year). Shareholders may obtain the Fund’s Forms N-CSR and N-Q filings on the SEC’s website at www.sec.gov. You may call the SEC at 1-800-SEC-0330 for information about the SEC’s website. Under the policy, the Board is to receive information, on a quarterly basis, regarding any other disclosures of non-public portfolio holdings information that were permitted during the preceding quarter.

ADDITIONAL INFORMATION ABOUT INVESTMENT OBJECTIVES, POLICIES AND RELATED RISKS

The Fund’s investment objective and principal investment strategies are described in the Prospectus. The following information supplements, and should be read in conjunction with, the Prospectus. For a description of certain permitted investments, see “Description of Permitted Investments” in this SAI.

DIVERSIFICATION

The Fund is “diversified” within the meaning of the 1940 Act. Under applicable federal laws, to qualify as a diversified fund, the Fund, with respect to 75% of its total assets, may not invest greater than 5% of its total assets in any one issuer and may not hold greater than 10% of the securities of one issuer. The remaining 25% of the Fund’s total assets does not need to be “diversified” and may be invested in securities of a single issuer, subject to other applicable laws. The diversification of the Fund’s holdings is measured at the time the Fund purchases a security. However, if the Fund purchases a security and holds it for a period of time, the security may become a larger percentage of the Fund’s total assets due to movements in the financial markets. If the market affects several securities held by the Fund, the Fund may have a greater percentage of its assets invested in securities of a single issuer or a small number of issuers.

DESCRIPTION OF PERMITTED INVESTMENTS

The following are descriptions of the permitted investments and investment practices and the associated risk factors. The Fund will only invest in any of the following instruments or engage in any of the following investment practices if such investment or activity is consistent with the Fund's investment objective and permitted by the Fund's stated investment policies. The information below should be read in conjunction with the "Principal Investment Strategies" and "Principal Risks" sections of the Prospectus. The information below pertains to non-principal investment strategies and risks of the Fund, while the information in the Prospectus pertains to principal investment strategies and risks of the Fund

FIXED INCOME SECURITIES

The Fund may invest in fixed income securities. Even though interest-bearing securities are investments that promise a stable stream of income, the prices of such securities are affected by changes in interest rates. In general, fixed income security prices rise when interest rates fall and fall when interest rates rise. Securities with shorter maturities, while offering lower yields, generally provide greater price stability than longer term securities and are less affected by changes in interest rates. The values of fixed income securities also may be affected by changes in the credit rating or financial condition of the issuing entities. Once the rating of a portfolio security has been changed, the Fund will consider all circumstances deemed relevant in determining whether to continue to hold the security.

Fixed income investments bear certain risks, including credit risk, or the ability of an issuer to pay interest and principal as they become due. Generally, higher yielding bonds are subject to more credit risk than lower yielding bonds.

Interest rate risk refers to the fluctuations in value of fixed income securities resulting from the inverse relationship between the market value of outstanding fixed income securities and changes in interest rates. An increase in interest rates will generally reduce the market value of fixed income investments and a decline in interest rates will tend to increase their value.

Call risk is the risk that an issuer will redeem an obligation earlier than scheduled or expected. Bonds are typically called when interest rates have declined. In the event of a bond being called, the Adviser may have to reinvest the proceeds in lower yielding securities to the detriment of the Fund.

Prepayment risk is the risk that borrowers of the security's underlying debt obligations may prepay the debt obligations earlier than scheduled or expected, which would accelerate cash flows from, and shorten the average life of, the security. The Sub-Adviser may have to reinvest the proceeds in lower yielding securities to the detriment of the Fund. This typically happens when interest rates have decreased.

Extension risk is the risk that the borrowers of a security's underlying debt obligations may pay principal on the obligations slower than expected, having the effect of extending the average life and duration of the obligation. This typically happens when interest rates have increased.

A number of factors, including changes in a central bank's monetary policies or general improvements in the economy, may cause interest rates to rise. Fixed income securities with longer durations are more sensitive to interest rate changes than securities with shorter durations, making them more volatile. This means their prices are more likely to experience a considerable reduction in response to a rise in interest rates.

When investing in fixed income securities, the Fund may purchase securities regardless of their rating, including fixed income securities rated below investment grade - securities rated below investment grade are often referred to as high yield securities or "junk bonds." High yield securities or "junk bonds," involve special risks in addition to the risks associated with investments in higher rated fixed income securities. While offering a greater potential opportunity for capital appreciation and higher yields, high yield securities may be subject to greater levels of interest rate, credit and liquidity risk, may entail greater potential price volatility, and may be less liquid than higher rated fixed income securities. High yield securities may be regarded as predominantly speculative with respect to the issuer's continuing ability to meet principal and interest payments. They may also be more susceptible to real or perceived adverse economic and competitive industry conditions than higher rated securities. Fixed income securities rated in the lowest investment grade categories by the rating agencies may also possess speculative characteristics. If securities are in default with respect to the payment of interest or the repayment of principal, or present an imminent risk of default with respect to such payments, the issuer of such securities may fail to resume principal or interest payments, in which case the Fund may lose its entire investment in the high

yield security. In addition, to the extent that there is no established retail secondary market, there may be thin trading of high yield securities, and this may have an impact on the Fund's ability to accurately value high yield securities and the Fund's assets and on the Fund's ability to dispose of the securities. Adverse publicity and investor perception,

whether or not based on fundamental analysis, may decrease the values and liquidity of high yield securities especially in a thinly traded market.

VARIABLE AND FLOATING RATE SECURITIES

The Fund may invest in variable and floating rate securities. Fixed Income securities that have variable or floating rates of interest may, under certain limited circumstances, have varying principal amounts. These securities pay interest at rates that are adjusted periodically according to a specified formula, usually with reference to one or more interest rate indices or market interest rates (the “underlying index”). The interest paid on these securities is a function primarily of the underlying index upon which the interest rate adjustments are based. These adjustments minimize changes in the market value of the obligation. Similar to fixed rate debt instruments, variable and floating rate instruments are subject to changes in value based on changes in market interest rates or changes in the issuer’s creditworthiness. The rate of interest on securities may be tied to U.S. Government securities or indices on those securities as well as any other rate of interest or index.

Variable and floating rate demand notes of corporations are redeemable upon a specified period of notice. These obligations include master demand notes that permit investment of fluctuating amounts at varying interest rates under direct arrangements with the issuer of the instrument. The issuer of these obligations often has the right, after a given period, to prepay the outstanding principal amount of the obligations upon a specified number of days’ notice.

Certain securities may have an initial principal amount that varies over time based on an interest rate index, and, accordingly, the Fund might be entitled to less than the initial principal amount of the security upon the security’s maturity. The Fund intends to purchase these securities only when the Sub-Adviser believes the interest income from the instrument justifies any principal risks associated with the instrument. The Sub-Adviser may attempt to limit any potential loss of principal by purchasing similar instruments that are intended to provide an offsetting increase in principal. There can be no assurance that the Sub-Adviser will be able to limit the effects of principal fluctuations and, accordingly, the Fund may incur losses on those securities even if held to maturity without issuer default.

There may not be an active secondary market for any particular floating or variable rate instruments, which could make it difficult for the Fund to dispose of the instrument during periods that the Fund is not entitled to exercise any demand rights it may have. The Fund could, for this or other reasons, suffer a loss with respect to those instruments. The Sub-Adviser monitors the liquidity of the Fund’s investment in variable and floating rate instruments, but there can be no guarantee that an active secondary market will exist.

U.S. GOVERNMENT SECURITIES

The Fund may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. There can be no guarantee that the United States will be able to meet its payment obligations with respect to such securities. Additionally, market prices and yields of securities supported by the full faith and credit of the U.S. government may decline or be negative for short or long periods of time. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as Fannie Mae, the Government National Mortgage Association (“Ginnie Mae”), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation (Farmer Mac).

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury, while the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. government securities typically pay coupon interest semi-annually and repay the principal at maturity.

The total public debt of the United States as a percentage of gross domestic product has grown rapidly since the beginning of the 2008-2009 financial downturn. Although high debt levels do not necessarily indicate or cause economic problems, they may create certain systemic risks if sound debt management practices are not implemented. A high national debt can raise concerns that the U.S. government will not be able to make principal or interest payments when they are due. This increase has also necessitated the need for the U.S. Congress to negotiate adjustments to the statutory debt limit to increase the cap on the amount the U.S. government is permitted to borrow to meet its existing obligations and finance current budget deficits. In August 2011, Standard & Poor's ("S&P") lowered its long-term sovereign credit rating on the U.S. In explaining the downgrade at that time, S&P cited, among other reasons, controversy over raising the statutory debt ceiling and growth in public spending. On February 9, 2018, following passage by Congress, the President of the United States signed the Bipartisan Budget Act of 2018, which suspended the statutory debt limit through March 1, 2019. On March 2, 2019 the debt ceiling was reinstated and will need to again be addressed by Congress in 2019. Any controversy or ongoing uncertainty regarding the statutory debt ceiling negotiations may impact the U.S. long-term sovereign credit rating and may cause market uncertainty. As a result, market prices and yields of securities supported by the full faith and credit of the U.S. government may be adversely affected.

The value of direct or indirect investments in fixed income securities will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities. On the other hand, if rates fall, the value of the fixed income securities generally increases. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. The value of direct or indirect investments in fixed income securities may be affected by the inability of issuers to repay principal and interest or illiquidity in debt securities markets.

Other types of U.S. government securities the Fund may invest in include:

- **U.S. Treasury Obligations.** U.S. Treasury obligations consist of bills, notes and bonds issued by the U.S. Treasury and separately traded interest and principal component parts of such obligations that are transferable through the federal book-entry system known as Separately Traded Registered Interest and Principal Securities ("STRIPS") and Treasury Receipts ("TRs").
- **Receipts.** Interests in separately traded interest and principal component parts of U.S. government obligations that are issued by banks or brokerage firms and are created by depositing U.S. government obligations into a special account at a custodian bank. The custodian holds the interest and principal payments for the benefit of the registered owners of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. TRs and STRIPS are interests in accounts sponsored by the U.S. Treasury. Receipts are sold as zero coupon securities.
- **U.S. Government Zero Coupon Securities.** STRIPS and receipts are sold as zero coupon securities, that is, fixed income securities that have been stripped of their unmatured interest coupons. Zero coupon securities are sold at a (usually substantial) discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. The amount of this discount is accreted over the life of the security, and the accretion constitutes the income earned on the security for both accounting and tax purposes. Because of these features, the market prices of zero coupon securities are generally more volatile than the market prices of securities that have similar maturity but that pay interest periodically. Zero coupon securities are likely to respond to a greater degree to interest rate changes than are non-zero coupon securities with similar maturity and credit qualities.
- **U.S. Government Agencies.** Some obligations issued or guaranteed by agencies of the U.S. government are supported by the full faith and credit of the U.S. Treasury, others are supported by the right of the issuer to borrow from the U.S. Treasury, while still others are supported only by the credit of the instrumentality. Guarantees of principal by agencies or instrumentalities of the U.S. government may be a guarantee of payment at the maturity of the obligation so that in the event of a default prior to maturity there might not be a market and thus no means of realizing on the obligation prior to maturity. Guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities nor to the value of a Fund's Shares.

REPURCHASE AGREEMENTS

The Fund may engage in repurchase agreement transactions involving the type of securities in which it is permitted to invest. Repurchase agreements are transactions by which the Fund purchases a security and simultaneously commits to resell that security to the seller (a bank or securities dealer) at an agreed upon price on an agreed upon date (usually within seven days of purchase). The resale price reflects the purchase price plus an agreed upon market rate of interest which is unrelated to the coupon rate or date of maturity of the purchased security. Repurchase agreements involve certain risks not associated with direct investments in the underlying securities. In the event of a default or bankruptcy by the seller, the Fund will seek to liquidate such collateral. The

exercise of the Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss. Repurchase agreements are considered to be loans by an investment company under the 1940 Act. The Fund will not invest more than 33% of its net assets in repurchase agreements.

The use of repurchase agreements involves certain risks. For example, if the seller of the agreements defaults on its obligation to repurchase the underlying securities at a time when the value of these securities has declined, the Fund may incur a loss upon disposition of them. If the seller of the agreement becomes insolvent and subject to liquidation or reorganization under the Bankruptcy Code or other laws, a bankruptcy court may determine that the underlying securities are collateral not within the control of the Fund and therefore subject to sale by the trustee in bankruptcy. Finally, it is possible that the Fund may not be able to substantiate its interest in the underlying securities. While the management of the Trust acknowledges these risks, it is expected that they can be controlled through stringent security selection criteria and careful monitoring procedures.

REVERSE REPURCHASE AGREEMENTS

The Fund may engage in reverse repurchase agreements. Reverse repurchase agreements are agreements that involve the sale of securities held by the Fund to financial institutions such as banks and broker-dealers, with an agreement that the Fund will repurchase the securities at an agreed upon price and date. During the reverse repurchase agreement period, the Fund continues to receive interest and principal payments on the securities sold. The Fund may employ reverse repurchase agreements (i) for temporary emergency purposes, such as to meet unanticipated net redemptions so as to avoid liquidating other portfolio securities during unfavorable market conditions; (ii) to cover short-term cash requirements resulting from the timing of trade settlements; or (iii) to take advantage of market situations where the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction.

Reverse repurchase agreements involve the risk that the market value of securities to be purchased by the Fund may decline below the price at which the Fund is obligated to repurchase the securities, or that the other party may default on its obligation, so that the Fund is delayed or prevented from completing the transaction. At the time the Fund enters into a reverse repurchase agreement, it will segregate, and maintain, liquid assets having a dollar value equal to the repurchase price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Fund's use of the proceeds from the sale of the securities may be restricted pending a determination by the other party, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities. Reverse repurchase agreements are considered borrowings by the Fund under the 1940 Act.

BORROWING

Although the Fund does not intend to borrow money, the Fund may do so to the extent permitted by the 1940 Act. Under the 1940 Act, the Fund may borrow up to one-third (1/3) of its net assets. The Fund will borrow money only for short-term or emergency purposes. Such borrowing is not for investment purposes and will be repaid by the Fund promptly. Borrowing will tend to exaggerate the effect on net asset value ("NAV") of any increase or decrease in the market value of the Fund's portfolio. Money borrowed will be subject to interest costs that may or may not be recovered by earnings on the securities purchased. The Fund also may be required to maintain minimum average balances in connection with a borrowing or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

CASH INVESTMENTS

When the Fund's Sub-Adviser believes market, economic or political conditions are unfavorable for investors, the Fund may invest up to 100% of its net assets in cash, cash equivalents or other short-term investments. Unfavorable market or economic conditions may include excessive volatility or a prolonged general decline in the securities markets, or the U.S. economy. The Fund's Sub-Adviser also may invest in these types of securities or hold cash while looking for suitable investment opportunities or to maintain liquidity.

INVESTMENT COMPANIES

The Fund may invest in the securities of other investment companies, including money market funds, subject to applicable limitations under Section 12(d)(1) of the 1940 Act. Pursuant to Section 12(d)(1), the Fund may invest in the securities of another investment company (the "acquired company") provided that the Fund, immediately after such purchase or acquisition, does not own in the aggregate: (i) more than 3% of the total outstanding voting stock of the acquired company; (ii) securities issued by the acquired

company having an aggregate value in excess of 5% of the value of the total assets of the Fund; or (iii) securities issued by the acquired company and all other investment companies (other than Treasury stock of the Fund) having an aggregate value

in excess of 10% of the value of the total assets of the Fund. To the extent allowed by law or regulation, the Fund may invest its assets in securities of investment companies that are money market funds in excess of the limits discussed above.

If the Fund invests in and, thus, is a shareholder of, another investment company, the Fund's shareholders will indirectly bear the Fund's proportionate share of the fees and expenses paid by such other investment company, including advisory fees, in addition to both the management fees payable directly by the Fund to the Fund's own investment adviser and the other expenses that the Fund bears directly in connection with the Fund's own operations.

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in securities of other registered investment companies, including the Fund. The acquisition of a Fund's Shares by registered investment companies is subject to the restrictions of Section 12(d)(1) of the 1940 Act, except as may be permitted by exemptive rules under the 1940 Act or as may at some future time be permitted by an exemptive order that permits registered investment companies to invest in the Fund beyond the limits of Section 12(d)(1), subject to certain terms and conditions, including that the registered investment company enter into an agreement with the Fund regarding the terms of the investment.

The Fund may rely on Section 12(d)(1)(F) and Rule 12d1-3 of the 1940 Act, which provide an exemption from Section 12(d)(1) that allows the Fund to invest all of its assets in other registered funds, including ETFs, if, among other conditions: (a) the Fund, together with its affiliates, acquires no more than three percent of the outstanding voting stock of any acquired fund, and (b) the sales load charged on the Fund's shares is no greater than the limits set forth in Rule 2830 of the Conduct Rules of the Financial Industry Regulatory Authority, Inc. ("FINRA").

The Fund will incur higher and duplicative expenses when it invests in other investment companies such as mutual funds and ETFs. There is also the risk that the Fund may suffer losses due to the investment practices of the underlying funds. When the Fund invests in other investment companies, the Fund will be subject to substantially the same risks as those associated with the direct ownership of securities held by such investment companies.

CORPORATE DEBT SECURITIES

Corporate debt securities are long- and short-term debt obligations issued by companies (such as publicly issued and privately placed bonds, notes and commercial paper). The Fund considers corporate debt securities to be of investment grade quality if they are rated within the top four rating categories by a Nationally Recognized Statistical Rating Organization or a comparable quality as determined by the Fund's Sub-Adviser. Investment grade debt securities generally have adequate to strong protection of principal and interest payments. In the lower end of this category, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal than in higher rated categories.

MORTGAGE-BACKED AND ASSET-BACKED SECURITIES

The Fund may invest in mortgage-backed and asset-backed securities. Mortgage-backed securities are mortgage-related securities issued or guaranteed by the U.S. government, its agencies and instrumentalities, or issued by nongovernment entities. Mortgage-related securities represent ownership in pools of mortgage loans assembled for sale to investors by various government agencies such as the Government National Mortgage Association (GNMA) and government-related organizations such as the Federal National Mortgage Association (FNMA) and the Federal Home Loan Mortgage Corporation (FHLMC), as well as by nongovernment issuers such as commercial banks, savings and loan institutions, mortgage bankers and private mortgage insurance companies. Although certain mortgage-related securities are guaranteed by a third party or otherwise similarly secured, the market value of the security, which may fluctuate, is not so secured. These securities differ from conventional bonds in that the principal is paid back to the investor as payments are made on the underlying mortgages in the pool. Accordingly, the Fund receives monthly scheduled payments of principal and interest along with any unscheduled principal prepayments on the underlying mortgages. Because these scheduled and unscheduled principal payments must be reinvested at prevailing interest rates, mortgage-backed securities do not provide an effective means of locking in long-term interest rates for the investor.

In addition, there are a number of important differences among the agencies and instrumentalities of the U.S. government that issue mortgage-related securities and among the securities they issue. Mortgage-related securities issued by GNMA include GNMA Mortgage Pass-Through Certificates (also known as Ginnie Maes) which are guaranteed as to the timely payment of principal and interest. That guarantee is backed by the full faith and credit of the U.S. Treasury. GNMA is a corporation wholly owned by the U.S. government within the Department of Housing and Urban Development. Mortgage-related securities issued by FNMA include FNMA

Guaranteed Mortgage Pass-Through Certificates (also known as Fannie Maes) and are guaranteed as to payment of principal and interest by FNMA itself and backed by a line of credit with the U.S. Treasury. FNMA is a government-sponsored entity wholly owned by public stockholders. Mortgage-related securities issued by FHLMC include FHLMC Mortgage Participation Certificates

(also known as Freddie Macs) guaranteed as to payment of principal and interest by FHLMC itself and backed by a line of credit with the U.S. Treasury. FHLMC is a government-sponsored entity wholly owned by public stockholders.

In September 2008, the Federal Housing Finance Agency (FHFA) placed FNMA and FHLMC into conservatorship, and FHFA succeeded to all rights, titles, powers and privileges of FNMA and FHLMC. The U.S. Treasury entered into a Senior Preferred Stock Purchase Agreement with each of FNMA and FHLMC pursuant to which the U.S. Treasury will disburse up to an aggregate of \$200 billion to each of FNMA and FHLMC to maintain a positive net worth in each enterprise; this agreement contains various covenants that severely limit each enterprise's operation. The U.S. Treasury also announced the creation of a new secured lending facility that is available to FNMA and FHLMC as a liquidity backstop and announced the creation of a temporary program to purchase mortgage-backed securities issued by FNMA and FHLMC. FHFA has the power to repudiate any contract entered into by FNMA or FHLMC prior to FHFA's appointment if FHFA determines that performance of the contract is burdensome and the repudiation of the contract promotes the orderly administration of FNMA's or FHLMC's affairs. FHFA has indicated that it has no intention to repudiate the guaranty obligations of FNMA or FHLMC. FHFA also has the right to transfer or sell any asset or liability of FNMA or FHLMC without any approval, assignment or consent, although FHFA has stated that it has no present intention to do so. In addition, holders of mortgage-backed securities issued by FNMA and FHLMC may not enforce certain rights related to such securities against FHFA, or the enforcement of such rights may be delayed, during the conservatorship. While the actions of the U.S. Treasury are intended to support the operations of FNMA and FHLMC, there is no guarantee that such actions will be successful. Furthermore, the U.S. Congress has recently considered proposals to wind down or restructure the operations of both FNMA and FHLMC. The passage of any such proposal has the potential to impact the value of securities issued by FNMA or FHLMC, which could adversely affect the Fund.

Asset-backed securities are structured like mortgage-backed securities, but instead of mortgage loans or interests in mortgage loans, the underlying assets may include such items as motor vehicle installment sales contracts or installment loan contracts, equipment trust certificates, railway authorities, leases of various types of real and personal property, and receivables from credit card agreements and from sales of personal property. Regular payments received on asset-backed securities include both interest and principal. Asset-backed securities typically have no U.S. government backing. Additionally, the ability of an issuer of asset-backed securities to enforce its security interest in the underlying assets may be limited.

If the Fund purchases a mortgage-backed or other asset-backed security at a premium, the premium may be lost if there is a decline in the market value of the security whether resulting from changes in interest rates or prepayments in the underlying collateral. As with other interest-bearing securities, the prices of such securities are inversely affected by changes in interest rates. Although the value of a mortgage-backed or other asset-backed security may decline when interest rates rise, the converse is not necessarily true, since in periods of declining interest rates the mortgages and loans underlying the securities are prone to prepayment, thereby shortening the average life of the security and shortening the period of time over which income at the higher rate is received. When interest rates are rising, the rate of prepayment tends to decrease, thereby lengthening the period of time over which income at the lower rate is received. For these and other reasons, a mortgage-backed or other asset-backed security's average maturity may be shortened or lengthened as a result of interest rate fluctuations and, therefore, it is not possible to predict accurately the security's return. In addition, while the trading market for short-term mortgages and asset-backed securities is ordinarily quite liquid, in times of financial stress the trading market for these securities may become restricted.

COLLATERALIZED MORTGAGE OBLIGATIONS ("CMO").

CMOs are hybrid instruments with characteristics of both mortgage-backed bonds and mortgage pass-through securities. CMOs are commonly referred to as derivative securities. Similar to a bond, interest and prepaid principal on a CMO is paid, in most cases, semiannually. CMOs may be collateralized by whole mortgage loans, but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by GNMA, FHLMC, or FNMA. CMOs are structured into multiple classes, each bearing a different stated maturity. Monthly payments of principal, including prepayments, are first returned to investors holding the shortest maturity class; investors holding the longer maturity classes receive principal only after the first class has been retired.

MUNICIPAL SECURITIES

Municipal securities are debt obligations issued by or for U.S. states, territories and possessions, the District of Columbia, and their political subdivisions, agencies, and instrumentalities. Interest paid by municipal securities may be taxable or tax-exempt. The yields on municipal securities are dependent on a variety of factors, including the general level of interest rates, the financial condition of the issuer, general conditions of the taxable and tax-exempt securities market, the size of the issue, the maturity of the obligation and the

rating of the issue. Ratings are general, and not absolute, standards of quality. Consequently, securities of the same maturity, interest rate and rating may have different yields, while securities of the same maturity and interest rate with different ratings may have the same yield. Certain types of municipal bonds are issued to obtain funding for privately operated

facilities (“private activity” bonds). Under current tax law, interest income earned by the Fund from certain private activity bonds is an item of “tax preference” which is subject to the alternative minimum tax when received by a shareholder in a tax year during which the shareholder is subject to the alternative minimum tax.

Municipal bonds generally have maturities at the time of issuance ranging from one to thirty years, or more. Municipal notes generally mature in three months to three years. Municipal commercial paper generally matures in one year or less. Municipal bonds are issued to raise money for various public purposes. The two principal types of municipal bonds are general obligation bonds and revenue bonds. The Fund may invest in both in any proportion. General obligation bonds are secured by the full faith, credit and taxing power of the issuing municipality and not from any particular fund or revenue source. Revenue bonds are backed only from the revenues derived from a facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source and not from the general taxing power.

Municipal lease obligations are issued by state and local governments or authorities to finance the acquisition of equipment and facilities. Municipal leases may take the form of a lease, an installment purchase contract, a conditional sales contract or a participation certificate in any of the above. Municipal leases frequently have special risks not normally associated with general obligation or revenue bonds.

MANUFACTURED HOME LOANS

Manufactured home loans are fixed-rate loans secured by a manufactured home unit. In certain instances the loan may be collateralized by a combination of a manufactured home unit and a developed lot of land upon which the unit can be placed. Manufactured home loans are generally not mortgages; however, because of the structural and operational similarities with mortgage backed pass-through securities and the role of GNMA, industry practice often groups the securities within the spectrum of GNMA mortgage backed pass-through securities for listing purposes. Manufactured home loans have key characteristics different from mortgage-backed securities including different prepayment rates. Prepayment rates tend to fluctuate with interest rates and other economic variables. Manufactured home loan prepayment rates generally tend to be less volatile than the prepayment rates experienced by mortgage-backed securities.

CERTIFICATE OF DEPOSITS

Certificates of deposit are generally short-term, interest-bearing negotiable certificates issued by commercial banks or savings and loan associations against funds deposited in the issuing institution. Eurodollar certificates of deposit are negotiable deposits denominated in U.S. dollars on deposit with foreign branches of U.S. banks which have a specified maturity. Variable rate certificates of deposit are certificates of deposit on which the interest rate is periodically adjusted prior to their stated maturity, usually at 30, 90 or 180 day intervals ("coupon dates"), based upon a specified market rate, which is tied to the then prevailing certificate of deposit rate, with some premium paid because of the longer final maturity date of the variable rate certificate of deposit. As a result of these adjustments, the interest rate on these obligations may be increased or decreased periodically. Variable rate certificates of deposit normally carry a higher interest rate than fixed rate certificates of deposit with shorter maturities, because the bank issuing the variable rate certificate of deposit pays the investor a premium as the bank has the use of the investors' money for a longer period of time. Variable rate certificates of deposit can be sold in the secondary market.

In addition, frequently banks or dealers sell variable rate certificates of deposit and simultaneously agree, either formally or informally, to repurchase such certificates, at the option of the purchaser of the certificate, at par on the coupon dates. In connection with the Fund's purchase of variable rate certificates of deposit, it may enter into formal or informal agreements with banks or dealers allowing the Fund to resell the certificates to the bank or dealer, at the Fund's option. If the agreement to repurchase is informal, there can be no assurance that the Fund would always be able to resell such certificates. Before entering into any such transactions governed by formal agreements, however, the Fund will comply with the provisions of SEC Release 10666 which generally provides that the repurchase agreement must be fully collateralized.

BANKERS' ACCEPTANCES

A banker's acceptance is a time draft drawn on a commercial bank by a borrower usually in connection with an international commercial transaction (to finance the import, export, transfer or storage of goods). The borrower is liable for payment as well as the bank, which unconditionally guarantees to pay the draft at its face amount on the maturity date. Most acceptances have maturities of six months or less and are traded in secondary markets prior to maturity.

TIME DEPOSITS

Time deposits are deposits held in foreign branches of U.S. banks which have a specified term or maturity. Time deposits are similar to certificates of deposit, except they are not transferable, and are, therefore, illiquid prior to their maturity.

COMMERCIAL PAPER

Commercial paper (including variable amount master demand notes), are short-term, unsecured promissory notes issued by corporations to finance short-term credit needs. Commercial paper is usually sold on a discount basis and has a maturity at the time of issuance not exceeding nine months. Variable amount master demand notes are demand obligations that permit the investment of fluctuating amounts at varying market rates of interest pursuant to arrangements between the issuer and a commercial bank acting as agent for the payees of such notes, whereby both parties have the right to vary the amount of the outstanding indebtedness of the notes.

ILLIQUID AND RESTRICTED SECURITIES

The Fund may invest in illiquid securities (i.e., securities that are not readily marketable). Illiquid securities include, but are not limited to, restricted securities (securities the disposition of which is restricted under the federal securities laws), securities that may only be resold pursuant to Rule 144A under the Securities Act of 1933, as amended (the "Securities Act") but that are deemed to be illiquid; and repurchase agreements with maturities in excess of seven days. However, the Fund will not acquire illiquid securities if, as a result, such securities would comprise more than 15% of the value of the Fund's net assets. The Board of Trustees has the ultimate authority to determine, to the extent permissible under the federal securities laws, which securities are liquid or illiquid for purposes of this 15% limitation and has delegated the function of making determinations of liquidity to the Adviser. The Adviser determines and monitors the liquidity of the portfolio securities and reports periodically on its decisions to the Board. In making such determinations it takes into account a number of factors in reaching liquidity decisions, including but not limited to: (1) the frequency of trades and quotations for the security; (2) the number of dealers willing to purchase or sell the security and the number of other potential buyers; (3) the willingness of dealers to undertake to make a market in the security; and (4) the nature of the marketplace trades, including the time needed to dispose of the security, the method of soliciting offers and the mechanics of the transfer.

An institutional market has developed for certain restricted securities. Accordingly, contractual or legal restrictions on the resale of a security may not be indicative of the liquidity of the security. If such securities are eligible for purchase by institutional buyers in accordance with Rule 144A under the 1933 Act or other exemptions, the Adviser may determine that the securities are liquid, and the securities will not be included in the 15% illiquid securities limitation.

Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the Securities Act. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than that which prevailed when it decided to sell.

Illiquid securities will be priced at fair value as determined in good faith under procedures adopted by the Board of Trustees. If, through the appreciation of illiquid securities or the depreciation of liquid securities, the Fund should be in a position where more than 15% of the value of its net assets are invested in illiquid securities, including restricted securities which are not readily marketable, the Fund will take such steps as are deemed advisable, if any, to protect liquidity.

SPECIAL CONSIDERATIONS AND RISKS

A discussion of the risks associated with an investment in the Fund is contained in the Prospectus. The discussion below supplements, and should be read in conjunction with, the Prospectus.

GENERAL

Investment in the Fund should be made with an understanding that the value of the Fund's portfolio securities may fluctuate in accordance with changes in the financial condition of the issuers of the portfolio securities, the value of securities generally and other factors.

An investment in the Fund should also be made with an understanding of the risks inherent in an investment in securities, including the

risk that the financial condition of issuers may become impaired or that the general condition of the securities markets may deteriorate (either of which may cause a decrease in the value of the portfolio securities and thus in the value of Shares). Securities

are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including expectations regarding government, economic, monetary and fiscal policies, inflation and interest rates, economic expansion or contraction, and global or regional political, economic and banking crises.

Holders of common stocks incur more risk than holders of preferred stocks and debt obligations because common stockholders, as owners of the issuer, have generally inferior rights to receive payments from the issuer in comparison with the rights of creditors of, or holders of debt obligations or preferred stocks issued by, the issuer. Further, unlike debt securities which typically have a stated principal amount payable at maturity (whose value, however, will be subject to market fluctuations prior thereto), or preferred stocks which typically have a liquidation preference and which may have stated optional or mandatory redemption provisions, common stocks have neither a fixed principal amount nor a maturity. Common stock values are subject to market fluctuations as long as the common stock remains outstanding.

CYBER SECURITY RISK

Investment companies, such as the Fund, and their service providers may be subject to operational and information security risks resulting from cyber attacks. Cyber-attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber-attacks affecting the Fund or the Adviser, Sub-Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact the Fund. For instance, cyber-attacks may interfere with the processing of shareholder transactions, impact the Fund's ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject the Funds to regulatory fines or financial losses, and cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers and may cause the Fund's investment in such portfolio companies to lose value.

TAX RISKS

As with any investment, you should consider how your investment in Shares of the Fund will be taxed. The tax information in the Prospectus and this SAI is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares of the Fund.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when the Fund makes distributions or you sell Shares.

CONTINUOUS OFFERING

The method by which Creation Units of Shares are created and sold may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Trust on an ongoing basis, at any point a "distribution," as such term is used in the Securities Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares, and sells such Shares directly to customers, or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. Firms that incur a prospectus-delivery obligation with respect to Shares of the Fund are reminded that under Securities Act Rule 153, a prospectus-delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that the Fund's prospectus is available at the Exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

INVESTMENT RESTRICTIONS

The Trust has adopted the following investment restrictions as fundamental policies with respect to the Fund. These restrictions cannot be changed with respect to the Fund without the approval of the holders of a majority of the Fund's outstanding voting securities. For the purposes of the 1940 Act, a "majority of outstanding shares" means the vote of the lesser of: (1) 67% or more of the voting securities of the Fund present at the meeting if the holders of more than 50% of the Fund's outstanding voting securities are present or represented by proxy; or (2) more than 50% of the outstanding voting securities of the Fund. Except with the approval of a majority of the outstanding voting securities, the Fund may not:

1. Concentrate its investments in an industry or group of industries (*i.e.*, hold 25% or more of its net assets in the stocks of a particular industry or group of industries). For purposes of this limitation, securities of the U.S. government (including its agencies and instrumentalities), and securities of state or municipal governments and their political subdivisions are not considered to be issued by members of any industry.
2. Borrow money or issue senior securities (as defined under the 1940 Act), except to the extent discussed above in utilizing reverse repurchase agreements and for short-term or emergency purposes, and permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
3. Lend any security or make any other loan, except to the extent discussed above in utilizing repurchase agreements, and permitted under the 1940 Act the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
4. Purchase or sell commodities or real estate, except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
5. Underwrite securities issued by other persons, except to the extent permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
6. Purchase securities of an issuer if such purchase is inconsistent with the maintenance of its status as an open-end diversified company under the 1940 Act, the rules or regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.

In addition to the investment restrictions adopted as fundamental policies as set forth above, the Fund observes the following restrictions, which may be changed without a shareholder vote.

1. The Fund will not invest in illiquid assets in excess of 15% of its net assets. An illiquid asset is any asset that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the asset.
2. The Fund will not invest in the securities of another investment company (the "acquired company") if the Fund, immediately after such purchase or acquisition, owns in the aggregate: (i) more than 3% of the total outstanding voting stock of the acquired company; (ii) securities issued by the acquired company having an aggregate value in excess of 5% of the value of the total assets of the Fund; or (iii) securities issued by the acquired company and all other investment companies (other than Treasury stock of the Fund) having an aggregate value in excess of 10% of the value of the total assets of the Fund.
3. The Fund will not invest in CMO tranches that may represent a right to receive interest only (IOs), principal only (POs), or an amount that remains after floating-rate tranches are paid (an inverse floater).
4. The Fund will not invest in commodities, futures contracts, or options contracts.

If a percentage limitation is adhered to at the time of investment or contract, a later increase or decrease in percentage resulting from any change in value or total or net assets will not result in a violation of such restriction, except that the percentage limitations with respect to the borrowing of money and illiquid securities will be observed continuously.

The following descriptions of certain provisions of the 1940 Act may assist investors in understanding the above policies and restrictions:

Concentration. The SEC has defined concentration as investing 25% or more of an investment company's net assets in an industry or group of industries, with certain exceptions.

Borrowing. The 1940 Act presently allows a fund to borrow from any bank (including pledging, mortgaging or hypothecating assets) in an amount up to 33 1/3% of its total assets (not including temporary borrowings not in excess of 5% of its total assets).

Senior Securities. Senior securities may include any obligation or instrument issued by a fund evidencing indebtedness. The 1940 Act generally prohibits funds from issuing senior securities, although it does not treat certain transactions as senior securities, such as certain borrowings, short sales, reverse repurchase agreements, firm commitment agreements and standby commitments, with appropriate earmarking or segregation of assets to cover such obligation.

Lending. Under the 1940 Act, a fund may only make loans if expressly permitted by its investment policies. The Fund's current investment policy on lending is as follows: the Fund may not make loans if, as a result, more than 33 1/3% of its total assets would be lent to other parties, except that the Fund may: (i) purchase or hold debt instruments in accordance with its investment objective and policies; (ii) enter into repurchase agreements; and (iii) engage in securities lending subject to the limitations described in this SAI.

Underwriting. Under the 1940 Act, underwriting securities involves a fund purchasing securities directly from an issuer for the purpose of selling (distributing) them or participating in any such activity either directly or indirectly.

Real Estate. The 1940 Act does not directly restrict an investment company's ability to invest in real estate, but does require that every investment company have a fundamental investment policy governing such investments. The Fund will not purchase or sell real estate, except that the Fund may purchase marketable securities issued by companies which own or invest in real estate (including REITs).

Commodities. The Fund will not purchase or sell physical commodities or commodities contracts, except that the Fund may purchase: (i) marketable securities issued by companies which own or invest in commodities or commodities contracts; and (ii) commodities contracts relating to financial instruments, such as financial futures contracts and options on such contracts.

Diversification. Under the 1940 Act and the rules, regulations and interpretations thereunder, a "diversified company," as to 75% of its total assets, may not purchase securities of any issuer (other than obligations of, or guaranteed by, the U.S. government or its agencies, or instrumentalities or securities of other investment companies) if, as a result, more than 5% of its total assets would be invested in the securities of such issuer, or more than 10% of the issuer's voting securities would be held by the Fund. For purposes of the Fund's diversification policy, the identification of the issuer of a security may be determined in any reasonable manner, consistent with SEC guidance.

EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in the Fund is contained in the summary section of the Fund's Prospectus under the "PURCHASE AND SALE OF FUND SHARES" and in the statutory Prospectus under "BUYING AND SELLING THE FUND." The discussion below supplements, and should be read in conjunction with, such sections of the Prospectus.

The Shares of the Fund are approved for listing and trading on the Exchange, subject to notice of issuance. The Shares trade on the Exchange at prices that may differ to some degree from their net asset value. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of Shares of the Fund will continue to be met.

The Exchange may, but is not required to, remove the Shares of the Fund from listing if: (1) following the initial twelve-month period beginning upon the commencement of trading of the Fund, there are fewer than 50 beneficial holders of the Shares for 30 or more consecutive trading days; (2) the value of its Underlying Index or portfolio of securities on which the Fund is based is no longer calculated or available; (3) the "indicative optimized portfolio value" ("IOPV") of the Fund is no longer calculated or available; or (4) such other event shall occur or condition exists that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. In addition, the Exchange will remove the Shares from listing and trading upon termination of the Trust or the Fund.

The Exchange (or market data vendors or other information providers) will disseminate, every fifteen seconds during the regular trading day, an IOPV relating to the Fund. The IOPV calculations are estimates of the value of the Fund's NAV per Share and are based on the Fund's portfolio holdings and cash, less accrued expenses, divided by the number of shares of the Fund outstanding as of

the time of the prior day's NAV calculation. Premiums and discounts between the IOPV and the market price may occur.

The IOPV does not necessarily reflect the precise composition of the current portfolio of securities held by the Fund at a particular point in time or the best possible valuation of the current portfolio. Therefore, it should not be viewed as a “real-time” update of the NAV per Share of the Fund, which is calculated only once a day. The quotations of certain Fund holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States. Additionally, the calculation of the NAV may reflect the fair values of certain Fund holdings, which may result in different prices than those used in the calculations of the IOPV. Neither the Fund nor the Adviser, nor any of their affiliates are involved in, or responsible for, the calculation or dissemination of such IOPVs and make no warranty as to their accuracy.

The Trust reserves the right to adjust the Share price of the Fund in the future to maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

As in the case of other publicly traded securities, brokers’ commissions on transactions will be based on negotiated commission rates at customary levels.

The base and trading currencies of the Fund is the U.S. dollar. The base currency is the currency in which the Fund’s net asset value per Share is calculated and the trading currency is the currency in which Shares of the Fund are listed and traded on the Exchange.

MANAGEMENT OF THE TRUST

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Fund Management.”

TRUSTEES AND OFFICERS OF THE TRUST

Board Responsibilities. The management and affairs of the Trust and the Fund described in this SAI, are overseen by the Trustees. The Board elects the officers of the Trust who are responsible for administering the day-to-day operations of the Trust and the Fund. The Board has approved contracts, as described below, under which certain companies provide essential services to the Trust.

Like most registered investment companies, the day-to-day business of the Trust, including the management of risk, is performed by third party service providers, such as the Adviser, the Distributor and the Administrator. The Trustees are responsible for overseeing the Trust’s service providers and, thus, have oversight responsibility with respect to risk management performed by those service providers. Risk management seeks to identify and address risks, *i.e.*, events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Fund. The Fund and its service providers employ a variety of processes, procedures and controls to identify various of those possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust’s business (*e.g.*, the Adviser is responsible for the day-to-day management of the Fund’s portfolio investments) and, consequently, for managing the risks associated with that business. The Board has emphasized to the Fund’s service providers the importance of maintaining vigorous risk management.

The Trustees’ role in risk oversight begins before the inception of a Fund, at which time certain of the Fund’s service providers present the Board with information concerning the investment objectives, strategies and risks of the Fund as well as proposed investment limitations for the Fund. Additionally, the Fund’s Adviser provides the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board continues its oversight function as various personnel, including the Trust’s Chief Compliance Officer, as well as personnel of the Adviser and other service providers such as the Fund’s independent accountants, make periodic reports to the Audit Committee or to the Board with respect to various aspects of risk management. The Board and the Audit Committee oversee efforts by management and service providers to manage risks to which the Fund may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the Fund by the Adviser and receives information about those services at its regular meetings. In addition, on an annual basis, in connection with its consideration of whether to renew the Advisory Agreements with the Adviser, the Board meets with the Adviser to review such services. Among other things, the Board regularly considers the Adviser’s adherence to the Fund’s investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations. The Board also reviews information about the Fund’s performance and the Fund’s investments, including, for example, portfolio holdings schedules.

The Trust's Chief Compliance Officer reports regularly to the Board to review and discuss compliance issues and Fund and Adviser risk assessments. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the Adviser. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; any material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and any material compliance matters since the date of the last report.

The Board receives reports from the Fund's service providers regarding operational risks and risks related to the valuation and liquidity of portfolio securities. The Board has also established a Fair Value Committee that is responsible for implementing the Trust's Fair Value Procedures and providing reports to the Board concerning investments for which market quotations are not readily available. Annually, the independent registered public accounting firm reviews with the Audit Committee its audit of the Fund's financial statements, focusing on major areas of risk encountered by the Fund and noting any significant deficiencies or material weaknesses in the Fund's internal controls. Additionally, in connection with its oversight function, the Board oversees Fund management's implementation of disclosure controls and procedures, which are designed to ensure that information required to be disclosed by the Trust in its periodic reports with the SEC are recorded, processed, summarized, and reported within the required time periods. The Board also oversees the Trust's internal controls over financial reporting, which comprise policies and procedures designed to provide reasonable assurance regarding the reliability of the Trust's financial reporting and the preparation of the Trust's financial statements.

From their review of these reports and discussions with the Adviser, the Chief Compliance Officer, the independent registered public accounting firm and other service providers, the Board and the Audit Committee learn in detail about the material risks of the Fund, thereby facilitating a dialogue about how management and service providers identify and mitigate those risks.

The Board recognizes that not all risks that may affect the Fund can be identified and/or quantified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. Most of the Fund's investment management and business affairs are carried out by or through the Fund's Adviser and other service providers each of which has an independent interest in risk management but whose policies and the methods by which one or more risk management functions are carried out may differ from the Fund's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's ability to monitor and manage risk, as a practical matter, is subject to limitations.

Members of the Board. There are three members of the Board, two of whom are not interested persons of the Trust, as that term is defined in the 1940 Act ("Independent Trustees"). Samuel Masucci, III, an interested person of the Trust, serves as Chairman of the Board. The Trust does not have a lead Independent Trustee. The Board is comprised of 67% Independent Trustees. There is an Audit Committee of the Board that is chaired by an Independent Trustee and comprised solely of Independent Trustees. The Audit Committee chair presides at the Committee meetings, participates in formulating agendas for Committee meetings, and coordinates with management to serve as a liaison between the Independent Trustees and management on matters within the scope of responsibilities of the Committee as set forth in its Board-approved charter. Because of the ease of communication arising from the relatively small size of the Board and the small number of Independent Trustees, the Board has determined not to designate a lead Independent Trustee at this time.

The Trust has determined its leadership structure is appropriate given the specific characteristics and circumstances of the Trust. The Trust made this determination in consideration of, among other things, the fact that the Independent Trustees constitute 67% of the Board, the number of Independent Trustees that constitute the Board, the amount of assets under management in the Trust, and the number of funds overseen by the Board. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the Independent Trustees from Fund management.

The Board of Trustees has two standing committees: the Audit Committee and Nominating Committee. The Audit Committee and Nominating Committee are chaired by an Independent Trustee and composed of Independent Trustees.

Set forth below are the names, birth years, positions with the Trust, length of term of office, and the principal occupations and other directorships held during at least the last five years of each of the persons currently serving as a Trustee of the Trust, as well as information about each officer. The business address of each Trustee and officer is 30 Maple Street, 2nd Floor, Summit, New Jersey 07901.

| Name and Year of Birth | Position(s) Held with the Trust, Term of Office and Length of Time Served | Principal Occupation(s) During Past 5 Years | Number of Portfolios in Fund Complex Overseen By Trustee | Other Directorships Held by Trustee During Past 5 Years |
|--|---|--|--|---|
| Interested Trustee and Officers | | | | |
| Samuel Masucci, III (1962) | Trustee, Chairman of the Board and President (since 2012); Secretary (since 2014) | Chief Executive Officer, Exchange Traded Managers Group LLC (since 2013); Chief Executive Officer, ETF Managers Group LLC (since 2016); Chief Executive Officer, ETF Managers Capital LLC (commodity pool operator) (since 2014); Chief Executive Officer (2012--2016) and Chief Compliance Officer (2012--2014), Factor Advisors, LLC (investment adviser); President and Chief Executive Officer, Factor Capital Management LLC (2012-2014) (commodity pool operator); | 10 | None |
| John A. Flanagan, (1946) | Treasurer (since 2015) | President, John A. Flanagan CPA, LLC (accounting services) (since 2010); Treasurer, ETF Managers Trust (since 2015); Chief Financial Officer, ETF Managers Capital LLC (commodity pool operator) (since 2015) | n/a | n/a |
| Reshma A. Tanczos (1978) | Chief Compliance Officer (since 2016) | Chief Compliance Officer, ETF Managers Group LLC (since 2016); Chief Compliance Officer, ETF Managers Capital LLC (since 2016); Partner, Crow & Cushing (law firm) (2007-2016). | n/a | n/a |

* Mr. Masucci is an interested Trustee by virtue of his role as the Chief Executive Officer of the Adviser.

| Name and Year of Birth | Position(s) Held with the Trust, Term of Office and Length of Time Served | Principal Occupation(s) During Past 5 Years | Number of Portfolios in Fund Complex Overseen By Trustee | Other Directorships Held by Trustee During Past 5 Years |
|-----------------------------|---|---|--|---|
| Independent Trustees | | | | |
| Terry Loeb (1963) | Trustee (since 2014) | Founder and Managing Member, Pulsenomics LLC (index product development and consulting firm) (since 2011); Managing Director, MacroMarkets, LLC (exchange-traded products firm) (2006-2011). | 10 | None |
| Jared A. Chase (1955) | Trustee (since 2018) | Chief Operating and Financial Officer, Root Capital (a 501(c)(3) non-profit lender); Chairman, State Street Global Alliance LLC, State Street Corporation (2007-2012); Head of Global Treasury, Liability Management, Money Markets & Derivatives, State Street Corporation (2004-2007) | 10 | None |

Individual Trustee Qualifications. The Trust has concluded that each of the Trustees should serve on the Board because of their ability to review and understand information about the Fund provided to them by management, to identify and request other information they may deem relevant to the performance of their duties, to question management and other service providers regarding

material factors bearing on the management and administration of the Fund, and to exercise their business judgment in a manner that serves the best interests of the Fund's shareholders. The Trust has concluded that each of the Trustees should serve as a Trustee based on their own experience, qualifications, attributes and skills as described below.

The Trust has concluded that Mr. Masucci should serve as Trustee because of the experience he has gained as chief executive officer of multiple investment advisory firms as well as his knowledge of and experience in the financial services industry.

The Trust has concluded that Mr. Loeb should serve as Trustee because of his diverse experience in capital markets, including asset pricing and trading, market research, index development, and exchange-traded products, as well as his knowledge of and experience in the financial services industry.

The Trust has concluded that Mr. Chase should serve as Trustee because of his executive experience at major investment advisory firms focusing on global markets and derivatives, and his general knowledge of and experience in the financial services industry.

BOARD COMMITTEES

The Board has established the following standing committees:

Audit Committee. The Board has a standing Audit Committee that is composed of 100% of the Independent Trustees of the Trust. The Audit Committee operates under a written charter approved by the Board. The principal responsibilities of the Audit Committee include: recommending which firm to engage as the Fund's independent registered public accounting firm and whether to terminate this relationship; reviewing the independent registered public accounting firm's compensation, the proposed scope and terms of its engagement, and the firm's independence; pre-approving audit and non-audit services provided by the Fund's independent registered public accounting firm to the Trust and certain other affiliated entities; serving as a channel of communication between the independent registered public accounting firm and the Trustees; reviewing the results of each external audit, including any qualifications in the independent registered public accounting firm's opinion, any related management letter, management's responses to recommendations made by the independent registered public accounting firm in connection with the audit, reports submitted to the Committee by the internal auditing department of the Trust's Administrator that are material to the Trust as a whole, if any, and management's responses to any such reports; reviewing the Fund's audited financial statements and considering any significant disputes between the Trust's management and the independent registered public accounting firm that arose in connection with the preparation of those financial statements; considering, in consultation with the independent registered public accounting firm and the Trust's senior internal accounting executive, if any, the independent registered public accounting firms' report on the adequacy of the Trust's internal financial controls; reviewing, in consultation with the Fund's independent registered public accounting firm, major changes regarding auditing and accounting principles and practices to be followed when preparing the Fund's financial statements; and other audit related matters. All of the Independent Trustees currently serve as members of the Audit Committee. The Audit Committee also acts as the Trust's qualified legal compliance committee. During the fiscal year ended September 30, 2018, the Audit Committee met three times.

Nominating Committee. The Board has a standing Nominating Committee that is composed of 100% of the Independent Trustees of the Trust. The Nominating Committee operates under a written charter approved by the Board. The principal responsibility of the Nominating Committee is to consider, recommend and nominate candidates to fill vacancies on the Trust's Board, if any. The Nominating Committee generally will not consider nominees recommended by shareholders. All of the Independent Trustees currently serve as members of the Nominating Committee. During the fiscal year ended September 30, 2018, the Nominating Committee did not meet.

Fair Value Committee. In addition to the Board's standing committees described above, the Board has established a Fair Value Committee that is composed of certain officers of the Trust and representatives from the Adviser. The Fair Value Committee operates under procedures approved by the Board. The Fair Value Committee is responsible for the valuation and revaluation of any portfolio investments for which market quotations or prices are not readily available. The Fair Value Committee meets periodically, as necessary.

OWNERSHIP OF SHARES

The following table shows the dollar amount ranges of each Trustee's "beneficial ownership" of shares of the Fund as of the end of the most recently completely calendar year. Dollar amount ranges disclosed are established by the SEC. "Beneficial ownership" is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act. As of December 31, 2018, the Trustees and officers of the Trust owned less than 1% of the outstanding shares of the Fund.

| Name | Dollar Range of Shares of the Fund | Aggregate Dollar Range of Shares (All Funds in the Complex) |
|-----------------------------|------------------------------------|--|
| Interested Trustee | | |
| Samuel Masucci, III | None | None |
| Independent Trustees | | |
| Terry Loeb | None | None |
| Jared A. Chase | None | None |

COMPENSATION OF THE TRUSTEES AND OFFICER

The Trustees received the following compensation during the fiscal year ended September 30, 2018. The Adviser, and not the Fund, is responsible for compensating the Trustees.

| Name | Aggregate Compensation | Pension or Retirement Benefits Accrued as Part of Fund Expenses | Estimated Annual Benefits Upon Retirement | Total Compensation from the Trust and Fund Complex |
|-----------------------------|------------------------|---|---|--|
| Interested Trustee | | | | |
| Samuel Masucci, III | \$0 | \$0 | \$0 | \$0 |
| Independent Trustees | | | | |
| John W. Southard* | \$0 | \$0 | \$0 | \$25,667 |
| Terry Loeb | \$0 | \$0 | \$0 | \$59,922 |
| Jared Chase* | \$0 | \$0 | \$0 | \$34,255 |

* Effective March 8, 2018, Mr. Chase replaced Mr. Southard as an Independent Trustee.

CODES OF ETHICS

The Trust, the Adviser, and ETFMG Financial LLC (the “Distributor”) have each adopted codes of ethics pursuant to Rule 17j-1 of the 1940 Act. These codes of ethics are designed to prevent affiliated persons of the Trust, the Adviser, and the Distributor from engaging in deceptive, manipulative or fraudulent activities in connection with securities held or to be acquired by the Fund (which may also be held by persons subject to the codes of ethics). Each Code of Ethics permits personnel subject to that Code of Ethics to invest in securities for their personal investment accounts, subject to certain limitations, including limitations related to securities that may be purchased or held by the Fund.

There can be no assurance that the codes of ethics will be effective in preventing such activities. Each code of ethics has been filed with the SEC and may be examined at the office of the SEC in Washington, D.C. or on the Internet at the SEC’s website at <http://www.sec.gov>.

PROXY VOTING POLICIES

The Fund has delegated proxy voting responsibilities to the Adviser, subject to the Board’s oversight. In delegating proxy responsibilities, the Board has directed that proxies be voted consistent with the Fund’s and its shareholders’ best interests and in compliance with all applicable proxy voting rules and regulations. The Adviser has adopted proxy voting policies and guidelines for this purpose (“Proxy Voting Policies”) and may engage a third party proxy solicitation firm to assist with voting proxies in a timely manner, while the CCO is responsible for monitoring the effectiveness of the Proxy Voting Policies. The Adviser has engaged Broadridge Financial Solutions, Inc. to assist the CCO in carrying out the Trust’s Proxy Voting Policies. The Proxy Voting Policies have been adopted by the Trust as the policies and procedures that the Adviser will use when voting proxies on behalf of the Fund.

The Proxy Voting Policies address, among other things, material conflicts of interest that may arise between the interests of the Fund and the interests of the Adviser. The Proxy Voting Policies will ensure that all issues brought to shareholders are analyzed in light of the Adviser’s fiduciary responsibilities.

In voting to elect board nominees for uncontested seats, the following factors will be taken into account: (i) whether a majority of the company’s directors are independent; (ii) whether key board committees are entirely composed of independent directors; (iii) excessive board memberships and professional time commitments to effectively serve the company’s board; and (iv) the attendance record of incumbent directors at board and committee meetings.

Equity compensation plans will also be reviewed on a case-by-case basis based upon their specific features. For example, stock option plans will be evaluated using criteria such as: (i) whether the plan is performance-based; (ii) dilution to existing shareholders; (iii) the

cost of the plan; (iv) whether discounted options are allowed under the plan; (v) whether the plan authorizes the repricing of options or reload options without shareholder approval; and (vi) the equity overhang of all plans. Similarly, employee stock purchase plans generally will be supported under the guidelines upon consideration of factors such as (i) whether the plan sets forth adequate limits on share issuance; (ii) whether participation limits are defined; and (iii) whether discounts to employees exceed a threshold amount.

The Proxy Voting Policies provide for review and vote on shareholder proposals on a case-by-case basis. In accordance with this approach, these guidelines support a shareholder proposal upon the compelling showing that it has a substantial economic impact on shareholder value. As such, proposals that request that the company report on environmental, labor or human rights issues are only supported when such concerns pose a substantial risk to shareholder value.

With regard to voting proxies of foreign companies, the Adviser may weigh the cost of voting, and potential inability to sell the securities (which may occur during the voting process), against the benefit of voting the proxies to determine whether or not to vote.

Information on how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available (1) without charge, upon request, by calling 1-844-ETFMGRS (383-6477) and (2) on the SEC's website at www.sec.gov.

INVESTMENT ADVISORY AND OTHER SERVICES

ETF Managers Group LLC, a Delaware limited liability company located at 30 Maple Street, 2nd Floor, Summit, New Jersey 07901, serves as the investment adviser to the Fund. The Adviser is a wholly-owned subsidiary of Exchange Traded Managers Group, LLC, an entity controlled by Samuel Masucci, III, the Adviser's Chief Executive Officer and a Trustee and Chairman of the Board of the Trust.

The Trust and the Adviser have entered into an investment advisory agreement (the "Advisory Agreement") with respect to the Fund. Under the Advisory Agreement, the Adviser serves as the investment adviser, makes investment decisions for the Fund, and manages the investment portfolios of the Fund, subject to the supervision of, and policies established by, the Board. The Advisory Agreement provides that the Adviser shall not be protected against any liability to the Trust or its shareholders by reason of willful misfeasance, bad faith or gross negligence generally in the performance of its duties hereunder or its reckless disregard of its obligation and duties under the Advisory Agreement.

After the initial two-year term, the continuance of the Advisory Agreement must be specifically approved at least annually: (i) by the vote of the Trustees or by a vote of the shareholders of the Fund; and (ii) by the vote of a majority of the Trustees who are not parties to the Advisory Agreement or "interested persons" or of any party thereto, cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement will terminate automatically in the event of its assignment, and is terminable at any time without penalty by the Trustees of the Trust or, with respect to the Fund, by a majority of the outstanding voting securities of the Fund, or by the Adviser on not more than 60 days' nor less than 30 days' written notice to the Trust. As used in the Advisory Agreement, the terms "majority of the outstanding voting securities," "interested persons" and "assignment" have the same meaning as such terms in the 1940 Act.

For its services, the Adviser receives a fee that is equal to 0.30% per annum of the average daily net assets of the Fund, calculated daily and paid monthly. Additionally, under the Investment Advisory Agreement, the Adviser has agreed to pay all expenses of the Fund, except for: the fee paid to the Adviser pursuant to the Investment Advisory Agreement, interest charges on any borrowings, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses (including, but not limited to, non-standard Board-related expenses and litigation against the Board, Trustees, Funds, Adviser, and officers of the Adviser), and distribution (12b-1) fees and expenses.

Sit Fixed Income Advisors II, LLC, a Delaware Limited Liability Company located at 3300 IDS Center, 80 South 8th Street, Minneapolis, MN 55402, serves as the investment sub-adviser to the Fund. The Sub-Adviser is majority-owned and controlled by Sit Investment Associates, Inc.

The Adviser and the Sub-Adviser have entered into an investment sub-advisory agreement (the "Sub-Advisory Agreement") with respect to the Fund. Under the Sub-Advisory Agreement, the Sub-Adviser serves as the investment sub-adviser and is responsible for the day-to-day management of the Fund, subject to the supervision of the Adviser and the Board. For its services, the Sub-Adviser receives an annual fee of 0.10% based on the average daily net assets of the Fund, calculated daily and paid monthly. The Fund does not directly pay the Sub-Adviser. The Adviser is responsible for paying the entire amount of the Sub-Adviser's fee for each Fund. The Sub-Advisory Agreement provides that the Sub-Adviser shall not be protected against any liability by reason of the Sub-Adviser's (i) willful misfeasance, bad faith or gross negligence, (ii) reckless disregard of its duties under the Sub-Advisory Agreement, or (iii) breach of a fiduciary duty, that results in a loss.

THE PORTFOLIO MANAGERS

This section includes information about the Fund's portfolio managers, including information about other accounts they manage, the dollar range of Shares they own and how they are compensated.

COMPENSATION

Bryce A. Doty, Mark H. Book, CFA, CMA, and Christopher M. Rasmussen, CFA are the portfolios managers of the Fund. The Sub-Adviser, and not the Fund, is responsible for compensating the portfolio managers. The compensation of the portfolio managers is comprised of a fixed base salary, an annual bonus, and periodic deferred compensation bonuses. The bonus awards are based on the attainment of personal and company goals, which are comprised of a number of factors, including: the annual composite investment performance of the Sit Investment's accounts (which may include the Fund) relative to the investment accounts' benchmark index; Sit Investment's growth in assets under management from new assets (which may include assets of the Fund); profitability of Sit Investment; and the quality of investment research efforts.

SHARES OWNED BY PORTFOLIO MANAGERS

As of the date of this SAI, the portfolio managers did not beneficially own Shares of the Fund.

OTHER ACCOUNTS

In addition to the Fund, the portfolio managers managed the following other accounts as of December 31, 2018:

Bryce A. Doty

| Type of Accounts | Total Number of Accounts | Total Assets of Accounts (millions) | Total Number of Accounts with Performance Based Fees | Total Assets of Accounts with Performance Based Fees (millions) |
|----------------------------------|--------------------------|-------------------------------------|--|---|
| Registered Investment Companies | 3 | \$536.96 | 0 | \$0 |
| Other Pooled Investment Vehicles | 20 | \$940.24 | 16 | \$453.48 |
| Other Accounts | 89 | \$5,250.59 | 21 | \$520.54 |

Mark H. Book

| Type of Accounts | Total Number of Accounts | Total Assets of Accounts (millions) | Total Number of Accounts with Performance Based Fees | Total Assets of Accounts with Performance Based Fees (millions) |
|----------------------------------|--------------------------|-------------------------------------|--|---|
| Registered Investment Companies | 3 | \$536.96 | 0 | \$0 |
| Other Pooled Investment Vehicles | 20 | \$940.24 | 16 | \$453.48 |
| Other Accounts | 89 | \$5,250.59 | 21 | \$520.54 |

Christopher M. Rasmussen

| Type of Accounts | Total Number of Accounts | Total Assets of Accounts (millions) | Total Number of Accounts with Performance Based Fees | Total Assets of Accounts with Performance Based Fees (millions) |
|----------------------------------|--------------------------|-------------------------------------|--|---|
| Registered Investment Companies | 3 | \$536.96 | 0 | \$0 |
| Other Pooled Investment Vehicles | 20 | \$940.24 | 16 | \$453.48 |
| Other Accounts | 88 | \$5,219.52 | 20 | \$489.48 |

CONFLICTS OF INTEREST

The portfolio managers' management of "other accounts" is not expected to give rise to potential conflicts of interest in connection with their management of the Fund's investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objectives as the Fund. Therefore, potential conflict of interest may arise as a result of the identical investment objectives, whereby a portfolio manager could favor one account over another. Another potential conflict could include a portfolio manager's knowledge about the size, timing, and possible market impact of Fund trades, whereby a portfolio manager could use this information to the advantage of other accounts and to the disadvantage of the Fund. However,

the Sub-Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts the Sub-Adviser manages are fairly and equitably allocated.

THE DISTRIBUTOR

The Trust and ETFMG Financial LLC, an affiliate of the Adviser, are parties to a distribution agreement (the “Distribution Agreement”), whereby the Distributor acts as principal underwriter for the Trust’s shares and distributes the shares of the Fund. Shares are continuously offered for sale by the Distributor only in Creation Units. Each Creation Unit is made up of 25,000 Shares. The Distributor will not distribute Shares in amounts less than a Creation Unit and does not maintain a secondary market in Fund Shares. The principal business address of the Distributor is 30 Maple Street, 2nd Floor, Summit, New Jersey 07901.

Under the Distribution Agreement, the Distributor, as agent for the Trust, will receive orders for the purchase and redemption of Creation Units, provided that any subscriptions and orders will not be binding on the Trust until accepted by the Trust. The Distributor will deliver a prospectus to authorized participants purchasing Shares in Creation Units and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934 (the “Exchange Act”) and a member of the Financial Industry Regulatory Authority (“FINRA”).

Upon direction from the Trust, the Distributor may also enter into agreements with securities dealers (“Soliciting Dealers”) who will solicit purchases of Creation Units of Shares. Such Soliciting Dealers may also be Authorized Participants (as discussed in “Procedures for Creation of Creation Units” below) or DTC Participants (as defined below).

The Distribution Agreement will continue for two years from its effective date and is renewable thereafter. The continuance of the Distribution Agreement must be specifically approved at least annually (i) by the vote of the Trustees or by a vote of the shareholders of the Fund and (ii) by the vote of a majority of the Trustees who are not “interested persons” of the Trust and have no direct or indirect financial interest in the operations of the Distribution Agreement or any related agreement, cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement is terminable without penalty by the Trust on 60 days’ written notice when authorized either by majority vote of its outstanding voting shares or by a vote of a majority of its Board (including a majority of the Independent Trustees), or by the Distributor on 60 days written notice, and will automatically terminate in the event of its assignment. The Distribution Agreement provides that in the absence of willful misfeasance, bad faith or negligence on the part of the Distributor, or reckless disregard by it of its obligations thereunder, the Distributor shall not be liable for any action or failure to act in accordance with its duties thereunder.

Distribution Plan. The Trust has adopted a Distribution Plan (the “Plan”) in accordance with the provisions of Rule 12b-1 under the 1940 Act, which regulates circumstances under which an investment company may directly or indirectly bear expenses relating to the distribution of its shares. No distribution fees are currently charged to the Fund; there are no plans to impose these fees.

Continuance of the Plan must be approved annually by a majority of the Trustees of the Trust and by a majority of the Trustees who are not interested persons (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the Plan or in any agreements related to the Plan (“Qualified Trustees”). The Plan requires that quarterly written reports of amounts spent under the Plan and the purposes of such expenditures be furnished to and reviewed by the Trustees. The Plan may not be amended to increase materially the amount that may be spent thereunder without approval by a majority of the outstanding shares of any class of the Fund that is affected by such increase. All material amendments of the Plan will require approval by a majority of the Trustees of the Trust and of the Qualified Trustees.

The Plan provides that Shares (“Shares”) of the Fund pay the Distributor an annual fee of up to a maximum of 0.25% of the average daily net assets of the Shares. Under the Plan, the Distributor may make payments pursuant to written agreements to financial institutions and intermediaries such as banks, savings and loan associations and insurance companies including, without limit, investment counselors, broker-dealers and the Distributor’s affiliates and subsidiaries (collectively, “Agents”) as compensation for services and reimbursement of expenses incurred in connection with distribution assistance. The Plan is characterized as a compensation plan since the distribution fee will be paid to the Distributor without regard to the distribution expenses incurred by the Distributor or the amount of payments made to other financial institutions and intermediaries. The Trust intends to operate the Plan in accordance with its terms and with FINRA rules concerning sales charges.

Under the Plan, subject to the limitations of applicable law and regulations, the Fund is authorized to compensate the Distributor up to the maximum amount to finance any activity primarily intended to result in the sale of Creation Units of the Fund or for providing or

arranging for others to provide shareholder services and for the maintenance of shareholder accounts. Such activities may include, but are not limited to: (i) delivering copies of the Fund's then current reports, prospectuses, notices, and similar materials, to prospective purchasers of Creation Units; (ii) marketing and promotional services, including advertising; (iii) paying the costs of and compensating others, including Authorized Participants with whom the Distributor has entered into written

Authorized Participant Agreements, for performing shareholder servicing on behalf of the Fund; (iv) compensating certain Authorized Participants for providing assistance in distributing the Creation Units of the Fund, including the travel and communication expenses and salaries and/or commissions of sales personnel in connection with the distribution of the Creation Units of the Fund; (v) payments to financial institutions and intermediaries such as banks, savings and loan associations, insurance companies and investment counselors, broker-dealers, mutual fund supermarkets and the affiliates and subsidiaries of the Trust's service providers as compensation for services or reimbursement of expenses incurred in connection with distribution assistance; (vi) facilitating communications with beneficial owners of Shares, including the cost of providing (or paying others to provide) services to beneficial owners of Shares, including, but not limited to, assistance in answering inquiries related to Shareholder accounts, and (vi) such other services and obligations as are set forth in the Distribution Agreement.

THE ADMINISTRATOR

The Trust, on behalf of the Fund, and U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (the "Administrator") have entered into an administration agreement (the "Administration Agreement"), under which the Administrator provides the Fund with administrative services, including regulatory reporting and all necessary office space, equipment, personnel and facilities. Pursuant to a schedule to the Administration Agreement, the Administrator also serves as the shareholder servicing agent for the Fund whereby the Administrator provides certain shareholder services to the Fund. The principal business address of the Administrator is 615 East Michigan Street, Milwaukee, Wisconsin 53202.

The Administration Agreement provides that the Administrator shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the matters to which the Administration Agreement relates, except a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Administrator in the performance of its duties or from reckless disregard by it of its duties and obligations thereunder.

For its services under the Administration Agreement, the Administrator is entitled to a fee based on the average daily net assets of the Fund and subject to a minimum annual fee.

The Adviser is responsible for paying the Administrator its fee under the Administration Agreement. Any decrease in the Administrator's fee will decrease the amount the Adviser is obligated to pay to the Administrator.

The Fund is new and has not paid any amount to the Administrator for administration services.

THE CUSTODIAN

U.S. Bank National Association (the "Custodian"), Custody Operations, 1555 North Rivercenter Drive, Suite 302, Milwaukee, Wisconsin 53212, serves as the custodian of the Fund. The Custodian holds cash, securities and other assets of the Fund as required by the 1940 Act.

THE TRANSFER AGENT

U.S. Bancorp Fund Services, LLC (the "Transfer Agent"), 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as the Fund's transfer agent and dividend disbursing agent under a transfer agency agreement with the Trust.

LEGAL COUNSEL

Sullivan & Worcester LLP, 1666 K Street NW, Washington, D.C. 20006, serves as legal counsel to the Trust.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

WithumSmith + Brown, PC, 1411 Broadway, 9th Floor, New York, New York 10018, serves as the independent registered public accounting firm for the Fund.

DESCRIPTION OF SHARES

The Declaration of Trust authorizes the issuance of an unlimited number of funds and shares of each fund. Each share of a fund

represents an equal proportionate interest in that fund with each other share. Shares are entitled upon liquidation to a pro rata share in the net assets of the fund. Shareholders have no preemptive rights. The Declaration of Trust provides that the Trustees of the Trust may create additional series or classes of shares. All consideration received by the Trust for shares of any additional funds

and all assets in which such consideration is invested would belong to that fund and would be subject to the liabilities related thereto. Share certificates representing shares will not be issued. The Fund's shares, when issued, are fully paid and non-assessable.

Each share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder. Shares of all funds vote together as a single class, except that if the matter being voted on affects only a particular fund it will be voted on only by that fund and if a matter affects a particular fund differently from other funds, that fund will vote separately on such matter. As a Delaware statutory trust, the Trust is not required, and does not intend, to hold annual meetings of shareholders. Approval of shareholders will be sought, however, for certain changes in the operation of the Trust and for the election of Trustees under certain circumstances. Upon the written request of shareholders owning at least 10% of the Trust's shares, the Trust will call for a meeting of shareholders to consider the removal of one or more trustees and other certain matters. In the event that such a meeting is requested, the Trust will provide appropriate assistance and information to the shareholders requesting the meeting.

Under the Declaration of Trust, the Trustees have the power to liquidate each fund without shareholder approval. While the Trustees have no present intention of exercising this power, they may do so if any fund fails to reach a viable size within a reasonable amount of time or for such other reasons as may be determined by the Board.

BROKERAGE TRANSACTIONS

The policy of the Trust regarding purchases and sales of securities for the Fund is that primary consideration will be given to obtaining the most favorable prices and efficient executions of transactions. Consistent with this policy, when securities transactions are effected on a stock exchange, the Trust's policy is to pay commissions which are considered fair and reasonable without necessarily determining that the lowest possible commissions are paid in all circumstances. The Trust believes that a requirement always to seek the lowest possible commission cost could impede effective portfolio management and preclude the Fund and the Sub-Adviser from obtaining a high quality of brokerage and research services. In seeking to determine the reasonableness of brokerage commissions paid in any transaction, the Sub-Adviser will rely upon its experience and knowledge regarding commissions generally charged by various brokers and on its judgment in evaluating the brokerage services received from the broker effecting the transaction. Such determinations are necessarily subjective and imprecise, as in most cases, an exact dollar value for those services is not ascertainable. The Trust has adopted policies and procedures that prohibit the consideration of sales of the Fund's shares as a factor in the selection of a broker or dealer to execute its portfolio transactions.

The Sub-Adviser owes a fiduciary duty to its clients to seek to provide best execution on trades effected. In selecting a broker/dealer for each specific transaction, the Sub-Adviser chooses the broker/dealer deemed most capable of providing the services necessary to obtain the most favorable execution. Best execution is generally understood to mean the most favorable cost or net proceeds reasonably obtainable under the circumstances. The full range of brokerage services applicable to a particular transaction may be considered when making this judgment, which may include, but is not limited to: liquidity, price, commission, timing, aggregated trades, capable floor brokers or traders, competent block trading coverage, ability to position, capital strength and stability, reliable and accurate communications and settlement processing, use of automation, knowledge of other buyers or sellers, arbitrage skills, administrative ability, underwriting and provision of information on a particular security or market in which the transaction is to occur. The specific criteria will vary depending upon the nature of the transaction, the market in which it is executed, and the extent to which it is possible to select from among multiple broker/dealers. The Sub-Adviser will also use electronic crossing networks ("ECNs") when appropriate.

The Sub-Adviser may use the Fund's assets for, or participate in, third-party soft dollar arrangements, in addition to receiving proprietary research from various full service brokers, the cost of which is bundled with the cost of the broker's execution services. The Sub-Adviser does not "pay up" for the value of any such proprietary research.

Section 28(e) of the 1934 Act permits the Adviser, under certain circumstances, to cause the Fund to pay a broker or dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged for effecting the transaction in recognition of the value of brokerage and research services provided by the broker or dealer. The Adviser may receive a variety of research services and information on many topics, which it can use in connection with its management responsibilities with respect to the various accounts over which it exercises investment discretion or otherwise provides investment advice. The research services may include qualifying order management systems, portfolio attribution and monitoring services and computer software and access charges which are directly related to investment research. Accordingly, the Fund may pay a broker commission higher than the lowest available in recognition of the broker's provision of such services to the Adviser, but only if the

Adviser determines the total commission (including the soft dollar benefit) is comparable to the best commission rate that could be expected to be received from other brokers. The amount of soft dollar benefits received depends on the amount of brokerage transactions effected with the brokers. A conflict of interest exists because there is an incentive to: 1)

cause clients to pay a higher commission than the firm might otherwise be able to negotiate; 2) cause clients to engage in more securities transactions than would otherwise be optimal; and 3) only recommend brokers that provide soft dollar benefits.

The Adviser faces a potential conflict of interest when it uses client trades to obtain brokerage or research services. This conflict exists because the Adviser is able to use the brokerage or research services to manage client accounts without paying cash for such services, which reduces the Adviser's expenses to the extent that the Adviser would have purchased such products had they not been provided by brokers. Section 28(e) permits the Adviser to use brokerage or research services for the benefit of any account it manages. Certain accounts managed by the Adviser may generate soft dollars used to purchase brokerage or research services that ultimately benefit other accounts managed by the Adviser, effectively cross subsidizing the other accounts managed by the Adviser that benefit directly from the product. The Adviser may not necessarily use all of the brokerage or research services in connection with managing the Fund whose trades generated the soft dollars used to purchase such products.

The Sub-Adviser is responsible, subject to oversight by the Adviser and the Board, for placing orders on behalf of the Fund for the purchase or sale of portfolio securities. If purchases or sales of portfolio securities of the Fund and one or more other investment companies or clients supervised by the Sub-Adviser are considered at or about the same time, transactions in such securities are allocated among the several investment companies and clients in a manner deemed equitable and consistent with its fiduciary obligations to all by the Sub-Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security so far as the Fund is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower brokerage commissions will be beneficial to the Fund. The primary consideration is prompt execution of orders at the most favorable net price.

The Fund may deal with affiliates in principal transactions to the extent permitted by exemptive order or applicable rule or regulation.

The Fund is new and has not paid any brokerage fees to any affiliated broker.

Brokerage with Fund Affiliates. The Fund may execute brokerage or other agency transactions through registered broker-dealer affiliates of either the Fund, the Adviser, the Sub-Adviser or the Distributor for a commission in conformity with the 1940 Act, the 1934 Act and rules promulgated by the SEC. These rules require that commissions paid to the affiliate by the Fund for exchange transactions not exceed "usual and customary" brokerage commissions. The rules define "usual and customary" commissions to include amounts which are "reasonable and fair compared to the commission, fee or other remuneration received or to be received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time." The Trustees, including those who are not "interested persons" of the Fund, have adopted procedures for evaluating the reasonableness of commissions paid to affiliates and review these procedures periodically.

Securities of "Regular Broker-Dealer." The Fund is required to identify any securities of its "regular brokers and dealers" (as such term is defined in the 1940 Act) which it may hold at the close of its most recent fiscal year. "Regular brokers or dealers" of the Trust are the ten brokers or dealers that, during the most recent fiscal year: (i) received the greatest dollar amounts of brokerage commissions from the Trust's portfolio transactions; (ii) engaged as principal in the largest dollar amounts of portfolio transactions of the Trust; or (iii) sold the largest dollar amounts of the Trust's shares. The Fund is new and has no securities of "regular broker dealers" to report.

PORTFOLIO TURNOVER RATE

Portfolio turnover may vary from year to year, as well as within a year. High turnover rates are likely to result in comparatively greater brokerage expenses. The overall reasonableness of brokerage commissions is evaluated by the Sub-Adviser based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. The Fund is new and has no portfolio turnover rate to report.

BOOK ENTRY ONLY SYSTEM

Depository Trust Company ("DTC") acts as securities depository for the Shares. Shares of the Fund are represented by securities registered in the name of DTC or its nominee, Cede & Co., and deposited with, or on behalf of, DTC. Except in limited circumstances set forth below, certificates will not be issued for Shares.

DTC is a limited-purpose trust company that was created to hold securities of its participants (the "DTC's Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-

entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain

other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers, and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the “Indirect Participants”).

Beneficial ownership of Shares is limited to DTC Participants, Indirect Participants, and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in Shares (owners of such beneficial interests are referred to herein as “Beneficial Owners”) is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of Shares. The Trust recognizes DTC or its nominee as the record owner of all Shares for all purposes. Beneficial Owners of Shares are not entitled to have Shares registered in their names, and will not receive or be entitled to physical delivery of share certificates. Each Beneficial Owner must rely on the procedures of DTC and any DTC Participant and/or Indirect Participant through which such Beneficial Owner holds its interests, to exercise any rights of a holder of Shares.

Conveyance of all notices, statements, and other communications to Beneficial Owners is effected as follows. DTC will make available to the Trust upon request and for a fee a listing of Shares held by each DTC Participant. The Trust shall obtain from each such DTC Participant the number of Beneficial Owners holding Shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement, or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants’ accounts with payments in amounts proportionate to their respective beneficial interests in the Fund as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of Shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a “street name,” and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in the Fund’s shares, or for maintaining, supervising, or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to the Fund at any time by giving reasonable notice to the Fund and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Fund shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such replacement is unavailable, to issue and deliver printed certificates representing ownership of Shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of a fund. A control person is a shareholder that owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders owning voting securities in excess of 25% may determine the outcome of any matter affecting and voted on by shareholders of a Fund. The Fund is new and has no outstanding shareholders.

PURCHASE AND ISSUANCE OF SHARES IN CREATION UNITS

The Trust issues and sells Shares of the Fund only in Creation Units on a continuous basis through the Distributor, without a sales load (but subject to transaction fees), at their NAV per share next determined after receipt of an order, on any Business Day, in proper form pursuant to the terms of the Authorized Participant Agreement (“Participant Agreement”). The NAV of the Fund’s shares is calculated each business day as of the close of regular trading on the Exchange, generally 4:00 p.m., Eastern Time. The Fund will not issue fractional Creation Units. A Business Day is any day on which the Exchange is open for business.

FUND DEPOSIT. The consideration for purchase of a Creation Unit of the Fund generally consists of the in-kind deposit of a designated portfolio of securities (the “Deposit Securities”) per each Creation Unit, constituting a substantial replication, or a portfolio sampling representation, of the securities included in the Fund’s portfolio and the Cash Component (defined below), computed as described below. Notwithstanding the foregoing, the Trust reserves the right to permit or require the substitution of a “cash in lieu” amount (“Deposit Cash”) to be added to the Cash Component to replace any Deposit Security. When accepting purchases of Creation Units for all or a portion of Deposit Cash, the Fund may incur additional costs associated with the acquisition of Deposit Securities that would otherwise be provided by an in-kind purchaser.

Together, the Deposit Securities or Deposit Cash, as applicable, and the Cash Component constitute the “Fund Deposit,” which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The “Cash Component” is an amount equal to the difference between the net asset value of the Shares (per Creation Unit) and the market value of the Deposit Securities or Deposit Cash, as applicable. If the Cash Component is a positive number (*i.e.*, the net asset value per Creation Unit exceeds the market value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such positive amount. If the Cash Component is a negative number (*i.e.*, the net asset value per Creation Unit is less than the market value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such negative amount and the creator will be entitled to receive cash in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the net asset value per Creation Unit and the market value of the Deposit Securities or Deposit Cash, as applicable. Computation of the Cash Component excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, if applicable, which shall be the sole responsibility of the Authorized Participant (as defined below).

The Fund, through the National Securities Clearance Corporation (the “NSCC”), makes available on each Business Day, immediately prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern time), the list of the names and the required number of shares of each Deposit Security or the required amount of Deposit Cash, as applicable, to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for the Fund. Such Fund Deposit is subject to any applicable adjustments as described below, in order to effect purchases of Creation Units of the Fund until such time as the next-announced composition of the Deposit Securities or the required amount of Deposit Cash, as applicable, is made available.

The identity and number of shares of the Deposit Securities or the amount of Deposit Cash, as applicable, required for the Fund Deposit for the Fund changes as rebalancing adjustments and corporate action events are reflected from time to time by the Adviser with a view to the investment objective of the Fund. The composition of the Deposit Securities may also change in response to adjustments to the weighting or composition of the component securities of the Fund’s portfolio.

The Trust reserves the right to permit or require the substitution of an amount of cash (*i.e.*, a “cash in lieu” amount) to replace any Deposit Security, which shall be added to the Deposit Cash, if applicable, and the Cash Component, including, without limitation, in situations where the Deposit Security: (i) may not be available in sufficient quantity for delivery; (ii) may not be eligible for transfer through the systems of DTC for corporate securities and municipal securities; (iii) may not be eligible for trading by an Authorized Participant (as defined below) or the investor for which it is acting; (iv) would be restricted under the securities laws or where the delivery of the Deposit Security to the Authorized Participant would result in the disposition of the Deposit Security by the Authorized Participant becoming restricted under the securities laws; or (v) in certain other situations (collectively, “custom orders”). The adjustments described above will reflect changes, known to the Adviser on the date of announcement to be in effect by the time of delivery of the Fund Deposit or resulting from certain corporate actions.

PROCEDURES FOR PURCHASE OF CREATION UNITS. To be eligible to place orders with the Distributor to purchase a Creation Unit of the Fund, an entity must be (i) a “Participating Party”, *i.e.*, a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the “Clearing Process”), a clearing agency that is registered with the SEC; or (ii) a DTC Participant (see “BOOK ENTRY ONLY SYSTEM”). In addition, each Participating Party or DTC Participant (each, an

“Authorized Participant”) must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Transfer Agent, with respect to purchases and redemptions of Creation Units. Each Authorized Participant will agree, pursuant to the terms of a Participant Agreement, on behalf of itself or any investor on whose behalf it will

act, to certain conditions, including that it will pay to the Trust, an amount of cash sufficient to pay the Cash Component together with the Creation Transaction Fee (defined below) and any other applicable fees and taxes. The Adviser may retain all or a portion of the Transaction Fee to the extent the Adviser bears the expenses that otherwise would be borne by the Trust in connection with the purchase of a Creation Unit, which the Transaction Fee is designed to cover.

All orders to purchase Shares directly from the Fund must be placed for one or more Creation Units and in the manner and by the time set forth in the Participant Agreement and/or applicable order form. The date on which an order to purchase Creation Units (or an order to redeem Creation Units, as set forth below) is received and accepted is referred to as the "Order Placement Date."

An Authorized Participant may require an investor to make certain representations or enter into agreements with respect to the order, (e.g., to provide for payments of cash, when required). Investors should be aware that their particular broker may not have executed a Participant Agreement and that, therefore, orders to purchase Shares directly from the Fund in Creation Units have to be placed by the investor's broker through an Authorized Participant that has executed a Participant Agreement. In such cases there may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement and only a small number of such Authorized Participants may have international capabilities.

On days when the Exchange closes earlier than normal, the Fund may require orders to create Creation Units to be placed earlier in the day. In addition, if a market or markets on which the Fund's investments are primarily traded is closed, the Fund will also generally not accept orders on such day(s). Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement and in accordance with the applicable order form. With respect to the Fund, the Distributor will notify the Custodian of such order. The Custodian will then provide such information to the appropriate local sub-custodian(s). Those placing orders through an Authorized Participant should allow sufficient time to permit proper submission of the purchase order to the Transfer Agent, and accepted by the Distributor, by the cut-off time on such Business Day. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Distributor or an Authorized Participant.

Fund Deposits must be delivered by an Authorized Participant through the Federal Reserve System (for cash) or through DTC (for corporate securities), through a sub-custody agent (for foreign securities) and/or through such other arrangements allowed by the Trust or its agents. With respect to foreign Deposit Securities, the Custodian shall cause the sub-custodian of the Fund to maintain an account into which the Authorized Participant shall deliver, on behalf of itself or the party on whose behalf it is acting, such Deposit Securities (or Deposit Cash for all or a part of such securities, as permitted or required), with any appropriate adjustments as advised by the Trust. Foreign Deposit Securities must be delivered to an account maintained at the applicable local sub-custodian. The Fund Deposit transfer must be ordered by the Authorized Participant in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities or Deposit Cash, as applicable, to the account of the Fund or its agents by no later than the Settlement Date. The "Settlement Date" for the Fund is generally the next Business Day after the Order Placement Date. All questions as to the number of Deposit Securities or Deposit Cash to be delivered, as applicable, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities or cash, as applicable, will be determined by the Trust, whose determination shall be final and binding. The amount of cash represented by the Cash Component must be transferred directly to the Custodian through the Federal Reserve Bank wire transfer system or through DTC in a timely manner so as to be received by the Custodian no later than the Settlement Date. If the Cash Component and the Deposit Securities or Deposit Cash, as applicable, are not received by in a timely manner by the Settlement Date, the creation order may be cancelled. Upon written notice to the Distributor, such canceled order may be resubmitted the following Business Day using the Fund Deposit as newly constituted to reflect the then current NAV of the Fund.

The order shall be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to the applicable cut-off time and the federal funds in the appropriate amount are deposited by 2:00 p.m. or 3:00 p.m. Eastern time (as set forth on the applicable order form), with the Custodian on the Settlement Date. If the order is not placed in proper form as required, or federal funds in the appropriate amount are not received by 2:00 p.m. or 3:00 p.m. Eastern time (as set forth on the applicable order form) on the Settlement Date, then the order may be deemed to be rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. A creation request is considered to be in "proper form" if all procedures set forth in the Participant Agreement, order form and this SAI are properly followed.

ISSUANCE OF A CREATION UNIT. Except as provided herein, Creation Units will not be issued until the transfer of good title to the Trust of the Deposit Securities or payment of Deposit Cash, as applicable, and the payment of the Cash Component have been completed. When the sub-custodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant sub-custodian or sub-custodians, the Distributor and the Adviser shall be notified of

such delivery, and the Trust will issue and cause the delivery of the Creation Units. The delivery of Creation Units so created generally will occur no later than the next Business Day following the day on which the purchase order is deemed received by the Distributor. The Authorized Participant shall be liable to the Fund for losses, if any, resulting from unsettled orders.

Creation Units may be purchased in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the net asset value of the Shares on the date the order is placed in proper form since in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) an additional amount of cash equal to a percentage of the market value as set forth in the Participant Agreement, of the undelivered Deposit Securities (the “Additional Cash Deposit”), which shall be maintained in a separate non-interest bearing collateral account. An additional amount of cash shall be required to be deposited with the Trust, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to the applicable percentage, as set forth in the Participant Agreement, of the daily marked to market value of the missing Deposit Securities. The Participant Agreement will permit the Trust to buy the missing Deposit Securities at any time. Authorized Participants will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the day the purchase order was deemed received by the Distributor plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Custodian or purchased by the Trust and deposited into the Trust. In addition, a Transaction Fee as set forth below under “Creation Transaction Fee” will be charged in all cases. The delivery of Creation Units so created generally will occur no later than the Settlement Date.

ACCEPTANCE OF ORDERS OF CREATION UNITS. The Trust reserves the absolute right to reject an order for Creation Units transmitted to it by the Distributor in respect of the Fund including, without limitation, if (a) the order is not in proper form; (b) the Deposit Securities or Deposit Cash, as applicable, delivered by the Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; (c) the investor(s), upon obtaining the Shares ordered, would own 80% or more of the currently outstanding Shares of the Fund; (d) acceptance of the Deposit Securities would have certain adverse tax consequences to the Fund; (e) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (f) the acceptance of the Fund Deposit would otherwise, in the discretion of the Trust or the Adviser, have an adverse effect on the Trust or the rights of beneficial owners; (g) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful; or (h) in the event that circumstances outside the control of the Trust, the Custodian, the Transfer Agent and/or the Adviser make it for all practical purposes not feasible to process orders for Creation Units.

Examples of such circumstances include acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Distributor, the Custodian, a sub-custodian, the Transfer Agent, DTC, NSCC, Federal Reserve System, or any other participant in the creation process, and other extraordinary events. The Distributor shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit of its rejection of the order of such person. The Trust, the Transfer Agent, the Custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall either of them incur any liability for the failure to give any such notification. The Trust, the Transfer Agent, the Custodian and the Distributor shall not be liable for the rejection of any purchase order for Creation Units.

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust’s determination shall be final and binding.

CREATION TRANSACTION FEE. A purchase (*i.e.*, creation) transaction fee, payable to the Fund’s custodian, may be imposed for the transfer and other transaction costs associated with the purchase of Creation Units, and investors will be required to pay a creation transaction fee regardless of the number of Creation Units created in the transaction. The Fund may adjust the creation transaction fee from time to time based upon actual experience. The standard fixed creation transaction fee for the Fund will be \$250. In addition, a variable fee will be charged on all cash transactions or substitutes for Creation Units of up to a maximum of 2% as a percentage of the value of the Creation Units subject to the transaction. The variable charge may be imposed for cash purchases, non-standard orders, or partial cash purchases incurred by the Fund, primarily designed to cover expenses related to broker commissions. Investors who use the services of a broker or other such intermediary may be charged a fee for such services. Investors are responsible for the fixed costs of transferring the securities constituting the Deposit Securities to the account of the Trust.

RISKS OF PURCHASING CREATION UNITS. There are certain legal risks unique to investors purchasing Creation Units directly from the Fund. Because the Fund’s shares may be issued on an ongoing basis, a “distribution” of Shares could be occurring at any time. Certain activities that a shareholder performs as a dealer could, depending on the circumstances, result in the shareholder being

deemed a participant in the distribution in a manner that could render the shareholder a statutory underwriter and subject to the prospectus delivery and liability provisions of the Securities Act. For example, a shareholder could be deemed a statutory

underwriter if it purchases Creation Units from the Fund, breaks them down into the constituent Shares, and sells those Shares directly to customers, or if a shareholder chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary-market demand for Shares. Whether a person is an underwriter depends upon all of the facts and circumstances pertaining to that person's activities, and the examples mentioned here should not be considered a complete description of all the activities that could cause you to be deemed an underwriter.

Dealers who are not "underwriters" but are participating in a distribution (as opposed to engaging in ordinary secondary-market transactions), and thus dealing with the Fund's Shares as part of an "unsold allotment" within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act.

REDEMPTION. Shares may be redeemed only in Creation Units at their net asset value next determined after receipt of a redemption request in proper form by the Fund through the Transfer Agent and only on a Business Day. EXCEPT UPON LIQUIDATION OF THE FUND, THE TRUST WILL NOT REDEEM SHARES IN AMOUNTS LESS THAN CREATION UNITS. Investors must accumulate enough Shares in the secondary market to constitute a Creation Unit in order to have such Shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of Shares to constitute a redeemable Creation Unit.

With respect to the Fund, the Custodian, through the NSCC, makes available immediately prior to the opening of business on the Exchange (currently 9:30 a.m. Eastern time) on each Business Day, the list of the names and share quantities of the Fund's portfolio securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day ("Fund Securities"). Fund Securities received on redemption may not be identical to Deposit Securities.

Redemption proceeds for a Creation Unit are paid either in-kind or in cash, or combination thereof, as determined by the Trust. With respect to in-kind redemptions of the Fund, redemption proceeds for a Creation Unit will consist of Fund Securities - as announced by the Custodian on the Business Day of the request for redemption received in proper form plus cash in an amount equal to the difference between the net asset value of the Shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities (the "Cash Redemption Amount"), less a fixed redemption transaction fee as set forth below. In the event that the Fund Securities have a value greater than the net asset value of the Shares, a compensating cash payment equal to the differential is required to be made by or through an Authorized Participant by the redeeming shareholder. Notwithstanding the foregoing, at the Trust's discretion, an Authorized Participant may receive the corresponding cash value of the securities in lieu of the in-kind securities value representing one or more Fund Securities.

REDEMPTION TRANSACTION FEE. A redemption transaction fee is imposed for the transfer and other transaction costs associated with the redemption of Creation Units, and investors will be required to pay a fixed redemption transaction fee regardless of the number of Creation Units created in the transaction, as set forth in the Fund's Prospectus, as may be revised from time to time. The redemption transaction fee is the same no matter how many Creation Units are being redeemed pursuant to any one redemption request. The Fund may adjust the redemption transaction fee from time to time based upon actual experience. The standard fixed redemption transaction fee for the Fund will be \$250. In addition, a variable fee will be charged on all cash transactions or substitutes for Creation Units of up to a maximum of 2% as a percentage of the value of the Creation Units subject to the transaction. The variable charge may be imposed for cash redemptions, non-standard orders, or partial cash redemptions (when cash redemptions are available) incurred by the Fund, primarily designed to cover expenses related to broker commissions. Investors who use the services of a broker or other such intermediary may be charged a fee for such services. Investors are responsible for the fixed costs of transferring the Fund Securities from the Trust to their account or on their order.

PROCEDURES FOR REDEMPTION OF CREATION UNITS. Orders to redeem Creation Units must be submitted in proper form to the Transfer Agent prior to the time as set forth in the Participant Agreement. A redemption request is considered to be in "proper form" if (i) an Authorized Participant has transferred or caused to be transferred to the Trust's Transfer Agent the Creation Unit(s) being redeemed through the book-entry system of DTC so as to be effective by the time as set forth in the Participant Agreement and (ii) a request in form satisfactory to the Trust is received by the Transfer Agent from the Authorized Participant on behalf of itself or another redeeming investor within the time periods specified in the Participant Agreement. If the Transfer Agent does not receive the investor's Shares through DTC's facilities by the times and pursuant to the other terms and conditions set forth in the Participant Agreement, the redemption request shall be rejected.

The Authorized Participant must transmit the request for redemption, in the form required by the Trust, to the Transfer Agent in accordance with procedures set forth in the Authorized Participant Agreement. Investors should be aware that their particular broker

may not have executed an Authorized Participant Agreement, and that, therefore, requests to redeem Creation Units may have to be placed by the investor's broker through an Authorized Participant who has executed an Authorized Participant Agreement.

Investors making a redemption request should be aware that such request must be in the form specified by such Authorized Participant. Investors making a request to redeem Creation Units should allow sufficient time to permit proper submission of the request by an Authorized Participant and transfer of the Shares to the Trust's Transfer Agent; such investors should allow for the additional time that may be required to effect redemptions through their banks, brokers or other financial intermediaries if such intermediaries are not Authorized Participants.

In connection with taking delivery of shares of Fund Securities upon redemption of Creation Units, a redeeming shareholder or Authorized Participant acting on behalf of such Shareholder must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will be made within three business days of the trade date.

ADDITIONAL REDEMPTION PROCEDURES. In connection with taking delivery of shares of Fund Securities upon redemption of Creation Units, the Authorized Participant must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will be made within three business days of the trade date.

The Trust may in its discretion exercise its option to redeem such Shares in cash, and the redeeming investor will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that the Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its Shares based on the NAV of Shares of the Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions specified above, to offset the Trust's brokerage and other transaction costs associated with the disposition of Fund Securities).

The Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in net asset value. The Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in net asset value.

Redemptions of shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and the Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws. An Authorized Participant or an investor for which it is acting subject to a legal restriction with respect to a particular security included in the Fund Securities applicable to the redemption of Creation Units may be paid an equivalent amount of cash. The Authorized Participant may request the redeeming investor of the Shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment. Further, an Authorized Participant that is not a "qualified institutional buyer" ("QIB"), as such term is defined under Rule 144A of the Securities Act, will not be able to receive Fund Securities that are restricted securities eligible for resale under Rule 144A. An Authorized Participant may be required by the Trust to provide a written confirmation with respect to QIB status in order to receive Fund Securities.

The right of redemption may be suspended or the date of payment postponed with respect to the Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the Shares of the Fund or determination of the NAV of the Shares is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

REQUIRED EARLY ACCEPTANCE OF ORDERS. Notwithstanding the foregoing, as described in the Participant Agreement and/or applicable order form, the Fund may require orders to be placed up to one or more business days prior to the trade date, as described in the Participant Agreement or the applicable order form, in order to receive the trade date's net asset value. Orders to purchase Shares of the Fund that are submitted on the Business Day immediately preceding a holiday or a day (other than a weekend) that the equity markets in the relevant foreign market are closed will not be accepted. Authorized Participants may be notified that the cut-off time for an order may be earlier on a particular business day, as described in the Participant Agreement and the order form.

DETERMINATION OF NET ASSET VALUE

Net asset value per Share for the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by the total number of Shares outstanding, rounded to the nearest cent. Expenses and fees, including

the management fees, are accrued daily and taken into account for purposes of determining net asset value. The net asset value of the Fund is calculated by the Custodian and determined at the close of the regular trading session on the NYSE (ordinarily 4:00 p.m. Eastern time) on each day that such exchange is open, provided that fixed-income assets may be valued as of the announced closing time for trading in fixed-income instruments on any day that the Securities Industry and Financial Markets Association (“SIFMA”) announces an early closing time.

In calculating the Fund’s net asset value per Share, the Fund’s investments are generally valued using market valuations. A market valuation generally means a valuation (i) obtained from an exchange, a pricing service, or a major market maker (or dealer), (ii) based on a price quotation or other equivalent indication of value supplied by an exchange, a pricing service, or a major market maker (or dealer) or (iii) based on amortized cost. In the case of shares of other funds that are not traded on an exchange, a market valuation means such fund’s published net asset value per share. The Sub-Adviser may use various pricing services, or discontinue the use of any pricing service, as approved by the Board from time to time. A price obtained from a pricing service based on such pricing service’s valuation matrix may be considered a market valuation. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

In the event that current market valuations are not readily available or such valuations do not reflect current market value, the Trust’s procedures require the Fair Value Committee to determine a security’s fair value if a market price is not readily available. In determining such value the Fair Value Committee may consider, among other things, (i) price comparisons among multiple sources, (ii) a review of corporate actions and news events, and (iii) a review of relevant financial indicators (*e.g.*, movement in interest rates and market indices). In these cases, the Fund’s net asset value may reflect certain portfolio securities’ fair values rather than their market prices. Fair value pricing involves subjective judgments and it is possible that the fair value determination for a security is materially different than the value that could be realized upon the sale of the security. With respect to securities that are primarily listed on foreign exchanges, the value of the Fund’s portfolio securities may change on days when you will not be able to purchase or sell your Shares.

DIVIDENDS AND DISTRIBUTIONS

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Dividends, Distributions and Taxes.”

General Policies . Dividends from net investment income, if any, are calculated daily and paid monthly by the Fund. Distributions of net realized securities gains, if any, generally are declared and paid once a year, but the Fund may make distributions on a more frequent basis comply with the distribution requirements of the Code, in all events in a manner consistent with the provisions of the 1940 Act.

Dividends and other distributions on shares are distributed, as described below, on a pro rata basis to Beneficial Owners of such shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Fund.

The Fund may make additional distributions to the extent necessary (i) to distribute the entire annual taxable income of the Fund, plus any net capital gains and (ii) to avoid imposition of the excise tax imposed by Section 4982 of the Code. Management of the Trust reserves the right to declare special dividends if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Fund as a regulated investment company (“RIC”) or to avoid imposition of income or excise taxes on undistributed income.

Dividend Reinvestment Service. The Trust will not make the DTC book-entry dividend reinvestment service available for use by Beneficial Owners for reinvestment of their cash proceeds, but certain individual broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of the Fund through DTC Participants for reinvestment of their dividend distributions. Investors should contact their brokers to ascertain the availability and description of these services. Beneficial Owners should be aware that each broker may require investors to adhere to specific procedures and timetables in order to participate in the dividend reinvestment service and investors should ascertain from their brokers such necessary details. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole Shares issued by the Trust of the Fund at NAV per share. Distributions reinvested in additional shares of the Fund will nevertheless be taxable to Beneficial Owners acquiring such additional shares to the same extent as if such distributions had been received in cash.

FEDERAL INCOME TAXES

The following is only a summary of certain additional federal income tax considerations generally affecting the Fund and its shareholders. No attempt is made to present a comprehensive explanation of the federal, state, local or foreign tax treatment of the Fund or its shareholders, and the discussion here and in the Prospectus is not intended to be a substitute for careful tax planning.

The following general discussion of certain federal income tax consequences is based on provisions of the Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

The recently enacted tax legislation commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act") makes significant changes to the U.S. federal income tax rules for taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Many of the changes applicable to individuals are temporary and would apply only to taxable years beginning after December 31, 2017 and before January 1, 2026. There are only minor changes with respect to the specific rules only applicable to a RIC, such as the Fund. The Tax Act, however, makes numerous other changes to the tax rules that may affect shareholders and the Fund. You are urged to consult with your own tax advisor regarding how the Tax Act affects your investment in the Fund.

Shareholders are urged to consult their own tax advisers regarding the application of the provisions of tax law described in this SAI in light of the particular tax situations of the shareholders and regarding specific questions as to federal, state, or local taxes.

Regulated Investment Company (RIC) Status. The Fund will seek to qualify for treatment as a RIC under the Code. Provided that for each tax year the Fund: (i) meets the requirements to be treated as a RIC (as discussed below); and (ii) distributes at least an amount equal to the sum of 90% of the Fund's net investment income for such year (including, for this purpose, the excess of net realized short-term capital gains over net long-term capital losses) and 90% of its net tax-exempt interest income, the Fund itself will not be subject to federal income taxes to the extent the Fund's net investment income and the Fund's net realized capital gains, if any, are distributed to the Fund's shareholders. One of several requirements for RIC qualification is that the Fund must receive at least 90% of the Fund's gross income each year from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income derived with respect to the Fund's business of investing in stock, securities, foreign currencies and net income from an interest in a qualified publicly traded partnership (the "90% Test"). A second requirement for qualification as a RIC is that the Fund must diversify its holdings so that, at the end of each quarter of the Fund's taxable year: (a) at least 50% of the market value of the Fund's total assets is represented by cash and cash items, U.S. government securities, securities of other RICs, and other securities, with these other securities limited, in respect to any one issuer, to an amount not greater than 5% of the value of the Fund's total assets or 10% of the outstanding voting securities of such issuer; and (b) not more than 25% of the value of its total assets are invested in the securities (other than U.S. government securities or securities of other RICs) of any one issuer, the securities (other than securities of other RICs) of two or more issuers which the Fund controls and which are engaged in the same, similar, or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the "Asset Test").

Under the Asset Test, the Fund generally may not acquire a security if, as a result of the acquisition, more than 50% of the value of the Fund's assets would be invested in (a) issuers in which the Fund has, in each case, invested more than 5% of the Fund's assets and (b) issuers more than 10% of whose outstanding voting securities are owned by the Fund.

If the Fund fails to satisfy the 90% Test or the Asset Test, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain *de minimis* failures of the Asset Test. In order to qualify for relief provisions for a failure to meet the Asset Test, the Fund may be required to dispose of certain assets. If the Fund fails to qualify for treatment as a RIC for any year, and the relief provisions are not available, all of its taxable income will be subject to federal income tax at regular corporate rates (which the Tax Act reduced to 21%) without any deduction for distributions to shareholders. In such case, its shareholders would be taxed as if they received ordinary dividends, although the dividends could be eligible for the dividends received deduction for corporate shareholders and the dividends may be eligible for the lower tax rates available to non-corporate shareholders on qualified dividend income. To requalify for treatment as a RIC in a subsequent taxable year, the Fund would be required to satisfy the RIC qualification requirements for that year and to distribute any earnings and profits from any taxable year for which the Fund failed to qualify for tax treatment as a RIC. If the Fund failed to qualify as a RIC for a period greater than two taxable years, the Fund would generally be required to pay a Fund-level tax on any net built-in gains recognized with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a RIC in a subsequent year. The Board reserves the right not to maintain the qualification of the Fund for treatment as a RIC if it determines such course of action to be beneficial to shareholders. If the Fund

determines that it will not qualify for treatment as a RIC, the Fund will establish procedures to reflect the anticipated tax liability in the Fund's NAV.

The Fund may elect to treat part or all of any “qualified late year loss” as if it had been incurred in the succeeding taxable year in determining the Fund’s taxable income, net capital gain, net short-term capital gain, and earnings and profits. A “qualified late year loss” generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year and certain other late-year losses.

If the Fund has a “net capital loss” (that is, capital losses in excess of capital gains) for a taxable year, the excess of the Fund’s net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund’s next taxable year, and the excess (if any) of the Fund’s net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund’s next taxable year.

The Fund will generally be subject to a nondeductible 4% federal excise tax to the extent it fails to distribute by the end of any calendar year at least the sum of 98% of its ordinary income for the year, 98.2% of its capital gain net income for the one-year period ending on October 31 of that year, and certain other amounts. The Fund intends to make sufficient distributions, or deemed distributions, to avoid imposition of the excise tax, but can make no assurances that all such tax liability will be eliminated.

The Fund intends to distribute substantially all its net investment income and net realized capital gains to shareholders, at least annually. The distribution of net investment income and net realized capital gains generally will be taxable to Fund shareholders regardless of whether the shareholder elects to receive these distributions in cash or in additional shares. However, the Fund may determine not to distribute, or determine to defer the distribution of, some portion of its income in non-routine circumstances. If the Fund retains for investment an amount equal to all or a portion of its net long-term capital gains in excess of its net short-term capital losses (including any capital loss carryovers), it will be subject to a corporate tax on the amount retained. In that event, the Fund will designate such retained amounts as undistributed capital gains in a notice to its shareholders who (a) will be required to include in income for U.S. federal income tax purposes, as long-term capital gains, their proportionate shares of the undistributed amount, (b) will be entitled to credit their proportionate shares of the income tax paid by the Fund on the undistributed amount against their U.S. federal income tax liabilities, if any, and to claim refunds to the extent their credits exceed their liabilities, if any, and (c) will be entitled to increase their tax basis, for U.S. federal income tax purposes, in their shares by an amount equal to the excess of the amount of undistributed net capital gain included in their respective income over their respective income tax credits. Organizations or persons not subject to U.S. federal income tax on such capital gains will be entitled to a refund of their pro rata share of such taxes paid by the Fund upon timely filing appropriate returns or claims for refund with the Internal Revenue Service (the “IRS”).

A portion of the net investment income distributions of the Fund may be treated as qualified dividend income (which, for non-corporate shareholders, is generally eligible for taxation at reduced rates). The portion of distributions that the Fund may report as qualified dividend income is generally limited to the amount of qualified dividend income received by the Fund, but if for any Fund taxable year 95% or more of the Fund’s gross income (exclusive of net capital gain from sales of stocks and securities) consists of qualified dividend income, all distributions of such income for that taxable year may be reported as qualified dividend income. Qualified dividend income is, in general, dividend income from taxable domestic corporations and certain foreign corporations (*i.e.*, foreign corporations incorporated in a possession of the United States or in certain countries with a comprehensive tax treaty with the United States, and other foreign corporations if the stock with respect to which the dividend income is paid is readily tradable on an established securities market in the United States).

In order for some portion of the dividends received by a shareholder to be qualified dividend income, the Fund must meet holding period and other requirements with respect to the dividend paying stocks in its portfolio, and the shareholder must meet holding period and other requirements with respect to the Fund’s shares. Distributions reported to Fund shareholders as capital gain dividends will be taxable at the rates applicable to long-term capital gains generally at a maximum rate of 20% for non-corporate shareholders), regardless of how long the shareholder has owned the shares. The Fund’s shareholders will be notified annually by the Fund as to the federal tax status of all distributions made by the Fund. Distributions may be subject to state and local taxes.

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to an additional 3.8% Medicare contribution tax on their “net investment income,” including interest, dividends, and capital gains (including capital gains realized on the sale or exchange of shares of the Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Shareholders who have held Fund shares for less than a full year should be aware that the Fund may report and distribute, as ordinary dividends or capital gain dividends, a percentage of income that is not equal to the percentage of the Fund’s total ordinary income or net capital gain, respectively, actually earned during the period of investment in the Fund.

If the Fund's distributions for a taxable year exceed its taxable income and capital gains realized during a taxable year, all or a portion of the distributions made for the taxable year may be recharacterized as a return of capital to shareholders. A return of

capital distribution will generally not be taxable, but will reduce each shareholder's cost basis in the Fund and generally result in a higher reported capital gain or lower reported capital loss when those shares on which the distribution was received are sold.

A sale or exchange of shares in the Fund may give rise to a capital gain or loss. In general, any capital gain or loss realized upon a taxable disposition of shares will be treated as long-term capital gain or loss if the shares have been held for more than 12 months. Otherwise, the capital gain or loss on the taxable disposition of shares will be treated as short-term capital gain or loss. Any loss realized upon a taxable disposition of shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any long-term capital gain distributions received (or deemed received) by the shareholder with respect to the shares. All or a portion of any loss realized upon a taxable disposition of shares will be disallowed if substantially identical shares are purchased (through reinvestment of dividends or otherwise) within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the sum of the exchanger's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position.

Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will be treated as short-term capital gains or losses.

The Trust on behalf of the Fund has the right to reject an order for a purchase of shares of the Trust if the purchaser (or group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to Section 351 of the Code, the Fund would have a basis in the securities different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. The Trust reserves the absolute right to reject an order for Creation Units if acceptance of the securities to be exchanged for the Creation Units would have certain adverse tax consequences to the Fund.

Persons purchasing or redeeming Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction.

Complex Securities. With respect to any investments in zero coupon securities which are sold at original issue discount and thus do not make periodic cash interest payments, the Fund may be required to include as part of its current income the imputed interest on such obligations even though the Fund may not have received any interest payments on such obligations during that period. Because the Fund is required to distribute all of its net investment income to its shareholders, the Fund may have to sell Fund securities to distribute such imputed income. Those sales may occur at a time when the Advisor would not otherwise have chosen to sell such securities and will generally result in taxable gain or loss.

Back-Up Withholding. The Fund or your broker will be required to withhold (as "backup withholding") on taxable dividends paid to any shareholder, as well as the proceeds of any redemptions of Creation Units, paid to a shareholder or Authorized Participant who (1) fails to provide a correct taxpayer identification number certified under penalty of perjury; (2) is subject to withholding by the IRS for failure to properly report all payments of interest or dividends; (3) fails to provide a certified statement that he or she is not subject to "backup withholding;" or (4) fails to provide a certified statement that he or she is a U.S. person (including a U.S. resident alien). The backup withholding rate is currently 28%. Backup withholding is not an additional tax and any amounts withheld may be credited against the shareholder's ultimate U.S. tax liability.

Foreign Shareholders. Foreign shareholders (*i.e.*, nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from net investment income and short-term capital gains. Gains from the sale or other disposition of shares of the Fund generally are not subject to U.S. taxation, unless the recipient is an individual who either (1) meets the Code's definition of "resident alien" or (2) is physically present in the U.S. for 183 days or more per year. Different tax consequences may result if the foreign shareholder is engaged in a

trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Ordinary dividends paid after June 30, 2014 (or in certain cases, after later dates) to a shareholder that is a “foreign financial institution” as defined in Section 1471 of the Code and that does not meet the requirements imposed on foreign financial institutions by Section 1471 will generally be subject to withholding tax at a 30% rate. Under current IRS guidance, withholding on such payments will begin at different times depending on the type of payment, the type of payee, and whether the shareholder’s account is opened before or after July 1, 2014. Withholding with respect to ordinary dividends began on July 1, 2014 for accounts opened on or after that date and on certain later dates for accounts opened before July 1, 2014. The extent, if any, to which such withholding tax may be reduced or eliminated by an applicable tax treaty is unclear. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement.

In order for a foreign investor to qualify for an exemption from backup withholding, the foreign investor must comply with special certification and filing requirements. Foreign investors in the Fund should consult their tax advisors in this regard.

Tax Shelter Reporting Regulations. Under U.S. Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance shareholders of a RIC are not excepted. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

Other Issues. The Fund may be subject to tax or taxes in certain states where the Fund does business. Furthermore, in those states which have income tax laws, the tax treatment of the Fund and of Fund shareholders with respect to distributions by the Fund may differ from federal tax treatment.

Shareholders are advised to consult their tax advisors concerning their specific situations and the application of state, local and foreign taxes.

FINANCIAL STATEMENTS

Financial Statements and Annual Reports will be available after the Fund has completed a fiscal year of operations. When available, you may request a copy of the Fund’s Annual Report at no charge by calling 1-844-ETFMGRS (383-6477) or through the Fund’s website at www.valtETF.com.
