

Supplement dated December 16, 2021 to the
Summary Prospectus and Prospectus,
each dated September 17, 2021, of the
ETFMG Breakwave Sea Decarbonization Tech ETF (BSEA)

The section of the Prospectus and Summary Prospectus titled “**Principal Investment Strategies – The Marine Money Decarbonization Index**” is replaced with the following:

The Marine Money Decarbonization Index

The Index was created by Maritime Transformation Partners, LLC (the “Index Provider”) and tracks the performance of the equity securities of a diversified set of global companies that develop technologies, manufacture equipment or provide services related to marine or ocean decarbonization.

Construction of the Index begins with the universe of global companies with a minimum market capitalization of \$75 million. In addition, the Index components are common stock (or corresponding American Depositary Receipts (“ADRs”) or Global Depositary Receipts (“GDRs”)) listed on an exchange in a developed market and have a six-month average trading volume of \$500 thousand. The business descriptions of and other information regarding companies that meet the eligibility criteria are reviewed for specific factors related to technologies, equipment or services involved in cleaner propulsion (including alternative fuels, batteries and fuel cells), carbon capture technologies and offshore wind development. The universe of companies that may be considered eligible for potential Index inclusion is determined by an index committee based on factors such as a company’s business description, product lines, investment growth plans, exposure to the maritime sector, and its most recent reported revenue by segment.

The universe of companies is then divided by the Index Provider to two tiers: the Core tier (“Core”) and the Tracking tier (“Tracking”). The Core tier has an 80% weighting in the Index, while the Tracking tier has a 20% weighting in the Index. The Core tier is currently comprised of approximately 20 companies that are leaders in their respective business sectors. In addition, to be considered for inclusion in the Core tier, a potential constituent must (i) derive the majority of its revenues from sales of technology, equipment or services related to marine decarbonization, which includes marine infrastructure modernization that has the effect of reducing carbon emissions; (ii) have made substantial investment commitment, typically a majority of their research and development budget, in marine decarbonization technologies, equipment or services, including lower carbon fuel development, distribution or consumption; or (iii) be a stakeholder in a marine decarbonization demonstration project recognized by the Global Maritime Forum, an international not-for-profit organization committed to shaping the future of global seaborne trade to increase sustainable long-term economic development and human well being, or a similar successor organization. The 20 constituents will be equally weighted in the Core tier of the Index. The Tracking tier of the Index is comprised of companies with promising developments or significant investment in relevant business sectors that have not yet reached the development stage or scale targeted as it relates to decarbonization efforts or sufficient materiality to the company’s overall business. The constituents will be equally weighted in the Tracking tier of the Index. The Tracking tier generally includes, but is not limited to, 20 to 40 constituents based on eligibility. The Core tier constituents must have a minimum market capitalization of \$250 million and the Tracking tier constituents must have a minimum market capitalization of \$75 million. The weight of each security is capped at 10%. All excess weight is proportionally redistributed to all uncapped constituents within the relevant index tier.

The Index follows a quarterly rebalance and reconstitution schedule. Adjustments are made on the third Friday of March, June, September and December which is deemed the effective day. Weights are calculated and Index shares are frozen at the close of that specific day. The selection list is created based on the data as of the effective day.

The Index is calculated and maintained by Solactive AG, which is independent of the Index Provider, the Fund, its adviser and distributor.

The Index is not limited to a minimum or maximum number of constituents; rather, its composition is determined by the index committee based on the criteria outlined in the Index's methodology. The Index may include companies of any market capitalization, including small capitalization companies, subject to meeting the Index eligibility criteria. The Index Provider anticipates that the Index will generally include between 40 and 60 companies.

The section titled “**Litigation**” of each Fund’s Prospectus is hereby deleted in its entirety and replaced with the following:

Litigation

The Trust, a former and current trustee of the Trust, the Adviser and certain officers of the Adviser were defendants in an action filed May 2, 2017 in the Superior Court of New Jersey captioned PureShares, LLC d/b/a PureFunds et al. v. ETF Managers Group, LLC et al., Docket No. C-63-17. The PureShares action alleged claims based on disputes arising out of contractual relationships with the Adviser relating to certain series of the Trust. The action sought damages in unspecified amounts and injunctive relief

based on breach of contract, wrongful termination, and several other claims. The PureShares action was dismissed without prejudice by way of stipulation filed on February 14, 2020.

The Adviser and its parent, ETFMG, were defendants in a case filed on October 26, 2017 in the United States District Court for the Southern District of New York by NASDAQ, Inc. (“Nasdaq”) captioned Nasdaq, Inc. v. Exchange Traded Managers Group, LLC et al., Case 1:17-cv-08252. This action arose out of the same facts and circumstances, and relates to the same series of the Trust, as the New Jersey litigation and asserted claims for breach of contract, conversion and certain other claims. The matter was the subject of a bench trial in May 2019, and on December 20, 2019, the Court issued an Opinion and Order awarding compensatory damages to Plaintiff in the amount of \$78,403,172.36, plus prejudgment interest (the “Judgment”). The Court also denied Plaintiff’s requests for punitive damages and equitable relief. ETFMG filed a Notice of Appeal from the Judgment in the United States Court of Appeals for the Second Circuit on January 19, 2021, Docket No. 20-300.

On October 28, 2021, Nasdaq and ETFMG entered into a Judgment Payment Agreement, which satisfied the Judgment. On November 1, 2021, Nasdaq recorded a Satisfaction of Judgment with the United States District Court for the Southern District of New York reflecting that the Judgment was paid in full, and ETFMG withdrew its appeal of the Judgment with prejudice before the United States Court of Appeals for the Second Circuit. PureShares is not a direct party to the Judgment Payment Agreement. ETFMG, however, believes PureShares’ claims in the New Jersey case, if reinstated, would substantially overlap with those asserted on its behalf by Nasdaq that resulted in the Judgment, which has been satisfied.

ETFMG BREAKWAVE SEA DECARBONIZATION TECH ETF — FUND SUMMARY

Investment Objective

The ETFMG Breakwave Sea Decarbonization Tech ETF (the “Fund” or the “Decarbonization ETF”) seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the Marine Money Decarbonization Index (the “Index”).

Fees and Expenses

The following table describes the fees and expenses you may pay if you buy, hold, and sell shares of the Fund (“Shares”). This table and the Example below do not include the brokerage commissions and other fees to financial intermediaries that investors may pay on their purchases and sales of Shares.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.75 %
Distribution and Service (12b-1) Fees	None
Other Expenses*	0.00 %
Total Annual Fund Operating Expenses	0.75 %

* Based on estimated amounts for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This Example does not take into account the brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your cost would be:

1 Year	3 Years
\$77	\$240

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies

The Fund uses a “passive” or indexing approach to try to achieve the Fund’s investment objective. Unlike many investment companies, the Fund does not try to “beat” the Index and does not seek temporary defensive positions when markets decline or appear overvalued.

The Marine Money Decarbonization Index

The Index was created by Maritime Transformation Partners, LLC (the “Index Provider”) and tracks the performance of the equity securities of a diversified set of global companies that develop technologies, manufacture equipment or provide services related to marine or ocean decarbonization.

Construction of the Index begins with the universe of global companies with a minimum market capitalization of \$100 million. In addition, the Index components are common stock (or corresponding American Depositary Receipts (“ADRs”) or Global Depositary Receipts (“GDRs”)) listed on an exchange in a developed market and have a six-month average trading volume of \$2 million. The business descriptions of and other information regarding companies that meet the eligibility criteria are reviewed for specific factors related to technologies, equipment or services involved in cleaner propulsion (including alternative fuels, batteries and fuel cells), carbon capture technologies and offshore wind development. The universe of companies that may be considered eligible for potential Index inclusion is determined by an index committee based on factors such as a company’s business description, product lines, investment growth plans, exposure to the maritime sector, and its most recent reported revenue by segment.

The universe of companies is then divided by the Index Provider to two tiers: the Core tier (“Core”) and the Tracking tier (“Tracking”). The Core tier has an 80% weighting in the Index, while the Tracking tier has a 20% weighting in the Index. The Core tier is currently comprised of approximately 20 companies that are leaders in their respective business sectors. In addition, to be considered for inclusion in the Core tier, a potential constituent must (i) derive the majority of its revenues from sales of technology, equipment or services related to marine decarbonization, which includes marine infrastructure modernization that has the effect of reducing carbon emissions; (ii) have made substantial investment commitment, typically a majority of their research and development

budget, in marine decarbonization technologies, equipment or services, including lower carbon fuel development, distribution or consumption; or (iii) be a stakeholder in a marine decarbonization demonstration project recognized by the Global Maritime Forum, an international not-for-profit organization committed to shaping the future of global seaborne trade to increase sustainable long-term economic development and human well being, or a similar successor organization. The 20 constituents will be equally weighted in the Core tier of the Index. The Tracking tier of the Index is comprised of companies with promising developments or significant investment in relevant business sectors that have not yet reached the development stage or scale targeted as it relates to decarbonization efforts or sufficient materiality to the company's overall business. The constituents will be equally weighted in the Tracking tier of the Index. The Tracking tier generally includes, but is not limited to, 20 to 40 constituents based on eligibility. The Core tier constituents must have a minimum market capitalization of \$500 million and the Tracking tier constituents must have a minimum market capitalization of \$100 million. The weight of each security is capped at 10%. All excess weight is proportionally redistributed to all uncapped constituents within the relevant index tier.

The Index follows a quarterly rebalance and reconstitution schedule. Adjustments are made on the third Friday of March, June, September and December which is deemed the effective day. Weights are calculated and Index shares are frozen at the close of that specific day. The selection list is created based on the data as of the effective day.

The Index is calculated and maintained by Solactive AG, which is independent of the Index Provider, the Fund, its adviser and distributor.

The Index is not limited to a minimum or maximum number of constituents; rather, its composition is determined by the index committee based on the criteria outlined in the Index's methodology. The Index may include companies of any market capitalization, including small capitalization companies, subject to meeting the Index eligibility criteria. The Index Provider anticipates that the Index will generally include between 40 and 60 companies. As of June 1, 2021, the Index included the securities of 50 companies with minimum and maximum market capitalizations of \$100 million and \$50 billion, respectively.

The Fund's Principal Investment Strategies

The Fund generally expects to use a replication strategy. A replication strategy is an indexing strategy that involves investing in the securities of the Index in approximately the same proportions as in the Index. However, the Fund may utilize a representative sampling strategy with respect to the Index when a replication strategy might be detrimental to shareholders, such as when there are practical difficulties or substantial costs involved in compiling a portfolio of equity securities to follow the Index, in instances in which a security in the Index becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations (such as tax diversification requirements) that apply to the Fund but not the Index.

Under normal circumstances, the Fund will invest at least 80% of its net assets, plus borrowings for investment purposes, in Core tier companies or companies that derive a majority of their revenues or profits from, or invest a majority of their assets in, technologies (including their equipment and directly related services) for marine or ocean decarbonization (the "80% Policy"). The Fund may lend its portfolio securities to brokers, dealers and other financial organizations. These loans, if and when made, may not exceed 33 1/3% of the total asset value of the Fund (including the loan collateral). By lending its securities, the Fund may increase its income by receiving payments from the borrower. The Fund rebalances its portfolio in accordance with its Index, and, therefore, any changes to the Index's rebalance schedule will result in corresponding changes to the Fund's rebalance schedule.

Correlation: Correlation is the extent to which the values of different types of investments move in tandem with one another in response to changing economic and market conditions. An index is a theoretical financial calculation, while the Fund is an actual investment portfolio. The performance of the Fund and the Index may vary somewhat due to transaction costs, asset valuations, foreign currency valuations, market impact, corporate actions (such as mergers and spin-offs), legal restrictions or limitations, illiquid or unavailable securities, and timing variances.

The Fund's investment adviser expects that, over time, the correlation between the Fund's performance and that of the Index, before fees and expenses, will exceed 95%. A correlation percentage of 100% would indicate perfect correlation. If the Fund uses a replication strategy, it can be expected to have greater correlation to the Index than if it uses a representative sampling strategy.

Industry Concentration: The Fund will concentrate its investments (*i.e.*, hold 25% or more of its net assets) in a particular industry or group of related industries to approximately the same extent that the Index is concentrated. As of August 30, 2021, the Index was concentrated in companies in the energy industry group and the industrials industry group.

Principal Risks

As with all funds, a shareholder is subject to the risk that his or her investment could lose money. The principal risks affecting shareholders' investments in the Fund are set forth below. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.

Associated Risk of Investing in Decarbonization Companies: The underlying Index's decarbonization criteria, and thus the Fund's investment strategy, limits the types and number of investment opportunities available to the Fund, and, as a result, the Fund's returns may be lower than other funds that do not seek to invest in companies based on decarbonization criteria. In addition, decarbonization investing may affect the Fund's exposure to certain companies or industries and the Fund will forgo certain investment opportunities

that are screened out of the decarbonization methodology. Finally, some of the companies are developing new technologies that have not yet achieved full commercialization.

Equity Market Risk: The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests such as political, market and economic developments, as well as events that impact specific issuers. Additionally, natural or environmental disasters, widespread disease or other public health issues, war, acts of terrorism or other events could result in increased premiums or discounts to the Fund's NAV.

The remaining risks are presented in alphabetical order. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

Concentration Risk: The Fund's investments will be concentrated in an industry or group of industries to the extent the Index is so concentrated. To the extent the Fund invests more heavily in particular industries, groups of industries, or sectors of the economy, its performance will be especially sensitive to developments that significantly affect those industries, groups of industries, or sectors of the economy, and the value of Fund shares may rise and fall more than the value of shares that invest in securities of companies in a broader range of industries or sectors.

ETF Risks:

Absence of an Active Market: Although the Fund's shares are approved for listing on the NYSE Arca, Inc. (the "Exchange"), there can be no assurance that an active trading market will develop and be maintained for Fund shares. There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Fund may experience greater tracking error to its Index than it otherwise would at higher asset levels or the Fund may ultimately liquidate.

Authorized Participants ("APs"), Market Makers, and Liquidity Providers Concentration: The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to net asset value ("NAV") and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

Cash Transactions: While not likely, the Fund may effect its creations and redemptions primarily for cash, rather than in-kind securities. Paying redemption proceeds in cash rather than through in-kind delivery of portfolio securities may require the Fund to dispose of or sell portfolio investments at an inopportune time to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to incur certain costs such as brokerage costs, and to recognize gains or losses that it might not have incurred if it had made a redemption in-kind. As a result, the Fund may pay out higher or lower annual capital gains distributions than ETFs that redeem in-kind. In addition, the costs imposed on the Fund will decrease the Fund's NAV unless the costs are offset by a transaction fee payable by an AP.

Costs of Buying or Selling Shares: Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of shares.

Fluctuation of NAV: The NAV of Fund shares will generally fluctuate with changes in the market value of the Fund's securities holdings. The market prices of shares will generally fluctuate in accordance with changes in the Fund's NAV and supply and demand of shares on the Exchange. It cannot be predicted whether Fund shares will trade below, at or above their NAV. During periods of unusual volatility or market disruptions, market prices of Fund shares may deviate significantly from the market value of the Fund's securities holdings or the NAV of Fund shares. As a result, investors in the Fund may pay significantly more or receive significantly less for Fund shares than the value of the Fund's underlying securities or the NAV of Fund shares.

Market Trading: An investment in the Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation/redemption process of the Fund. Any of these factors, among others, may lead to the Fund's shares trading at a premium or discount to NAV.

Trading Issues: Although Fund shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of any Fund will continue to be met or will remain unchanged or that the shares will trade with any volume, or at all. Further, secondary markets may be subject to erratic trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in Fund shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Foreign Investment Risk: Returns on investments in foreign stocks could be more volatile than, or trail the returns on, investments in U.S. stocks.

Currency Risk: Indirect and direct exposure to foreign currencies subjects the Fund to the risk that currencies will decline in value relative to the U.S. dollar. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates and the imposition of currency controls or other political developments in the U.S. or abroad.

Depository Receipts Risk: The Fund may invest in depository receipts. Investment in ADRs and GDRs may be less liquid than the underlying shares in their primary trading market and GDRs, many of which are issued by companies in emerging markets, may be more volatile and less liquid than depository receipts issued by companies in more developed markets.

Foreign Market and Trading Risk: The trading markets for many foreign securities are not as active as U.S. markets and may have less governmental regulation and oversight. Foreign markets also may have clearance and settlement procedures that make it difficult for the Fund to buy and sell securities. These factors could result in a loss to the Fund by causing the Fund to be unable to dispose of an investment or to miss an attractive investment opportunity, or by causing Fund assets to be uninvested for some period of time.

Foreign Securities Risk: The Fund invests a significant portion of its assets directly in securities of issuers based outside of the U.S., or in depository receipts that represent such securities. Investments in securities of non-U.S. issuers involve certain risks that may not be present with investments in securities of U.S. issuers, such as risk of loss due to foreign currency fluctuations or to political or economic instability, as well as varying regulatory requirements applicable to investments in non-U.S. issuers. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may also be subject to different regulatory, accounting, auditing, financial reporting and investor protection standards than U.S. issuers.

Political and Economic Risk: The Fund is subject to foreign political and economic risk not associated with U.S. investments, meaning that political events, social and economic events and natural disasters occurring in a country where the Fund invests could cause the Fund's investments in that country to experience gains or losses. The Fund also could be unable to enforce its ownership rights or pursue legal remedies in countries where it invests.

Privatization Risk: Several foreign countries in which the Fund invests have begun a process of privatizing certain entities and industries. Privatized entities may lose money or be re-nationalized.

Risks Related to Investing in Europe: The economies and markets of European countries are often closely connected and interdependent, and events in one country in Europe can have an adverse impact on other European countries. The Fund makes investments in securities of issuers that are domiciled in, or have significant operations in, member countries of the European Union (the "EU") that are subject to economic and monetary controls that can adversely affect the Fund's investments. The European financial markets have experienced volatility and adverse trends in recent years and these events have adversely affected the exchange rate of the euro and may continue to significantly affect other European countries. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro, the default or threat of default by an EU member country on its sovereign debt, and/or an economic recession in an EU member country may have a significant adverse effect on the economies of EU member countries and their trading partners, including some or all of the European countries in which the Fund invests.

Following a referendum in June 2016, the UK formally exited from the EU on January 31, 2020 (known as "Brexit"). During a transition period that ended December 31, 2020, the UK continued to abide by the EU's rules and the UK's trade relationships with the EU will generally continue unchanged. During this period and beyond, the impact on the UK and European economies and the broader global economy could be significant, resulting in negative impacts, such as increased volatility and illiquidity, and potentially lower economic growth of markets in the UK, Europe and globally, which may adversely affect the value of the Fund's investments. Additionally, depreciation of the British pound sterling and/or the euro in relation to the U.S. dollar in anticipation of Brexit would adversely affect Fund investments denominated in British pound sterling and/or the euro, regardless of the performance of the investment.

Geographic Investment Risk: To the extent that the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. For example, political and economic conditions and changes in regulatory, tax, or economic policy in a country could significantly affect the market in that country and in surrounding or related countries and have a negative impact on the Fund's performance. Currency developments or restrictions, political and social instability, and changing economic conditions have resulted in significant market volatility.

Management Risk: While the Fund is not actively managed, the Fund is subject to the risks associated with decisions made by the Fund's investment adviser if the Fund utilizes a representative sampling strategy or to the extent the Fund's investment adviser makes decisions regarding the investment of collateral from securities on loan.

Models and Data Risk: The Index relies heavily on proprietary models as well as information and data supplied by third parties (“Models and Data”). When Models and Data prove to be incorrect or incomplete, any decisions by the Index made in reliance thereon expose the Fund to potential risks as the Fund tracks the Index.

Natural Disaster/Epidemic Risk: Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund’s investments. Given the increasing interdependence among global economies and markets, conditions in one country, market, or region are increasingly likely to adversely affect markets, issuers, and/or foreign exchange rates in other countries, including the U.S. Any such events could have a significant adverse impact on the value of the Fund’s investments.

New Fund Risk: The Fund is a recently organized investment company with limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

New Index Provider Risk: The Index was created by and is owned and maintained by the Index Provider, which has not previously been an index provider, which may create additional risks for investing in the Fund.

Non-Diversification Risk: Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a small number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a small number of issuers could cause the Fund’s overall value to decline to a greater degree than if the Fund held a more diversified portfolio. This may increase the Fund’s volatility and have a greater impact on the Fund’s performance.

Passive Investment Risk: The Fund is not actively managed and therefore would not sell an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index. Unlike with an actively managed fund, the Fund’s investment adviser does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, the Fund’s performance could be lower than other types of funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline.

Securities Lending Risk: The Fund may engage in securities lending. The Fund may lose money if the borrower of the loaned securities delays returning in a timely manner or fails to return the loaned securities. Securities lending involves the risk that the Fund could lose money in the event of a decline in the value of collateral provided for loaned securities. In addition, the Fund bears the risk of loss in connection with its investment of the cash collateral it receives from a borrower. To the extent that the value or return of the Fund’s investment of the cash collateral declines below the amount owed to the borrower, the Fund may incur losses that exceed the amount it earned on lending the security.

Smaller Companies Risk: The Fund’s Index may be composed primarily of, or have significant exposure to, securities of smaller companies. Smaller companies may be more vulnerable to adverse business or economic events than larger, more established companies, and may underperform other segments of the market or the equity market as a whole. The securities of smaller companies also tend to be bought and sold less frequently and at significantly lower trading volumes than the securities of larger companies. As a result, it may be more difficult for the Fund to buy or sell a significant amount of the securities of a smaller company without an adverse impact on the price of the company’s securities, or the Fund may have to sell such securities in smaller quantities over a longer period of time, which may increase the Fund’s tracking error.

Tax Risk: To qualify for the favorable tax treatment generally available to regulated investment companies, the Fund must satisfy certain diversification requirements under the Internal Revenue Code of 1986, as amended (the “Code”). In particular, the Fund generally may not acquire a security if, as a result of the acquisition, more than 50% of the value of the Fund’s assets would be invested in (a) issuers in which the Fund has, in each case, invested more than 5% of the Fund’s assets and (b) issuers more than 10% of whose outstanding voting securities are owned by the Fund. When the Index is concentrated in a relatively small number of securities, it may not be possible for the Fund to fully implement a replication strategy or a representative sampling strategy while satisfying these diversification requirements. The Fund’s efforts to satisfy the diversification requirements may cause the Fund’s return to deviate from that of the Index, and the Fund’s efforts to replicate the Index may cause it inadvertently to fail to satisfy the diversification requirements. If the Fund were to fail to qualify as a regulated investment company, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income.

Tracking Error Risk: The Fund’s return may not match or achieve a high degree of correlation with the return of the Index. To the extent the Fund utilizes a sampling approach, it may experience tracking error to a greater extent than if the Fund sought to replicate the Index. In addition, in order to minimize the market impact of an Index rebalance, the Fund may begin trading to effect the rebalance in advance of the effective date of the rebalance and continue trading after the effective date of the rebalance, which may contribute to tracking error.

Valuation Risk: The sales price that the Fund could receive for a security may differ from the Fund’s valuation of the security and may differ from the value used by the Index, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. In addition, the value of the securities in the Fund’s portfolio may change on days when shareholders will not be able to purchase or sell the Fund’s shares.

Performance Information

The Fund is new and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund’s returns and comparing the Fund’s performance to a broad measure of market performance. Updated performance information is available at www.etfmg.com.

Investment Adviser

ETF Managers Group LLC (the “Adviser”) serves as the investment adviser to the Fund.

Portfolio Managers

Samuel R. Masucci, III, Chief Executive Officer of the Adviser, Frank Vallario, Chief Investment Officer of the Adviser, Donal Bishnoi, Portfolio Manager of the Adviser, and Devin Ryder, Portfolio Manager of the Adviser, have been the Fund’s portfolio managers since the Fund’s inception in September 2021.

Purchase and Sale of Fund Shares

Shares are listed on the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Investors may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the secondary market (the “bid-ask spread”). Recent information about the Fund, including its NAV, market price, premiums and discounts, and bid-ask spreads is available on the Fund’s website at www.etfmg.com.

Except when aggregated in Creation Units, the Fund’s shares are not redeemable securities.

Tax Information

The distributions made by the Fund are taxable, and will be taxed as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an Individual Retirement Account (“IRA”) or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to federal income tax. You should consult your tax advisor about your specific tax situation.

Financial Intermediary Compensation

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

Additional Information about the Index

The Index Provider is not affiliated with the ETF Managers Trust or the Fund’s adviser, distributor, or any of their respective affiliates.

A committee composed of staff of the Index Provider member organizations (the “Committee”) is responsible for decisions regarding the composition of the Index as well as any amendments to the rules. The future composition of the Index is determined by the Committee via the rebalancing and reconstitution process on the selection days according to the procedure outlined in the Index’s methodology. The Committee shall also decide about the future composition of the Index, if any extraordinary events should occur and the implementation of any necessary adjustments. Members of the Committee can recommend changes to the guidelines and submit them to the entire Committee for approval.

Additional Information about the Fund’s Investment Objective and Strategies

The Fund uses an “indexing” investment approach, and seeks to provide investment results that, before fees and expenses, corresponds generally to the price and yield performance of the Index. A number of factors may affect the Fund’s ability to achieve a high

correlation with the Index, including the degree to which the Fund utilizes a sampling methodology. There can be no guarantee that the Fund will achieve a high degree of correlation. The Fund's investment adviser ("Adviser") may sell securities that are represented in the Index or purchase securities not yet represented in the Index, in anticipation of their removal from or addition to the Index. There may also be instances in which the Adviser may choose to overweight securities in the Index, thus causing the Fund to purchase or sell securities not in the Index, but which the Adviser believes are appropriate to substitute for certain securities in the Index. The Fund will not take defensive positions.

The Fund may invest in securities that are not in the Fund's Index to the extent that the Fund's Adviser believes that such investments should help the Fund's overall portfolio track its Index. The Fund will also concentrate its investments (*i.e.*, hold 25% or more of its net assets) in a particular industry or group of related industries to approximately the same extent that the Index is concentrated.

The Fund, as part of its securities lending program, may invest collateral in an affiliated series of ETF Managers Trust, ETFMG Sit Ultra Short ETF. ETF Managers Group LLC serves as the investment adviser to ETFMG Sit Ultra Short ETF. Other investment companies, including Ultra Short ETF, in which the Fund may invest cash collateral can be expected to incur fees and expenses for operations, such as investment advisory and administration fees, which would be in addition to those incurred by the Fund, and which, with respect to Ultra Short ETF, will be received in full or in part by the Adviser.

The Fund's investment objective has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon reasonable notice to shareholders. Additionally, in accordance with rules under the Investment Company Act of 1940, as amended (the "1940 Act"), the Fund's 80% Policy has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon 60 days' written notice to shareholders.

Additional Risk Information

The following section provides additional information regarding the principal risks identified under "Principal Risks" in the Fund's summary.

Associated Risk of Investing in Decarbonization Companies: The underlying Index's decarbonization criteria, and thus the Fund's investment strategy, limits the types and number of investment opportunities available to the Fund, and, as a result, the Fund's returns may be lower than other funds that do not seek to invest in companies based on decarbonization criteria. In addition, decarbonization investing may affect the Fund's exposure to certain companies or industries and the Fund will forgo certain investment opportunities that are screened out of the decarbonization methodology. Finally, some of the companies are developing new technologies that have not yet achieved full commercialization.

Concentration Risk: The Fund's investments will be concentrated in an industry or group of industries to the extent the Index is so concentrated. To the extent the Fund invests more heavily in particular industries, groups of industries, or sectors of the economy, its performance will be especially sensitive to developments that significantly affect those industries, groups of industries, or sectors of the economy, and the value of Shares may rise and fall more than the value of shares that invest in securities of companies in a broader range of industries or sectors.

Equity Market Risk: An investment in the Fund involves risks of investing in equity securities, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in securities prices. The values of equity securities could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of out-performance and under-performance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Holders of common stocks incur more risk than holders of preferred stocks and debt obligations because common stockholders, as owners of the issuer, have generally inferior rights to receive payments from the issuer in comparison with the rights of creditors of, or holders of debt obligations or preferred stocks issued by, the issuer. Additionally, natural or environmental disasters, widespread disease or other public health issues, war, acts of terrorism or other events could result in increased premiums or discounts to the Fund's NAV.

ETF Risks:

Absence of an Active Market Risk: Although the Fund's shares are approved for listing on the Exchange, there can be no assurance that an active trading market will develop and be maintained for Fund shares. There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Fund may experience greater tracking error to its Index than it otherwise would at higher asset levels or the Fund may ultimately liquidate.

Authorized Participants, Market Makers and Liquidity Providers Concentration Risk: The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"), none of which are obligated to engage in creation and/or redemption transactions. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, there may be a significantly diminished trading market for Fund shares and shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and

no other entities step forward to perform their functions. The risks associated with limited APs may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

Cash Transactions Risk: While not likely, the Fund may effect its creations and redemptions primarily for cash, rather than in-kind securities. Paying redemption proceeds in cash rather than through in-kind delivery of portfolio securities may require the fund to dispose of or sell portfolio investments at an inopportune time to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to incur certain costs such as brokerage costs, and to recognize gains or losses that it might not have incurred if it had made a redemption in-kind. As a result, the Fund may pay out higher or lower annual capital gains distributions than ETFs that redeem in-kind. In addition, the costs imposed on the Fund will decrease the Fund's NAV unless the costs are offset by a transaction fee payable by an AP.

Costs of Buying or Selling Shares Risk: Investors buying or selling the Fund's shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by the applicable broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for shares (the "bid" price) and the price at which an investor is willing to sell shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for shares based on trading volume and market liquidity, and is generally lower if the Fund's shares have more trading volume and market liquidity and higher if the Fund's shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling shares, including bid/ask spreads, frequent trading of shares may significantly reduce investment results and an investment in shares may not be advisable for investors who anticipate regularly making small investments.

Fluctuation of NAV Risk: The NAV of the Fund's shares will generally fluctuate with changes in the market value of the Fund's securities holdings. The market prices of shares will generally fluctuate in accordance with changes in the Fund's NAV and supply and demand of shares on the Exchange. It cannot be predicted whether the Fund's shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the Index trading individually or in the aggregate at any point in time. The market prices of the Fund's shares may deviate significantly from the NAV of the shares during periods of market volatility. While the creation/redemption feature is designed to make it likely that the Fund's shares normally will trade close to the Fund's NAV, disruptions to creations and redemptions may result in trading prices that differ significantly from the Fund's NAV. As a result, investors in the Fund may pay significantly more or receive significantly less for Fund shares than the value of the Fund's underlying securities or the NAV of Fund shares. If an investor purchases the Fund's shares at a time when the market price is at a premium to the NAV of the shares or sells at a time when the market price is at a discount to the NAV of the shares, then the investor may sustain losses.

Market Trading Risk: An investment in the Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation/redemption process of the Fund. Any of these factors, among others, may lead to the Fund's shares trading at a premium or discount to NAV.

Trading Issues Risk: Although the Fund's shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will be maintained. Trading in the Fund's shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in shares is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13% and 20%). Additional rules applicable to the Exchange may halt trading in Fund shares when extraordinary volatility causes sudden, significant swings in the market price of Fund shares. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged or that the shares will trade with any volume, or at all. In stressed market conditions, the liquidity of the Fund's shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than the Fund's shares, potentially causing the market price of the Fund's shares to deviate from their NAV.

Further, secondary markets may be subject to erratic trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in Fund shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV. Decisions by market makers or APs to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Fund shares trading at a price which differs materially from NAV and also in greater than normal intraday bid/ask spreads for Fund shares. During a "flash crash," the market prices of the Fund's shares may decline suddenly and significantly. Such a decline may not reflect the performance of the portfolio securities held by the Fund. Flash crashes may cause APs and other market makers to limit or

cease trading in the Fund's shares for temporary or longer periods. Shareholders could suffer significant losses to the extent that they sell shares at these temporarily low market prices.

Foreign Investment Risk: Returns on investments in foreign stocks could be more volatile than, or trail the returns on, investments in U.S. stocks. Since foreign exchanges may be open on days when the Fund does not price its Shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Shares. Conversely, Shares may trade on days when foreign exchanges are closed. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs. Each of these factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

Currency Risk: Indirect and direct exposure to foreign currencies subject the Fund to the risk that currencies will decline in value relative to the U.S. dollar. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates and the imposition of currency controls or other political developments in the U.S. or abroad. The Fund's NAV is determined on the basis of U.S. dollars and, therefore, the Fund may lose value if the local currency of a foreign market depreciates against the U.S. dollar, even if the local currency value of the Fund's holdings goes up.

Depository Receipts Risk: The Fund may invest in depository receipts. Depository receipts include ADRs and GDRs. ADRs are U.S. dollar-denominated receipts representing shares of foreign-based corporations. ADRs are issued by U.S. banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. GDRs are depository receipts which are similar to ADRs, but are shares of foreign-based corporations generally issued by international banks in one or more markets around the world. Investment in ADRs and GDRs may be less liquid than the underlying shares in their primary trading market and GDRs, many of which are issued by companies in emerging markets, may be more volatile and less liquid than depository receipts issued by companies in more developed markets.

Depository receipts may be sponsored or unsponsored. Sponsored depository receipts are established jointly by a depository and the underlying issuer, whereas unsponsored depository receipts may be established by a depository without participation by the underlying issuer. Holders of an unsponsored depository receipt generally bear all the costs associated with establishing the unsponsored depository receipt. In addition, the issuers of the securities underlying unsponsored depository receipts are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the depository receipts.

Depository receipts may be unregistered and unlisted. The Fund's investments also may include ADRs and GDRs that are not purchased in the public markets and are restricted securities that can be offered and sold only to "qualified institutional buyers" under Rule 144A of the Securities Act of 1933, as amended. The Adviser will determine the liquidity of such investments pursuant to guidelines established by the Board. If a particular investment in such ADRs or GDRs is deemed illiquid, that investment will be included within the Fund's limitation on investment in illiquid securities. Moreover, if adverse market conditions were to develop during the period between the Fund's decision to sell these types of ADRs or GDRs and the point at which the Fund is permitted or able to sell such security, the Fund might obtain a price less favorable than the price that prevailed when it decided to sell.

Foreign Market and Trading Risk: The trading markets for many foreign securities are not as active as U.S. markets and may have less governmental regulation and oversight. Foreign markets also may have clearance and settlement procedures that make it difficult for the Fund to buy and sell securities. These factors could result in a loss to the Fund by causing the Fund to be unable to dispose of an investment or to miss an attractive investment opportunity, or by causing Fund assets to be uninvested for some period of time. Where all or a part of the Fund's underlying securities trade in a market that is closed when the Exchange is open, there may be changes between the last quotation from its closed foreign market and the value of such securities during the Fund's domestic trading day. This could lead to differences between the market price of the Fund's shares and the value of the Fund's underlying securities.

Foreign Securities Risk: The Fund invests in foreign securities, including non-U.S. dollar-denominated securities traded outside of the United States and U.S. dollar-denominated securities of foreign issuers traded in the United States. Investment in foreign securities may involve higher costs than investment in U.S. securities, including higher transaction and custody costs as well as the imposition of additional taxes by foreign governments. Foreign investments may also involve risks associated with the level of currency exchange rates, less complete financial information about the issuers, less market liquidity, more market volatility and political instability, as well as varying regulatory requirements applicable to investments in non-U.S. issuers. Future political and economic developments, the possible imposition of withholding taxes on dividend income, the possible seizure or nationalization of foreign holdings, the possible establishment of exchange controls or freezes on the convertibility of currency, or the adoption of other governmental restrictions might adversely affect an investment in foreign securities. Additionally, foreign issuers may be subject to less stringent regulation, and to different accounting, auditing and recordkeeping requirements.

Political and Economic Risk: The Fund is subject to foreign political and economic risk not associated with U.S. investments, meaning that political events (civil unrest, national elections, changes in political conditions and foreign relations, imposition of exchange controls and repatriation restrictions), social and economic events (labor strikes, rising inflation) and natural disasters occurring in a country where the Fund invests could cause the Fund's investments in that country to experience gains or losses. The Fund also could be unable to enforce its ownership rights or pursue legal remedies in countries where it invests.

Privatization Risk: Some countries in which the Fund invests have begun a process of privatizing certain entities and industries. Privatized entities may lose money or be re-nationalized.

Risks Related to Investing in Europe: The economies of Europe are highly dependent on each other, both as key trading partners and as in many cases as fellow members maintaining the euro. Reduction in trading activity among European countries may cause an adverse impact on each nation's individual economies. European countries that are part of the Economic and Monetary Union of the EU are required to comply with restrictions on inflation rates, deficits, interest rates, debt levels, and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro, the default or threat of default by an EU member country on its sovereign debt, and recessions in an EU member country may have a significant adverse effect on the economies of EU member countries and their trading partners.

The European financial markets have recently experienced volatility and adverse trends due to concerns about rising government debt levels of several European countries, including Greece, Spain, Ireland, Italy, and Portugal. These events have adversely affected the exchange rate of the euro and may continue to significantly affect every country in Europe. For some countries, the ability to repay sovereign debt is in question, and default is possible, which could affect their ability to borrow in the future. For example, Greece has been required to impose harsh austerity measures on its population to receive financial aid from the International Monetary Fund and EU member countries. These austerity measures have also led to social uprisings within Greece, as citizens have protested – at times violently – the actions of their government. The persistence of these factors may seriously reduce the economic performance of Greece and pose serious risks for the country's economy in the future. Furthermore, there is the possibility of contagion that could occur if one country defaults on its debt, and that a default in one country could trigger declines and possible additional defaults in other countries in the region.

Responses to the financial problems by European governments, central banks and others, including austerity measures and reforms, may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and other entities of their debt could have additional adverse effects on economies, financial markets, and asset valuations around the world. In addition, one or more countries may abandon the euro, the common currency of the EU, and/or withdraw from the EU alongside the UK, as discussed below. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching.

The UK formally exited from the EU on January 31, 2020 (known as “Brexit”), and effective December 31, 2020, the UK ended a transition period during which it continued to abide by the EU's rules and the UK's trade relationships with the EU were generally unchanged. Following this transition period, the impact on the UK and European economies and the broader global economy could be significant, resulting in negative impacts, such as increased volatility and illiquidity, and potentially lower economic growth of markets in the UK, Europe and globally, which may adversely affect the value of the Fund's investments.

Geographic Investment Risk: To the extent that the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. For example, political and economic conditions and changes in regulatory, tax, or economic policy in a country could significantly affect the market in that country and in surrounding or related countries and have a negative impact on the Fund's performance. Currency developments or restrictions, political and social instability, and changing economic conditions have resulted in significant market volatility.

Management Risk: While the Fund is not actively managed, the Fund is subject to the risks associated with decisions made by the Adviser if the Fund utilizes a representative sampling strategy or to the extent the Adviser makes decisions regarding the investment of collateral from securities on loan.

Models and Data Risk: When models and data prove to be incorrect or incomplete, any decisions made in reliance thereon expose the Fund to potential risks as the Fund tracks the Index. For example, by relying on models and data, the Index, and consequently the Fund, may add or remove certain investments at prices that are too high or too low or to miss favorable opportunities altogether.

Models may have aspects that are predictive in nature. The use of predictive models has inherent risks. For example, such models may incorrectly forecast future behavior, leading to potential losses on a cash flow and/or a mark-to-market basis. In addition, in unforeseen or certain low-probability scenarios (often involving a market disruption of some kind), such models may produce unexpected results, which can result in losses for the Fund. Furthermore, because predictive models are usually constructed based on

historical data supplied by third parties, the success of relying on such models may depend heavily on the accuracy and reliability of the supplied historical data.

All models rely on correct market data inputs. If incorrect market data is entered into even a well-founded model, the resulting information will be incorrect. However, even if market data is input correctly, “model prices” will often differ substantially from market prices, especially for instruments with complex characteristics, such as derivative instruments.

Natural Disaster/Epidemic Risk: Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund’s investments. Given the increasing interdependence among global economies and markets, conditions in one country, market, or region are increasingly likely to adversely affect markets, issuers, and/or foreign exchange rates in other countries, including the U.S. Any such events could have a significant adverse impact on the value of the Fund’s investments.

New Fund Risk: The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.

New Index Provider Risk: The Index was created by and is owned and maintained by the Index Provider, which has not previously been an index provider, which may create additional risks for investing in the Fund.

Non-Diversification Risk: Because the Fund is “non-diversified,” the Fund may invest a greater percentage of its assets in the securities of a single issuer or a small number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a small number of issuers could cause the Fund’s overall value to decline to a greater degree than if the Fund held a more diversified portfolio. This may increase the Fund’s volatility and have a greater impact on the Fund’s performance.

Passive Investment Risk: The Fund is not actively managed. Therefore, unless a specific security is removed from the Fund’s Index, the Fund generally would not sell a security because the security’s issuer was in financial trouble. If a specific security is removed from the Fund’s Index, the Fund may be forced to sell such security at an inopportune time or for a price other than the security’s current market value. An investment in the Fund involves risks similar to those of investing in any equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. It is anticipated that the value of the Fund’s shares will decline, more or less, in correspondence with any decline in value of the Fund’s respective Index. An Index may not contain the appropriate mix of securities for any particular economic cycle, and the timing of movements from one type of security to another in seeking to replicate the Index could have a negative effect on the Fund. Unlike with an actively managed fund, the Adviser does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, the Fund’s performance could be lower than other types of funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline.

Securities Lending Risk: The Fund may engage in securities lending. The Fund may lose money if the borrower of the loaned securities delays returning in a timely manner or fails to return the loaned securities. Securities lending involves the risk that the Fund could lose money in the event of a decline in the value of collateral provided for loaned securities. In addition, the Fund bears the risk of loss in connection with its investment of the cash collateral it receives from a borrower. When the Fund invests cash collateral in other investment companies, such investments of cash collateral will be subject to substantially the same risks as those associated with the direct ownership of securities held by such investment companies. To the extent that the value or return of the Fund’s investment of the cash collateral declines below the amount owed to the borrower, the Fund may incur losses that exceed the amount it earned on lending the security. The Fund may borrow money to repay the applicable borrower the amount of cash collateral owed to the borrower upon return of the loaned securities. This will result in financial leverage, which may cause the Fund to be more volatile because financial leverage tends to exaggerate the effect of any increase or decrease in the value of the Fund’s portfolio securities.

Smaller Companies Risk: The Fund’s Index may be composed primarily of, or have significant exposure to, securities of smaller companies. As a result, the Fund may be subject to the risk that securities of smaller companies represented in the Index may underperform securities of larger companies or the equity market as a whole. In addition, in comparison to securities of companies with larger capitalizations, securities of smaller-capitalization companies may experience more price volatility, greater spreads between their bid and ask prices, less frequent trading, significantly lower trading volumes, and cyclical or static growth prospects. As a result of the differences between the securities of smaller companies and those of companies with larger capitalizations, it may be more difficult for the Fund to buy or sell a significant amount of the securities of a smaller company without an adverse impact on the price of the company’s securities, or the Fund may have to sell such securities in smaller quantities over a longer period of time, which may increase the Fund’s tracking error. Smaller-capitalization companies often have limited product lines, markets or financial resources, and may therefore be more vulnerable to adverse developments than larger capitalization companies. These securities may or may not pay dividends.

Tax Risk: To qualify for the favorable tax treatment generally available to regulated investment companies, the Fund must satisfy certain diversification requirements under the Code. In particular, the Fund generally may not acquire a security if, as a result of the

acquisition, more than 50% of the value of the Fund's assets would be invested in (a) issuers in which the Fund has, in each case, invested more than 5% of the Fund's assets and (b) issuers more than 10% of whose outstanding voting securities are owned by the Fund. When the Index is concentrated in a relatively small number of securities, it may not be possible for the Fund to fully implement a replication strategy or a representative sampling strategy while satisfying these diversification requirements. The Fund's efforts to satisfy the diversification requirements may cause the Fund's return to deviate from that of the Index, and the Fund's efforts to replicate the Index may cause it inadvertently to fail to satisfy the diversification requirements.

If the Fund were to fail to qualify as a regulated investment company, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. Distributions to the Fund's shareholders would generally be taxed as ordinary dividends. Under certain circumstances, the Fund may be able to cure a failure to qualify as a regulated investment company, but in order to do so the Fund may incur significant Fund-level taxes and may be forced to dispose of certain assets. Relief is provided for certain *de minimis* failures of the diversification requirements where the Fund corrects the failure within a specified period. If the Fund were to fail to qualify as a regulated investment company in any taxable year, the Fund would be required to pay out its earnings and profits accumulated in that year in order to qualify for treatment as a regulated investment company in a subsequent year. If the Fund failed to qualify as a regulated investment company for a period greater than two taxable years, the Fund would generally be required to pay the Fund-level tax on any net built-in gains with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a regulated investment company in a subsequent year.

Tracking Error Risk. Tracking error refers to the risk that the Fund's Adviser may not be able to cause the Fund's performance to match or correlate to that of the Fund's Index, either on a daily or aggregate basis. There are a number of factors that may contribute to the Fund's tracking error, such as Fund expenses, imperfect correlation between the Fund's investments and those of the Index, rounding of share prices, changes to the composition of the Index, regulatory policies, and high portfolio turnover rate. In addition, mathematical compounding may prevent the Fund from correlating with the monthly, quarterly, annual or other period performance of the Index. In addition, in order to minimize the market impact of the Index rebalance, the Fund may begin trading to effect the rebalance in advance of the effective date of the rebalance and continue trading after the effective date of the rebalance. This may contribute to tracking error if the weights of the Fund's portfolio securities diverge from the weights of the securities in the Index during the rebalancing. Tracking error in such circumstances may be greater if the Fund is trading in securities that are less liquid or lightly traded. Tracking error may cause the Fund's performance to be less than expected.

Valuation Risk. The sales price that the Fund could receive for a security may differ from the Fund's valuation of the security and may differ from the value used by the Index, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. In addition, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.

Portfolio Holdings

Information about the Fund's daily portfolio holdings will be available at www.etfmg.com. A summarized description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information ("SAI").

Fund Management

Adviser. ETF Managers Group LLC, the investment adviser to the Fund, is a Delaware limited liability company located at 30 Maple Street, 2nd Floor, Summit, New Jersey 07901. The Adviser provides investment advisory services to exchange-traded funds. The Adviser serves as investment adviser to the Fund with overall responsibility for the day-to-day portfolio management of the Fund, subject to the supervision of the Board. For its services, the Adviser receives a fee that is equal to 0.75% per annum of the average daily net assets of the Fund, calculated daily and paid monthly.

Under the Investment Advisory Agreement, the Adviser has overall responsibility for the general management and administration of the Fund and arranges for transfer agency, custody, fund administration, securities lending, and all other non-distribution related services necessary for the Fund to operate. Additionally, under the Investment Advisory Agreement, the Adviser has agreed to pay all expenses of the Fund, except for: the fee paid to the Adviser pursuant to the Investment Advisory Agreement, interest charges on any borrowings, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses (such as, among other things and subject to Board approval, certain proxy solicitation costs and non-standard Board-related expenses and litigation against the Board, Trustees, Fund, Adviser, and officers of the Adviser), and distribution (12b-1) fees and expenses (collectively, "Excluded Expenses").

A discussion regarding the basis for the Board's approval of the Investment Advisory Agreement will be available in the Fund's first Semi-Annual or Annual Report.

Manager of Managers Structure. The Adviser and the Trust have received an exemptive order (the "Order") from the SEC that permits the Adviser to enter into investment sub-advisory agreements with sub-advisers without obtaining shareholder approval. The

Adviser, subject to the review and approval of the Board, may select one or more sub-advisers for the Fund and supervise, monitor and evaluate the performance of each sub-adviser.

The Order also permits the Adviser, subject to the approval of the Board, to replace sub-advisers and amend investment sub-advisory agreements, including fees, without shareholder approval whenever the Adviser and the Board believe such action will benefit the Fund and its shareholders. The Adviser thus has the ultimate responsibility (subject to the ultimate oversight of the Board) to recommend the hiring and replacement of sub-advisers as well as the discretion to terminate any sub-adviser and reallocate the Fund's assets for management among any other sub-adviser(s) and itself. This means that the Adviser may be able to reduce the sub-advisory fees and retain a larger portion of the management fee, or increase the sub-advisory fees and retain a smaller portion of the management fee. The Adviser will compensate each sub-adviser out of its management fee. The Fund is required to provide shareholders with certain information regarding any new sub-adviser within 90 days of the hiring of any new sub-adviser. Such information generally includes the information that would have been provided to shareholders in the form of a proxy statement in the absence of the Order.

The Adviser's reliance on such Order with respect to the Fund is contingent on the holders of a majority of the Fund's outstanding voting securities approving the Fund's use of a manager of managers structure and the Adviser's reliance on such Order. Prior to the date of this Prospectus, shareholders of the Fund approved the use by the Fund of a manager of managers structure and the Adviser's reliance on such Order.

Portfolio Managers

The Fund's portfolio managers are primarily responsible for the day-to-day management of the Fund. The portfolio managers are responsible for various functions related to portfolio management, including, but not limited to, investing cash inflows, implementing investment strategy, researching and reviewing investment strategy.

The Fund is managed by Samuel R. Masucci, III, Chief Executive Officer of the Adviser, Frank Vallario, Chief Investment Officer of the Adviser, Donal Bishnoi, Portfolio Manager of the Adviser, and Devin Ryder, Portfolio Manager of the Adviser.

Mr. Samuel Masucci, III has more than 25 years' experience in investment banking, structured product development, sales and trading. In the last 5 years, he founded ETF Managers Group (ETFMG). Prior to ETFMG he has held senior positions at Bear Stearns, UBS, SBC Warburg, and Merrill Lynch and has experience in creating, building and managing businesses for the issuance, sales and trading of: ETFs, index products, commodity products, hedge funds, ABS, and OTC structured products in the U.S. and Europe.

Frank Vallario serves in the role of Chief Investment Officer for the Adviser. Mr. Vallario is responsible for the portfolio construction, trading, risk management and portfolio analysis processes associated with ETF strategies. Prior to his current role at the Adviser, Mr. Vallario has had a variety of senior roles over his 25-year career in financial services. He joined Oppenheimer Funds in 2017 where he was Head of Equity Portfolio Management for Smart Beta ETFs. Prior to that he was a Senior Portfolio Manager at Columbia Threadneedle from September 2015 to June 2017 where he was responsible for the day to day management of the firm's ETF business, which was acquired from his previous firm, Emerging Global Advisors (EGA). From September 2010 to September 2015, he was relationship manager at MSCI responsible for providing investment solutions to complex problems using MSCI Barra's fundamental models and portfolio construction tools. Previously, he was a partner in a start-up asset management firm where he served as the director of portfolio management. Mr. Vallario began his career at UBS Global Asset Management where he spent over a decade in various quantitative portfolio management equity roles including equity market neutral, tactical asset allocation, structured active equities, enhanced index, passive management and factor research. Mr. Vallario served on the Investment Committee for the Girl Scouts of Connecticut and was a University Affiliate at the University of Utah – David Eccles School of Business. He received a B.S. in Finance from Lehigh University and a M.B.A. with a concentration in Finance from Rutgers University.

Donal A. Bishnoi, CFA, has more than 16 years of experience in portfolio management and risk management. Prior to joining the Adviser, Mr. Bishnoi held a senior portfolio management position with Oppenheimer Funds from 2018 to 2019 where he was responsible for managing approximately \$5 billion in assets across 20 passive strategies. Prior to joining Oppenheimer Funds in 2010, Mr. Bishnoi managed a long/short systematic equity strategy at Moore Capital from 2007 to 2009. He holds a bachelor's degree from Boston University's Questrom School of Business and is a CFA charter holder.

Devin Ryder began her career with the Adviser during the summer of 2017 and re-joined the Adviser on a permanent basis in 2018 to be a part of the Adviser's portfolio management team. Prior to joining the Adviser, Ms. Ryder was pursuing studies in the quantitative aspects of risk management and finance, for which she received a B.S. in Mathematics of Finance and Risk Management from the University of Michigan in 2017.

The SAI provides additional information about each Portfolio Manager's compensation, other accounts managed, and ownership of the Fund's shares.

Buying and Selling the Fund

The Fund issues and redeems Shares at NAV only in Creation Units. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor (defined below), and that

has been accepted by the Fund's transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

The Fund's shares are listed for secondary trading on the Exchange. When you buy or sell the Fund's shares on the secondary market, you will pay or receive the market price. You may incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The shares will trade on the Exchange at prices that may differ to varying degrees from the daily NAV of the shares. The Exchange is generally open Monday through Friday and is closed weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

NAV per share for the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by its total number of shares outstanding. Expenses and fees, including management and distribution fees, if any, are accrued daily and taken into account for purposes of determining NAV. NAV is determined each business day, normally as of the close of regular trading of the New York Stock Exchange (ordinarily 4:00 p.m., Eastern time).

When determining NAV, the value of the Fund's portfolio securities is based on market prices of the securities, which generally means a valuation obtained from an exchange or other market (or based on a price quotation or other equivalent indication of the value supplied by an exchange or other market) or a valuation obtained from an independent pricing service. If a security's market price is not readily available or does not otherwise accurately reflect the fair value of the security, the security will be valued by another method that the Board believes will better reflect fair value in accordance with the Trust's valuation policies and procedures. Fair value pricing may be used in a variety of circumstances, including, but not limited to, situations when the value of a security in the Fund's portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded but prior to the close of the Exchange (such as in the case of a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. Accordingly, the Fund's NAV may reflect certain portfolio securities' fair values rather than their market prices.

Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security will materially differ from the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund's NAV and the prices used by the Index. This may result in a difference between the Fund's performance and the performance of the Index.

The Fund invests in non-U.S. securities. Non-U.S. securities held by the Fund may trade on weekends or other days when the Fund does not price its shares. As a result, the Fund's NAV may change on days when Authorized Participants will not be able to purchase or redeem Fund shares.

Frequent Purchases and Redemptions of the Fund's Shares

Unlike frequent trading of shares of a traditional open-end mutual fund's (*i.e.*, not exchange-traded) shares, frequent trading of shares of the Fund on the secondary market does not disrupt portfolio management, increase the Fund's trading costs, lead to realization of capitalization gains, or otherwise harm the Fund's shareholders because these trades do not involve the Fund directly. Certain institutional investors are authorized to purchase and redeem the Fund's shares directly with the Fund. Because these trades are effected in-kind (*i.e.*, for securities, and not for cash), they do not cause any of the harmful effects noted above that may result from frequent cash trades. Moreover, the Fund imposes transaction fees on in-kind purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting in-kind trades. These fees increase if an investor substitutes cash in part or in whole for Creation Units, reflecting the fact that the Fund's trading costs increase in those circumstances. For these reasons, the Board has determined that it is not necessary to adopt policies and procedures to detect and deter frequent trading and market-timing in shares of the Fund.

Dividends, Distributions, and Taxes

Fund Distributions

The Fund intends to pay out dividends, if any, quarterly and distribute any net realized capital gains to its shareholders annually.

Dividend Reinvestment Service

Brokers may make available to their customers who own the Fund's shares the DTC book-entry dividend reinvestment service. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole shares of the Fund. Without this service, investors would receive their distributions in cash. In order to achieve the maximum total return on their investments, investors are encouraged to use the dividend reinvestment service. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require the Fund's shareholders to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund purchased in the secondary market.

Tax Information

The following is a summary of some important tax issues that affect the Fund and its shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a detailed explanation of the tax treatment of the Fund, or the tax consequences of an investment in the Fund. The summary is very general, and does not address investors subject to special rules, such as investors who hold shares through an IRA, 401(k) or other tax-deferred account. More information about taxes is located in the SAI. You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.

Tax Status of the Fund

The Fund is treated as a separate entity for federal tax purposes, and intends to qualify for the special tax treatment afforded to regulated investment companies under the Code. As long as the Fund qualifies as a regulated investment company, it pays no federal income tax on the earnings it distributes to shareholders.

Tax Status of Distributions

- The Fund will, for each year, distribute substantially all of its net investment income and net capital gains.
- The Fund's distributions from income will generally be taxed to you as ordinary income or qualified dividend income. For non-corporate shareholders, dividends reported by the Fund as qualified dividend income are generally eligible for reduced tax rates.
- Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. The Fund's strategies may limit its ability to distribute dividends eligible for the dividends-received deduction for corporate shareholders.
- Any distributions of net capital gain (the excess of the Fund's net long-term capital gains over its net short-term capital losses) that you receive from the Fund are taxable as long-term capital gains regardless of how long you have owned your shares. Long-term capital gains are currently taxed to non-corporate shareholders at reduced maximum rates.
- Dividends and distributions are generally taxable to you whether you receive them in cash or in additional shares through a broker's dividend reinvestment service. If you receive dividends or distributions in the form of additional shares through a broker's dividend reinvestment service, you will be required to pay applicable federal, state or local taxes on the reinvested dividends but you will not receive a corresponding cash distribution with which to pay any applicable tax.
- The Fund may be able to pass through to you foreign tax credits for certain taxes paid by the Fund, provided the Fund meets certain requirements.
- Distributions paid in January but declared by the Fund in October, November or December of the previous year may be taxable to you in the previous year.
- The Fund will inform you of the amount of your ordinary income dividends, qualified dividend income, foreign tax credits and net capital gain distributions received from the Fund shortly after the close of each calendar year.

Taxes on Exchange-Listed Share Sales. Any capital gain or loss realized upon a sale of shares will generally be treated as long-term capital gain or loss if the shares have been held for more than one year and as short-term capital gain or loss if the shares have been held for one year or less, except that any capital loss on the sale of shares held for six months or less will be treated as long-term capital loss to the extent of amounts treated as distributions of long-term capital gains to the shareholder with respect to such shares.

Investment in Foreign Securities. The Fund may be subject to foreign withholding taxes on income it may earn from investing in foreign securities, which may reduce the return on such investments. In addition, the Fund's investments in foreign securities or foreign currencies may increase or accelerate the Fund's recognition of ordinary income and may affect the timing or amount of its distributions. The Fund may be eligible to file an election that would permit shareholders who are U.S. citizens, resident aliens or U.S. corporations to claim a foreign tax credit or deduction (but not both) on their U.S. income tax returns for their pro rata portions of qualified taxes paid by the Fund to foreign countries in respect of foreign securities held for at least the minimum period specified in the Code. For the purposes of the foreign tax credit, each such shareholder would include in gross income from foreign sources its pro rata share of such taxes. Certain limitations imposed by the Code may prevent shareholders from receiving a full foreign tax credit or deduction for their allocable amount of such taxes.

Medicare Tax. U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% Medicare contribution tax on their "net investment income," including interest, dividends, and capital gains (including capital gains realized on the sale or exchange of shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Non-U.S. Investors. If you are not a citizen or permanent resident of the United States, the Fund's ordinary income dividends will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or business. This 30% withholding tax generally will not apply to distributions of net capital gain.

Distributions paid to a shareholder that is a “foreign financial institution” as defined in Section 1471 of the Code and that does not meet the requirements imposed on foreign financial institutions by Section 1471 will generally be subject to withholding tax at a 30% rate. Distributions to a non-U.S. shareholder that is not a foreign financial institution will generally be subject to such withholding tax if the shareholder fails to make certain required certifications. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement.

Backup Withholding. The Fund or your broker will be required in certain cases to withhold (as “backup withholding”) on amounts payable to any shareholder who (1) has provided either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the Internal Revenue Service for failure to properly report payments of interest or dividends, (3) has failed to certify that such shareholder is not subject to backup withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien). The backup withholding rate is currently 24%. Backup withholding will not, however, be applied to payments that have been subject to the 30% withholding tax applicable to shareholders who are neither citizens nor residents of the United States.

Distribution

The Distributor, ETFMG Financial LLC, an affiliate of the Adviser, is a broker-dealer registered with the U.S. Securities and Exchange Commission. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in the Fund’s shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor’s principal business address is 30 Maple Street, 2nd Floor, Summit, New Jersey 07901.

The Board has adopted a Distribution and Service Plan (the “Plan”) pursuant to Rule 12b-1 under the 1940 Act with respect to the Fund. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of the Fund’s assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

Fund Service Providers

Sullivan & Worcester LLP, 1666 K Street NW, Washington, DC 20006, serves as legal counsel to the Fund.

WithumSmith + Brown, PC, with offices located at 1411 Broadway, 9th Floor, New York, New York 10018, serves as the Fund’s independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

Index/Trademark Licenses/Disclaimers

Marine Transformation Partners LLC (“MTP”) creates and manages financial indexes, including the Marine Money Decarbonization Index, pursuant to a mutual licensing agreement with International Marketing Strategies, Inc., publisher of Marine Money. Breakwave Advisors LLC is a member of MTP. MTP has licensed the Marine Money Decarbonization Index and Breakwave trademarks (the “Trademarks”) to the Adviser for use in connection with the Fund. The Index is calculated and maintained by Solactive AG (the “Calculation Agent”). The Decarbonization ETF is not sponsored, endorsed, sold or promoted by MTP or its Calculation Agent. MTP and the Calculation Agent make no representation regarding the advisability of trading in such products. MTP has entered into a licensing and marketing support agreement with Exchange Traded Managers Group LLC (“ETFMG”), the parent company of the Adviser (the “MTP Agreement”). Pursuant to the MTP Agreement, MTP has agreed to (i) license the Trademarks for the use of the Adviser; (ii) consult with the Adviser and prepare educational materials, research materials, and updates on regulation of the global shipping technology ecosystem; and (iii) provide support in connection with phone calls, appearances, and written content relating to the marketing of the Fund (the “Services”). In exchange for the Services, the Adviser, from the management fee it receives from the Fund, will share certain profits with MTP. MTP will also assume the obligation of the Adviser to pay certain expenses of the Fund. Although MTP has agreed to be responsible for the payment of certain expenses of the Fund, the Adviser retains the ultimate obligation to the Fund to pay such expenses.

MTP AND THE CALCULATION AGENT DO NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF THE INDEX OR ANY DATA INCLUDED THEREIN AND THEY SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS THEREIN. MTP AND THE CALCULATION AGENT MAKE NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ADVISER, OWNERS OR USERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE INDEX OR ANY DATA INCLUDED THEREIN. MTP AND THE CALCULATION AGENT MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL MTP OR THE CALCULATION AGENT HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS), EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH

DAMAGES. The Fund is not sponsored, endorsed, sold or promoted by MTP or the Calculation Agent. MTP and the Calculation Agent make no representation or warranty, express or implied, to the owners of the Fund or any member of the public regarding the advisability of investing in securities generally or in the Fund in particular or the ability of the Index to track general stock market performance. The Index is determined, composed and calculated by MTP or its Calculation Agent without regard to the Adviser or the Fund. MTP and the Calculation Agent have no obligation to take the needs of the Adviser or the owners of the Fund into consideration in determining, composing or calculating the Index. MTP and the Calculation Agent are not responsible for and have not participated in the determination of the prices and amount of the Fund or the timing of the issuance or sale of the Fund or in the determination or calculation of the equation by which the Fund is converted into cash. MTP and the Calculation Agent have no obligation or liability in connection with the administration, marketing or trading of the Fund.

Shares of the Trust are not sponsored, endorsed, or promoted by the Exchange. The Exchange makes no representation or warranty, express or implied, to the owners of the shares of the Fund. The Exchange is not responsible for, nor has it participated in, the determination of the timing of, prices of, or quantities of the shares of the Fund to be issued, or in the determination or calculation of the equation by which the shares are redeemable.

The Exchange has no obligation or liability to owners of the shares of the Fund in connection with the administration, marketing, or trading of the shares of the Fund. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser and the Fund make no representation or warranty, express or implied, to the owners of shares of the Fund or any members of the public regarding the advisability of investing in securities generally or in the Fund particularly.

Premium/Discount Information

The Fund is new and therefore does not have any information regarding how often shares of the Fund traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of the Fund. This information will be available, however, at www.etfmg.com after the Fund's shares have traded on the Exchange for a full calendar quarter.

Litigation

The Trust, a former and current trustee of the Trust, the Adviser and certain officers of the Adviser were defendants in an action filed May 2, 2017 in the Superior Court of New Jersey captioned PureShares, LLC d/b/a PureFunds et al. v. ETF Managers Group, LLC et al., Docket No. C-63-17. The PureShares action alleged claims based on disputes arising out of contractual relationships with the Adviser relating to certain series of the Trust. The action sought damages in unspecified amounts and injunctive relief based on breach of contract, wrongful termination, and several other claims.

The Adviser and its parent, ETFMG, were defendants in a case filed on October 26, 2017 in the United States District Court for the Southern District of New York by NASDAQ, Inc. ("Nasdaq") captioned Nasdaq, Inc. v. Exchange Traded Managers Group, LLC et al., Case 1:17-cv-08252. This action arose out of the same facts and circumstances, and relates to the same series of the Trust, as the New Jersey litigation and asserted claims for breach of contract, conversion and certain other claims. The matter was the subject of a bench trial in May 2019, and on December 20, 2019, the Court issued an Opinion and Order awarding compensatory damages to Plaintiff in the amount of \$78,403,172.36, plus prejudgment interest. The Court also denied Plaintiff's requests for punitive damages and equitable relief.

On May 1, 2020, Nasdaq, PureShares LLC ("PureShares"), and ETFMG announced a global settlement that resolves all claims in both the PureShares action and the Nasdaq action. The completion of the settlement is subject to on-going good-faith negotiations between the parties.

Financial Highlights

Financial information for the Fund will be available after it has completed a fiscal year of operations.
